Explanation and Reconciliation of Non-GAAP Financial Measures

The Company reports its financial results in accordance with accounting principles generally accepted in the United States of America (“GAAP”). However, management believes that Upstream segment Adjusted EBITDA may provide financial statement users with additional meaningful comparisons between current results and the results of the Company’s peers and of prior periods.

Upstream segment Adjusted EBITDA excludes certain charges or expenditures. Upstream segment Adjusted EBITDA is a supplemental measure of performance and should not be viewed as a substitute for any GAAP measure.

Management presents Upstream segment Adjusted EBITDA because (i) it is consistent with the manner in which the Company’s position and performance are measured relative to the position and performance of its peers and (ii) it is more comparable to earnings estimates provided by securities analysts.
