Form 10-K

(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended June 30, 2009

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 1-5507

Magellan Petroleum Corporation

(Exact name of registrant as specified in its charter)

Delaware
State or other jurisdiction of
incorporation or organization
10 Columbus Boulevard, Hartford, CT
(Address of principal executive offices)

06-0842255
(I.R.S. Employer
Identification No.)
06106
(Zip Code)

**Registrant's telephone number, including area code
(860) 293-2006**

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of Each Class</u>	<u>Name of Each Exchange on Which Registered</u>
Common stock, par value \$.01 per share	NASDAQ Capital Market

Securities registered pursuant to Section 12(g) of the Act

Title of Class
None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the voting and non-voting common equity held by non-affiliates of the registrant at the \$0.65 closing price on December 31, 2008 (the last business day of the most recently completed second quarter) was \$26,803,787.

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date:

Common stock, par value \$.01 per share, 50,210,977 shares outstanding as of September 1, 2009.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Proxy Statement related to the Annual Meeting of Stockholders for the fiscal year ended June 30, 2009, are

incorporated by reference in Part III of this Form 10-K to the extent stated herein.

PART I

Item 1. *Business*

Magellan Petroleum Corporation (the “Company” or “MPC” or “Magellan”) is engaged in the sale of oil and gas and the exploration for and development of oil and gas reserves. At June 30, 2009, MPC’s principal asset was a 100.00% equity interest in its subsidiary, Magellan Petroleum Australia Limited (“MPAL”).

MPAL’s major assets are two petroleum production leases covering the Mereenie oil and gas field (35% working interest), one petroleum production lease covering the Palm Valley gas field (52% working interest), five petroleum production leases covering the Nockatunga oil fields (41% working interest) and eighteen licenses in the United Kingdom, five of which are operated by MPAL. Both the Mereenie and Palm Valley fields are located in the Amadeus Basin in the Northern Territory of Australia. The Nockatunga fields are located in the Cooper Basin in South West Queensland, Australia. Santos Ltd. (“Santos”), a publicly owned Australian company, owns a 65% interest in the Mereenie field, a 48% interest in the Palm Valley field and a 59% interest in the Nockatunga fields. Santos is the operator of the Mereenie and Nockatunga fields.

MPC has a direct 2.67% carried interest in the Kotaneelee gas field in the Yukon Territory of Canada. The following chart illustrates the various relationships between MPC and the various companies discussed above.

The following is a tabular presentation of the omitted material:

MPC — MPAL RELATIONSHIPS CHART

MPC owns 100% of MPAL.

MPC owns 2.67% of the Kotaneelee Field, Canada.

MPAL owns 52% of the Palm Valley Field, Australia.

MPAL owns 35% of the Mereenie Field, Australia.

MPAL owns 41% of the Nockatunga Fields, Australia.

SANTOS owns 48% of the Palm Valley Field, Australia.

SANTOS owns 65% of the Mereenie Field, Australia.

SANTOS owns 59% of the Nockatunga Fields, Australia.

(a) *General Development of Business.*

Operational Developments Since the Beginning of the Last Fiscal Year:

The following is a summary of oil and gas properties that the Company has an interest in. The Company is committed to certain exploration and development expenditures, some of which may be farmed out to third parties.

AUSTRALIA

Mereenie Oil and Gas Field

MPAL (35%) and Santos (65%), the operator (together known as the Mereenie Producers), own the Mereenie field which is located in the Amadeus Basin of the Northern Territory. MPAL’s share of the Mereenie field proved developed oil reserves and gas reserves based upon contracted amounts (net of royalties) was approximately 685,000 barrels and 0.8 billion cubic feet (Bcf) of gas at June 30, 2009. During fiscal 2009, MPAL’s share of oil sales was 105,000 barrels and 4.6 Bcf of gas, which is subject to net overriding royalties aggregating 4.0625% and the statutory government royalty of 10%. Prior to early June 2009, the oil was transported by means of a 167-mile eight-inch oil pipeline from the field to an industrial park near Alice Springs.

[Table of Contents](#)

The oil was then shipped south approximately 950 miles by road to the Port Bonython Export Terminal at Whyalla, South Australia for sale. Since early June 2009, the oil is transported by road directly from the field to Port Bonython Export Terminal. The cost of transporting the oil to the terminal is borne by the Mereenie Producers. The oil pipeline has been placed in care and maintenance because of environmental concerns by the operator over its integrity. The petroleum leases covering the Mereenie field expire in November 2023.

The Mereenie Producers are contracted to provide Mereenie gas in the Northern Territory to the Power and Water Corporation (“PWC”) for use in Darwin and other Northern Territory centers. See “Gas Supply Contracts” below.

Palm Valley Gas Field

MPAL has a 52.023% interest in, and is the operator of, the Palm Valley gas field which is also located in the Amadeus Basin of the Northern Territory. Santos, the operator of the Mereenie field, owns the remaining 47.977% interest in the Palm Valley field which provides gas to meet the Alice Springs and Darwin supply contracts with PWC. See “Gas Supply Contracts” below. MPAL’s share of the Palm Valley proved developed reserves (net of royalties) was 2.5 Bcf at June 30, 2009 and is based upon gas contract amounts. During fiscal 2009, MPAL’s share of gas sales was 1.4 Bcf which is subject to a 10% statutory government royalty and net overriding royalties aggregating 7.3125%. The producers and PWC installed additional compression equipment in the field in 2006 that will assist field deliverability during the remaining Darwin gas contract period. PWC funds the cost of additions and modifications to the gas delivery system under the gas supply agreement. The petroleum lease covering the Palm Valley field expires in November 2024.

Gas Supply Contracts

In 1983, the MPAL and Santos (“Palm Valley Producers”) commenced the sale of gas to Alice Springs under a 1981 agreement. That agreement terminated in June 2008. In 1985, the Palm Valley Producers and Mereenie Producers signed agreements for the sale of gas to PWC, through its wholly-owned company Gasgo Pty. Ltd. (“Gasgo”), for use in PWC’s Darwin electricity generating station and at a number of other generating stations in the Northern Territory. The price of gas under the Palm Valley and Mereenie gas contracts is adjusted quarterly to reflect changes in the Australian Consumer Price Index. The gas is being delivered via the 922-mile Amadeus Basin gas pipeline which was built by an Australian consortium. Since 1985, there have been several additional contracts for the sale of Mereenie gas, the latest being in June 2006 for the supply of an additional 4.4 Bcf of gas to be supplied prior to December 31, 2008. The Palm Valley Darwin contract expires in the year 2012 and the principal Mereenie contracts expired in January and June 2009. Supply obligations under the Mereenie contracts ceased in June 2009, however, there is a reasonable endeavor obligation to supply certain of PWC’s requirements through to December 31, 2010, unless amended or extended.

MPAL’s major customer, PWC, has contracted with Eni Australia for the supply of PWC’s Northern Territory gas demand requirement for twenty five years. Eni Australia, initially expected to commence sales in January 2009, is to supply the gas from its Blacktip field offshore of the Northern Territory. The Blacktip development has encountered delay but is expected to commence partial production in the near term. The follow-on production schedule and timing is not yet available to us. The Mereenie Producers will continue to supply PWC’s gas demand on a reasonable endeavors basis to supplement Blacktip gas sales as required until December 31, 2010, unless amended or extended. All prices for those sales now fall under the higher-priced Mereenie Sales Agreement 4 (“Backstop Agreement”). MPAL is actively pursuing gas sales contracts for the remaining uncontracted reserves. While gas marketing efforts to date have identified several potential customers, the majority have a gas requirement commencing in the 2010-2013 timeframe. When Blacktip gas becomes available, there will be strong competition within the market and MPAL may not be able to contract for the sale of the remaining uncontracted reserves in the short term, but may be able to do so in the longer term with increasing demand from new mining developments and industrial users in the Northern Territory and the adjacent areas of neighboring states. Unless MPAL is able to sell uncontracted gas, including reasonable

Table of Contents

endeavors gas not taken by PWC, its revenues will begin to decline substantially in 2010. Mereenie gas sales were approximately \$12.4 million (net of royalties) or 85% of total gas sales for the year ended June 30, 2009 and \$15.5 million (net of royalties) or 85% of total sales for the year ended June 30, 2008.

At June 30, 2009, MPAL's commitment to supply gas under the above agreements was as follows:

<u>Period</u>	<u>Bcf</u>
Less than one year	2.22
Between 1-5 years	1.77
Greater than 5 years	0.00
Total	<u>3.99</u>

Nockatunga Oil Fields

MPAL purchased its 40.936% working interest (38.703% net revenue interest) in the Nockatunga oil fields in the Cooper Basin in southwest Queensland effective from July 2003. Santos is operator of the fields and holds the remaining interest. The assets are comprised of eleven producing oil fields (Currambar, Kamel, Dilker, Dilker North, Koor, Maxwell, Maxwell South, Muthero, Nockatunga, Thungo and Winna) in Petroleum Leases 33, 50, 51, 244 and 245, together with exploration acreage in the adjacent Authority to Prospect for Petroleum ("ATP") No. 267P. The fields are currently producing about 425 barrels of oil per day (MPAL's share is approximately 165 barrels of oil per day). During fiscal 2009, MPAL's share of oil sales was 70,000 barrels which is subject to a 10% statutory government royalty and net overriding royalties aggregating 3.0%. MPAL's share of the Nockatunga fields' proved developed oil reserves (net of royalties) was approximately 92,000 barrels at June 30, 2009. Petroleum Lease 33 was renewed for a further 21 years and will expire in April 2028. Petroleum Leases 50 and 51 expire in June 2011. Petroleum Leases 244 and 245 were granted with effect on December 1, 2008 and will expire in November 2029. ATP 267P was renewed for a further four year term and will expire in November 2011. A 99 square mile 3D seismic survey was conducted over Petroleum Leases 51 and 245 and parts of ATP 267P in early 2009. No drilling was undertaken during fiscal 2009.

Dingo Gas Field

MPAL has a 34.3365% interest in the Dingo gas field which is held under Retention License 2 in the Amadeus Basin in the Northern Territory. No market has emerged for the gas volumes that have been discovered in the Dingo gas field. MPAL's share of potential production from this permit area is subject to a 10% statutory government royalty and overriding royalties aggregating 4.8125%. The license was renewed for a further five year term and expires in February 2014.

Maryborough Basin

MPAL holds a 100% interest in exploration permit ATP 613P in the Maryborough Basin in Queensland, Australia. MPAL (100%) also has applications pending for permits ATP 674P and ATP 733P which are adjacent to ATP 613P. In May 2006, MPAL entered into a farm-out agreement in relation to a portion of ATP 613P, ATP 674P and ATP 733P with Eureka Petroleum, under which that company funded the drilling of two exploration wells in 2007 to test the coal seam gas potential of the Burrum Coal Measures near the city of Maryborough. The Burrum-1 and Burrum-2 farm-out wells drilled in early 2007 intersected multiple thin coal seams and evaluation of the gas potential is continuing. The grant of ATP 674P and ATP 733P is subject to agreement of the native title claimants to the area.

Eureka Petroleum has agreed to undertake a staged evaluation of the farm-out area to earn a 75% interest in any petroleum lease granted in the area. MPAL retains a 25% interest and is carried by Eureka Petroleum through any development to the grant of a petroleum lease. Eureka Petroleum operates the joint venture. At June 30,

Table of Contents

2009, the work obligations of the ATP 613P permit were fully committed by Eureka Petroleum under the farm-out arrangement. ATP 613P was renewed in March 2008 for a further 12-year term ending in March 2019.

Cooper/Eromanga Basin (See Executive Summary in Part II, Item 7-Management's Discussion and Analysis of Financial Condition and Results of Operation for discussion of potential sale of Cooper Basin assets.)

PEL 94, PEL 95 & PPL 210

During fiscal year 1999, MPAL (50%) and its partner Beach Petroleum were successful in bidding for two exploration blocks, Petroleum Exploration License ("PEL") 94 and PEL 95, in South Australia's Cooper Basin. The Aldinga-1 exploration well was drilled and completed in September 2002 and began producing in May 2003 at about 80 barrels of oil per day. Petroleum Production License ("PPL") 210 was granted over the Aldinga field in December 2004. By June 2009, production had declined to about 10 barrels of oil per day. No further development is planned for the field.

Black Rock Petroleum contributed to the cost of drilling the Myponga-1 well in June 2004 to earn a 15% interest in the PEL 94 permit. MPAL's interest in PEL 94 was reduced to 35%. Black Rock Petroleum subsequently assigned its interest in PEL 94 to Victoria Petroleum. At June 30, 2009, MPAL's share of the work obligations of PEL 94 totaled \$622,000 of which \$28,000 was committed and in PEL 95 totaled \$929,000 of which \$81,000 was committed. PEL 94 expires in May 2012 and PEL 95 expires in October 2011.

PEL 106, PEL 107 & PPL 212

During fiscal year 2005, MPAL entered into a farm-in arrangement with Great Artesian Oil and Gas to drill explorations wells in petroleum exploration permits PEL 106 and PEL 107 in the Cooper Basin of South Australia. The Kiana-1 well was drilled in PEL 107 in 2005 and was completed for production as an oil producer. PPL 212 was granted over the Kiana field in January 2006. MPAL earned a 30% interest in PPL 212 by contributing to the drilling cost of the Kiana-1 well. During fiscal 2009, MPAL's share of oil sales was approximately 1,900 barrels which is subject to a 10% statutory government royalty and net overriding royalties aggregating 4.0%. MPAL's share of the Kiana field's proved developed oil reserves was approximately 11,000 barrels at June 30, 2009. Beach Petroleum is operator of the joint venture.

MPAL exercised its option to participate in a further two wells in PEL 107 under the farm-in arrangement with Great Artesian Oil and Gas to earn a 30% interest in any discoveries and a 20% interest in the PEL 107 permit. The Keeley-1 and Cabbots-1 farm-in wells were drilled in late 2006. Both wells were dry holes. PEL 107 was renewed for a further five year term and expires in December 2013. At June 30, 2009, the work obligations of PEL 107 totaled \$525,000, of which \$40,000 was committed.

The Udacha-1 gas discovery well was drilled in February 2006 in the farm-in area with Great Artesian Oil and Gas, covering portion of PEL 106 and the adjacent PEL 91 permit. A production test was carried out in late 2006 which indicated that the discovery is potentially commercially viable. If the discovery is commercial, MPC will earn a 30% interest in any petroleum production license granted over the Udacha field. Beach Petroleum is operator of the joint venture and the participants are seeking a gas sales arrangement for the Udacha gas. The operator has recommenced applying for a retention license with the view to moving to a petroleum production license by the end of 2009. The intention is to commence gas production and sales in January 2010.

PEL 110

During fiscal year 2001, MPAL (50%) and its partner Beach Petroleum were successful in bidding for exploration block PEL 110 in the Cooper Basin. PEL 110 was granted in February 2003. During July 2005, Cooper Energy contributed to the cost of the Yanerbie-1 well to earn a 25% interest in PEL 110 which reduced MPAL's interest in PEL 110 to 37.5%. PEL 110 was renewed for a further five year term and expires in

[Table of Contents](#)

November 2013. Beach Petroleum withdrew from the license and joint venture with effect at the end of the first five year term, and MPAL's interest increased proportionally to 60%. At June 30, 2009, MPAL's share of the work obligations of PEL 110 totaled \$1,231,000, of which \$68,000 was committed.

UNITED KINGDOM

PEDL 098, PEDL 099 & PEDL 256

During fiscal year 2001, MPAL acquired an interest in two exploration licenses in southern England in the Weald-Wessex basin. The two licenses, Petroleum Exploration and Development License ("PEDL") 098 (22.5%) in the Isle of Wight and PEDL 099 (40%) in the Portsdown area of Hampshire, were each granted for a period of six years. The Sandhills-2 well, drilled in the PEDL 098 permit during 2005, encountered a heavily biodegraded remnant oil column and was plugged and abandoned. At June 30, 2009, MPAL's share of the work obligations of the PEDL 098 license totaled \$55,000 of which \$18,000 was committed. PEDL 098 expires in September 2011. PEDL 099 expired in September 2008.

The former PEDL 099 licensees made an out-of-round application for a license over the northeast portion of the former PEDL 099 area which is adjacent to the Havant Prospect in PEDL 155. PEDL 256 was granted to MPAL (40% interest) and its joint venturers for a period of six years with effect from May 2009 with a drill or drop obligation at the end of the term. PEDL 256 expires in May 2015. At June 30, 2009, MPAL's share of the work obligations of the PEDL 256 license totaled \$2,180,000, of which \$40,000 was committed.

PEDL 125 & PEDL 126

Effective July 1, 2003, MPAL acquired two exploration licenses, PEDL 125 (40%) in Hampshire and PEDL 126 (40%) in West Sussex, in the Weald Basin of southern England; each granted for a period of six years. The drilling plans for the Markwells Wood-1 well in PEDL 126 are in progress and have received all necessary approvals. However, due to certain delays and the availability of suitable rigs to perform the drilling work, the spudding of this well is expected in the early part of the first quarter of 2010. Plans for drilling Hedge End-2 later in 2010 are in progress. The U.K. company Encore Oil (formerly known as Oil Quest Resources) will fund part of MPAL's share of the cost of drilling the two wells to acquire a 10% interest in each of the licenses. Both PEDLs were extended by the Government for a further one year term and the licenses expire in June 2010. At June 30, 2009, MPAL's share of the work obligations of the two licenses totaled \$3,150,000 which was committed.

PEDL 135, PEDL 136 & PEDL 137

Effective October 1, 2004, MPAL was granted 100% interest in PEDL 135, PEDL 136 and PEDL 137 in the Weald Basin in southern England for a term of six years. Each has a drill or drop obligation at the end of the term. MPAL has undertaken a program of seismic data purchase, reprocessing and interpretation and has identified three drilling prospects. Drilling of two wells is being planned and government drilling approvals sought. At June 30, 2009, MPAL's work obligation for the three licenses totaled \$13,930,000, of which \$282,000 was committed.

PEDL 152, PEDL 153, PEDL 154 & PEDL 155

Effective October 1, 2004, MPAL acquired four licenses in the Weald Basin in southern England, each granted for a period of six years; PEDL 152 (22.5%), PEDL 153 (33.3%), PEDL 154 (50%) and PEDL 155 (40%). Each license has a drill or drop obligation at the end of its term. The well has to be drilled within the first six years of the initial term in order for the license to extend into the next five-year license term. The drilling plans for the Havant-1 well in PEDL 155 are in progress and spudding of this well is expected in 2010. The U.K. company Encore Oil will fund part of MPAL's share of the PEDL 155 drilling and exploration costs to acquire a 10% interest in the license. At June 30, 2009, MPAL's work obligation for the four licenses totaled \$5,500,000, of which \$1,588,000 was committed.

Table of Contents

PEDL 231, PEDL 232, PEDL 234, PEDL 240, PEDL 242, PEDL 243 & PEDL 246

Effective July 1, 2008, MPAL and its joint venture partner were granted interests in PEDL 231 (MPAL 50%), PEDL 232 (50%), PEDL 234(50%), PEDL 240 (22.5%), PEDL 242 (100%), PEDL 243 (50%) & PEDL 246 (100%) located in the Weald and Wessex Basins of southern England. Two of these PEDLs are operated by MPAL. Each license has a drill or drop obligation at the end of its term and expires in July 2014. At June 30, 2009, MPAL's share of the work obligations of: the PEDL 231, PEDL 232, PEDL 234 & PEDL 243 licenses totaled \$7,500,000 of which \$1,000,000 was committed; the PEDL 240 license was \$1,328,000, of which \$40,000 was committed; and the PEDL 242 & PEDL 246 licenses totaled \$10,515,000, of which \$56,000 was committed.

CANADA

MPC owns a 2.67% carried interest in a lease (31,885 gross acres, 850 net acres) in the southeast Yukon Territory, Canada, which includes the Kotaneelee gas field. Devon Canada Corporation is the operator of this partially developed field which is connected to a major pipeline system. Production at Kotaneelee commenced in February 1991. The Company recorded revenue of \$164,000 from this field in fiscal 2009.

(b) Financial Information About Industry Segments.

The Company is engaged in only one industry, namely, oil and gas exploration, development, production and sale. The Company conducts such business through its two operating segments; MPC and its wholly owned subsidiary MPAL.

(c) (1) Narrative Description of the Business.

MPC was incorporated in 1957 under the laws of Panama and was reorganized under the laws of Delaware in 1967. MPC is directly engaged in the exploration for, and the development, production and sale of oil and gas reserves in Canada, and indirectly through its subsidiary MPAL in Australia and the United Kingdom.

(i) Principal Products.

MPAL has an interest in the Palm Valley gas field and in the Mereenie oil and gas field in the Amadeus Basin of the Northern Territory and in the Nockatunga, Kiana and Aldinga oil fields in the Cooper Basin of South Australia and Queensland. See Item 1(a) — Australia — for a discussion of the oil and gas production from these fields. MPC has a direct 2.67% carried interest in the Kotaneelee gas field in Canada.

(ii) Status of Product or Segment.

See Item 1(a) and (b) — Australia and Canada — for a discussion of the current and future operations of the Mereenie, Palm Valley, Nockatunga, Kiana and Aldinga fields in Australia and MPC's interest in the Kotaneelee field in Canada.

(iii) Raw Materials.

Not applicable.

Table of Contents

(iv) *Patents, Licenses, Franchises and Concessions Held.*

MPAL has interests directly and indirectly in the following permits. Permit holders are generally required to carry out agreed work and expenditure programs.

<u>Permit</u>	<u>Expiration Date</u>	<u>Location</u>
Petroleum Lease No. 4 and No. 5 (Mereenie) (Amadeus Basin)	November 2023	Northern Territory, Australia

Petroleum Leases issued by the Northern Territory and Queensland Governments are subject to the Petroleum (Prospecting and Mining) Act and the Petroleum Act of the Northern Territory and the Petroleum Act and the Petroleum and Gas (Production & Safety) Act of Queensland. Lessees have the exclusive right to produce petroleum from the land subject to payment of a rental and a royalty at the rate of 10% of the wellhead value of the petroleum produced. Rental payments may be offset against the royalty paid. The term of a lease is

Table of Contents

21 years, and leases may be renewed for successive terms of 21 years each. Petroleum Production Licenses issued by the South Australian Government are subject to the Petroleum Act of South Australia. Licensees have the exclusive right to produce petroleum from the land subject to payment of a rental and a royalty at the rate of 10% of the wellhead value of the petroleum produced. Licenses terminate two years after production ceases. Petroleum Exploration and Development Licenses issued by the Government of the United Kingdom are subject to the Petroleum Act. Licensees have the exclusive right to produce petroleum from the land subject to payment of a rental. The term of the license is 31 years.

Since 1992, there has been an ongoing controversy regarding the Aborigines and the ownership of their traditional lands. There has been legislation aimed at resolving this controversy. The Company does not believe that this issue will have a material adverse impact on MPAL's properties.

(v) *Seasonality of Business.*

Although the Company's business is not seasonal, the demand for oil and especially gas is subject to seasonal fluctuations in the Australian weather.

(vi) *Working Capital Items.*

See Item 7 — Liquidity and Capital Resources for a discussion of this information.

(vii) *Customers.*

Although the majority of MPAL's producing oil and gas properties are located in a relatively remote area in central Australia (See Item 1 — Business and Item 2 — Properties), the completion in January 1987 of the Amadeus Basin to Darwin gas pipeline has provided access to and expanded the potential market for MPAL's gas production.

Natural Gas Production

MPAL's major customer, PWC, has contracted with Eni Australia for the supply of PWC's Northern Territory gas demand requirement for twenty five years. Eni Australia, initially expected to commence sales in January 2009, is to supply the gas from its Blacktip field offshore of the Northern Territory. The Blacktip development has encountered delay but is expected to commence partial production in the near term. The follow-on production schedule and timing is not yet available to us. The Mereenie Producers will continue to supply PWC's gas demand on a reasonable endeavors basis to supplement Blacktip gas sales as required until December 31, 2010, unless amended or extended. All prices for those sales now fall under the Backstop Agreement. MPAL is actively pursuing gas sales contracts for the remaining uncontracted reserves. While gas marketing efforts to date have identified several potential customers, the majority have a gas requirement commencing in the 2010-2013 timeframe. When Blacktip gas becomes available, there will be strong competition within the market and MPAL may not be able to contract for the sale of the remaining uncontracted reserves in the short term, but may be able to do so in the longer term with increasing demand from new mining developments and industrial users in the Northern Territory and the adjacent areas of neighboring states. Unless MPAL is able to sell uncontracted gas, including reasonable endeavors gas not taken by PWC, its revenues will begin to decline substantially in 2010. Mereenie gas sales were approximately \$12.4 million (net of royalties) or 85% of total gas sales for the year ended June 30, 2009 and \$15.5 million (net of royalties) or 85% of total sales for the year ended June 30, 2008.

Oil Production

Presently all of the crude oil and condensate production from Mereenie is being shipped and sold through the Port Bonython Export Terminal, Whyalla, South Australia. Crude oil production from Kiana and Aldinga is

Table of Contents

generally shipped through the Moomba processing facility in northeastern South Australia and piped from there to the Port Bonython Export Terminal where it is sold. Nockatunga crude oil is shipped and sold through the IOR Energy refinery at Eromanga, Southwest Queensland. Oil sales during fiscal 2009 were 40.2% to the Santos group of companies, 13.1% to the Beach Petroleum group of companies, 8.0% to Origin Energy Resources and 39.2% to IOR Energy.

(x) *Competitive Conditions in the Business.*

The exploration for and production of oil and gas are highly competitive operations. The ability to exploit a discovery of oil or gas is dependent upon such considerations as the ability to finance development costs, the availability of equipment, and the possibility of engineering and construction delays and difficulties. The Company also must compete with major oil and gas companies which have substantially greater resources than the Company.

Furthermore, various forms of energy legislation which have been or may be proposed in the countries in which the Company holds interests may substantially affect competitive conditions. However, it is not possible to predict the nature of any such legislation which may ultimately be adopted or its effects upon the future operations of the Company.

At the present time, the Company's principal income producing operations are in Australia and for this reason, current competitive conditions in Australia are material to the Company's future. Currently, most indigenous crude oil is consumed within Australia. In addition, refiners and others import crude oil to meet the overall demand in Australia. The Palm Valley Producers and the Mereenie Producers are developing and separately marketing the production from each field. Because of the relatively remote location of the Amadeus Basin and the inherent nature of the market for gas, it would be impractical for each working interest partner to attempt to market separately its respective share of gas production from each field. MPAL's major customer, PWC, has contracted with Eni Australia for the supply of PWC's Northern Territory gas demand requirement for twenty five years. Eni Australia, initially expected to commence sales in January 2009, is to supply the gas from its Blacktip field offshore of the Northern Territory. The Blacktip development has encountered delay but is expected to commence partial production in the near term. The follow-on production schedule and timing is not yet available to us. The Mereenie Producers will continue to supply PWC's gas demand on a reasonable endeavors basis to supplement Blacktip gas sales as required until December 31, 2010, unless amended or extended. All prices for those sales now fall under the Backstop Agreement. MPAL is actively pursuing gas sales contracts for the remaining uncontracted reserves. While gas marketing efforts to date have identified several potential customers, the majority have a gas requirement commencing in the 2010-2013 timeframe. When Blacktip gas becomes available, there will be strong competition within the market and MPAL may not be able to contract for the sale of the remaining uncontracted reserves in the short term, but may be able to do so in the longer term with increasing demand from new mining developments and industrial users in the Northern Territory and the adjacent areas of neighboring states. Unless MPAL is able to sell uncontracted gas, including reasonable endeavors gas not taken by PWC, its revenues will begin to decline substantially in 2010. Mereenie gas sales were approximately \$12.4 million (net of royalties) or 85% of total gas sales for the year ended June 30, 2009 and \$15.5 million (net of royalties) or 85% of total sales for the year ended June 30, 2008.

(xi) *Research and Development.*

Not applicable.

Table of Contents

(xii) *Environmental Regulation.*

The Company is subject to the environmental laws and regulations of the jurisdictions in which it carries on its business, and existing or future laws and regulations could have a significant impact on the exploration for and development of natural resources by the Company. However, to date, the Company has not been required to spend any material amounts for environmental control facilities. The federal and state governments in Australia strictly monitor compliance with these laws but compliance therewith has not had any adverse impact on the Company's operations or its financial resources.

At June 30, 2009, the Company had accrued approximately \$9.8 million for asset retirement obligations for the Mereenie, Palm Valley, Nockatunga, Kiana, Aldinga and Dingo fields. See Note 4 of the Consolidated Financial Statements under Item 8. Financial Statements and Supplementary Data.

(xiii) *Number of Persons Employed by Company.*

At June 30, 2009, MPC had 5 employees in the United States and MPAL had 25 employees in Australia.

(d) (2) *Financial Information Relating to Foreign and Domestic Operations.*

See Note 10 to the Consolidated Financial Statements.

(3) *Risks Attendant to Foreign Operations.*

Most of the properties in which the Company has interests are located outside the United States and are subject to certain risks involved in the ownership and development of such foreign property interests. These risks include but are not limited to those of: nationalization; expropriation; confiscatory taxation; changes in foreign exchange controls; currency revaluations; price controls or excessive royalties; export sales restrictions; limitations on the transfer of interests in exploration licenses; and other laws and regulations which may adversely affect the Company's properties, such as those providing for conservation, proration, curtailment, cessation, or other limitations of controls on the production of or exploration for hydrocarbons. Thus, an investment in the Company represents a speculation with risks in addition to those inherent in domestic petroleum exploratory ventures.

Since 1992, there has been an ongoing controversy regarding the Aborigines and the ownership of their traditional lands. There has been legislation aimed at resolving this controversy. The Company does not believe that this issue will have a material adverse impact on MPAL's properties.

(4) *Data Which are Not Indicative of Current or Future Operations.*

None.

Item 1A. Risk Factors

Set forth below and elsewhere in this Annual Report on Form 10-K are risks that should be considered in evaluating the Company's common stock, as well as risks and uncertainties that could cause the actual future results of the Company to differ from those expressed or implied in the forward-looking statements contained in this Annual Report and in other public statements the Company makes. Additionally, because of the following risks and uncertainties, as well as other variables affecting the Company's operating results, the Company's past financial performance should not be considered an indicator of future performance.

The principal oil and gas properties owned by MPAL could stop producing oil and gas.

MPAL's Palm Valley, Mereenie and Nockatunga fields could stop producing oil and gas or there could be a material decrease in production levels at the fields. Since these are the three principal revenue producing

Table of Contents

properties of MPAL, any decline in production levels at these properties could cause MPAL's revenues to decline, thus reducing the amount of dividends paid by MPAL to MPC. Any such adverse impact on the revenues being received by Magellan from MPAL could restrict our ability to explore and develop oil and gas properties in the future.

If MPAL's existing long-term gas supply contracts are terminated or not renewed, MPAL's business could be adversely affected.

MPAL's financial performance and cash flows are substantially dependent upon its Palm Valley and Mereenie existing supply contracts to sell gas produced at these fields to MPAL's major customer, Gasgo, a subsidiary of PWC of the Northern Territory. Gasgo has contracted with Eni Australia for the supply of PWC's Northern Territory gas demand requirement for twenty five years. Eni Australia, initially expected to commence sales in January 2009, is to supply the gas from its Blacktip field offshore of the Northern Territory. The Blacktip development has encountered delay but is expected to commence partial production in the near term. The follow-on production schedule and timing is not yet available to us. The Mereenie Producers will continue to supply PWC's gas demand on a reasonable endeavors basis to supplement Blacktip gas sales as required until December 31, 2010, unless amended or extended. All prices for those sales now fall under the Backstop Agreement. MPAL is actively pursuing gas sales contracts for the remaining uncontracted reserves. While gas marketing efforts to date have identified several potential customers, the majority have a gas requirement commencing in the 2010-2013 timeframe. When Blacktip gas becomes available, there will be strong competition within the market and MPAL may not be able to contract for the sale of the remaining uncontracted reserves in the short term, but may be able to do so in the longer term with increasing demand from new mining developments and industrial users in the Northern Territory and the adjacent areas of neighboring states. Unless MPAL is able to sell uncontracted gas, including reasonable endeavors gas not taken by PWC, its revenues will begin to decline substantially in 2010. Mereenie gas sales were approximately \$12.4 million (net of royalties) or 85% of total gas sales for the year ended June 30, 2009 and \$15.5 million (net of royalties) or 85% of total sales for the year ended June 30, 2008.

The Palm Valley Darwin contract expires in the year 2012 and the principal Mereenie contracts expired in January and June 2009. The expiration of these contracts, if not replaced, will have an adverse effect on MPAL's revenues and business outlook and possibly its share price.

Our plans to drill for oil and gas on fields located in the U.K. may not result in successful discoveries of oil and gas.

During fiscal year 2010, we expect that at least three new wells, Markwells Wood-1, Havant-1 and Hedge End-2, in the Weald Basin in the United Kingdom in which we hold interests will be drilled in an attempt to recover oil and gas in commercially viable quantities. If these drilling projects are not successful, no revenues will be achieved from the drilling projects and our results of operations would be adversely effected.

We may not be successful in sharing the exploration and development costs of the fields and permits in which we hold interests.

Our plans for drilling in the U.K. and other areas depend, in certain cases, on our ability to enter into farm-in, joint venture or other cost sharing arrangements with other oil and gas companies. If we are not able to secure such farm-in or other arrangements in a timely manner, or on terms which are economically attractive to the Company, we may be forced to bear higher exploration and development costs with respect to our fields and interests. We may also be unable to fully develop and/or explore certain fields if the costs to do so would exceed our available exploration budget and capital resources. In either case, our results of operations could be adversely affected and the market price of our common shares could decline.

Fluctuations in our operating results and other factors may depress our stock price.

During the past few years, the equity trading markets in the United States have experienced price volatility that has often been unrelated to the operating performance of particular companies. These fluctuations may

[Table of Contents](#)

adversely affect the trading price of our common stock. From time to time, there may be significant volatility in the market price of our common stock. Investors could sell shares of our common stock at or after the time that it becomes apparent that the expectations of the market may not be realized, resulting in a decrease in the market price of our common stock.

The loss of key personnel could adversely affect our ability to operate.

We depend, and will continue to depend in the foreseeable future, on the services of the officers and key employees of MPC and MPAL. The ability to retain its officers and key employees is important to our continued success and growth. The unexpected loss of the services of one or more of these individuals could have a detrimental effect on our business. We maintain \$2 million of key person life insurance on our Chief Executive Officer, William Hastings.

There are risks inherent in foreign operations such as adverse changes in currency values and foreign regulations relating to MPAL's exploration and development operations and to MPAL's payment of dividends to us.

The properties in which Magellan has interests are located outside the United States and are subject to certain risks related to the indirect ownership and development of foreign properties, including government expropriation, adverse changes in currency values and foreign exchange controls, foreign taxes, nationalization and other laws and regulations, any of which may adversely affect the Company's properties. In addition, MPAL's principal present customer for gas in Australia is the Northern Territory Government, which also has substantial regulatory authority over MPAL's oil and gas operations. Although there are currently no exchange controls on the payment of dividends to the Company by MPAL, such payments could be restricted by Australian foreign exchange controls, if implemented.

Our dividend policy could depress our stock price.

We have never declared or paid dividends on our common stock and have no current intention to change this policy. We plan to retain any future earnings to reduce our accumulated deficit and finance growth. As a result, our dividend policy could depress the market price for our common stock and cause investors to lose some or all of their investment.

We may issue a substantial number of shares of our common stock under our stock option plans and shareholders may be adversely affected by the issuance of those shares.

As of June 30, 2009, there were 3,242,500 stock options outstanding of which 530,000 were fully vested and exercisable. There were also 1,787,500 options available for future grants under our 1998 Stock Incentive Plan. If all of these options, which total 5,030,00 in the aggregate, were awarded and exercised these shares would represent approximately 11% of our outstanding common stock and would, upon their exercise and the payment of the exercise prices, dilute the interests of other shareholders and could adversely affect the market price of our common stock.

If our shares are delisted from trading on the Nasdaq Capital Market, their liquidity and value could be reduced.

In order for us to maintain the listing of our shares of common stock on the Nasdaq Capital Market, the Company's shares must maintain a minimum bid price of \$1.00 as set forth in Marketplace Rule 5550(a)(2). If the bid price of the Company's shares trade below \$1.00 for 30 consecutive trading days, then the bid price of the Company's shares must trade at \$1.00 or more for 10 consecutive trading days during a 180-day grace period to regain compliance with the rule. On September 16, 2009, the Company's shares closed at \$1.40 per share. If the Company shares were to be delisted from trading on the Nasdaq Capital Market, then most likely the shares would be traded on the Electronic Bulletin Board, or OTC-BB. The delisting of the Company's shares from NASDAQ could adversely impact the liquidity and value of the Company's shares.

RISKS RELATED TO THE OIL AND GAS INDUSTRY

Oil and gas prices are volatile. A decline in prices could adversely affect our financial position, financial results, cash flows, access to capital and ability to grow.

Our revenues, operating results, profitability, future rate of growth and the carrying value of our oil and gas properties depend primarily upon the prices we receive for the oil and gas we sell. Prices also affect the amount of cash flow available for capital expenditures and our ability to borrow money or raise additional capital. The prices of oil, natural gas, methane gas and other fuels have been, and are likely to continue to be, volatile and subject to wide fluctuations in response to numerous factors, including the following:

- worldwide and domestic supplies of oil and gas;
- changes in the supply and demand for such fuels;
- political conditions in oil, natural gas, and other fuel-producing and fuel-consuming areas;
- the extent of Australian domestic oil and gas production and importation of such fuels and substitute fuels in Australian and other relevant markets;
- weather conditions, including effects on prices and supplies in worldwide energy markets because of recent hurricanes in the United States;
- the competitive position of each such fuel as a source of energy as compared to other energy sources; and
- the effect of governmental regulation on the production, transportation, and sale of oil, natural gas, and other fuels.

These factors and the volatility of the energy markets make it extremely difficult to predict future oil and gas price movements with any certainty. Furthermore, the ongoing worldwide financial and credit crisis has reduced the availability of liquidity and credit to fund the continuation and expansion of industrial business operations worldwide. The shortage of liquidity and credit combined with recent substantial losses in worldwide equity markets could lead to an extended worldwide economic recession. A slowdown in economic activity caused by a recession would likely reduce worldwide demand for energy and result in lower oil and natural gas prices. Oil prices declined from record levels in early July 2008 of over \$140 per barrel to below \$70 per barrel in August 2009, while natural gas prices have declined from over \$13 per mcf to approximately \$3 per mcf over the same period.

Sustained declines in oil and gas prices (such as those experienced in the second half of 2008) would not only reduce revenue, but could reduce the amount of oil and gas that we can produce economically and, as a result, could have a material adverse effect on our financial condition, results of operations and reserves. Further, oil and gas prices do not necessarily move in tandem. Approximately 44% of our proved reserves at June 30, 2009 were natural gas reserves. Gas sales contracts in Australia are adjusted to the gas price movements related to the Australian Consumer Price Index. Future gas sales not governed by existing contracts would generate lower revenue if natural gas prices in Australia were to decline. Sales of our proved oil reserves are dependent on world oil prices. The volatility of these prices will affect future oil revenues. Based on 2009 sales volume and revenue, a 10% change in oil price would increase or decrease oil revenues by approximately \$1.1 million. Gas sales, which represented approximately 56% of production revenues in 2009, are derived primarily from the Palm Valley and Mereenie fields in the Northern Territory of Australia and the gas prices are set according to long term contracts that are subject to changes in the Australian Consumer Price Index.

Competition in the oil and natural gas industry is intense, and many of our competitors have greater financial and other resources than we do.

We operate in the highly competitive areas of oil and natural gas acquisition, development, exploitation, exploration and production and face intense competition from both major and other independent oil and natural

[Table of Contents](#)

gas companies. Many of our Australian competitors have financial and other resources substantially greater than ours, and some of them are fully integrated oil companies. These companies may be able to pay more for development prospects and productive oil and natural gas properties and may be able to define, evaluate, bid for and purchase a greater number of properties and prospects than our financial or human resources permit. Our ability to develop and exploit our oil and natural gas properties and to acquire additional properties in the future will depend upon our ability to successfully conduct operations, evaluate and select suitable properties and consummate transactions in this highly competitive environment. In addition, we may not be able to compete with, or enter into cooperative relationships with, any such firms.

Our oil and gas exploration and production operations are subject to numerous environmental laws, compliance with which may be extremely costly.

Our operations are subject to environmental laws and regulations in the various countries in which they are conducted. Such laws and regulations frequently require completion of a costly environmental impact assessment and government review process prior to commencing exploratory and/or development activities. In addition, such environmental laws and regulations may restrict, prohibit, or impose significant liability in connection with spills, releases, or emissions of various substances produced in association with fuel exploration and development.

We can provide no assurance that we will be able to comply with applicable environmental laws and regulations or that those laws, regulations or administrative policies or practices will not be changed by the various governmental entities. The cost of compliance with current laws and regulations or changes in environmental laws and regulations could require significant expenditures. Moreover, if we breach any governing laws or regulations, we may be compelled to pay significant fines, penalties, or other payments. Costs associated with environmental compliance or noncompliance may have a material adverse impact on our cash flows, financial condition or results of operations in the future.

The actual quantities and present value of our proved reserves may prove to be lower than we have estimated.

This annual report and the documents incorporated by reference in this annual report contain estimates of our proved reserves and the estimated future net revenues from our proved reserves. These estimates are based upon various assumptions, including assumptions required by the SEC relating to oil and gas prices, drilling and operating expenses, capital expenditures, taxes and availability of funds. The process of estimating oil and gas reserves is complex. The process involves significant decisions and assumptions in the evaluation of available geological, geophysical, engineering and economic data for each reservoir. Therefore, these estimates are inherently imprecise.

Actual future production, oil and gas prices, revenues, taxes, development expenditures, operating expenses and quantities of recoverable oil and gas reserves most likely will vary from these estimates. Such variations may be significant and could materially affect the estimated quantities and present value of our proved reserves. In addition, we may adjust estimates of proved reserves to reflect production history, results of exploration and development drilling, prevailing oil and gas prices and other factors, many of which are beyond our control. Our properties may also be susceptible to hydrocarbon drainage from production by operators on adjacent properties.

There are many uncertainties in estimating quantities of oil and gas reserves. In addition, the estimates of future net cash flows from our proved developed reserves and their present value are based upon assumptions about future production levels, prices and costs that may prove to be inaccurate. Our estimated reserves may be subject to upward or downward revision based upon our production, results of future exploration and development, prevailing oil and gas prices, operating and development costs and other factors.

We may not have funds sufficient to make the significant capital expenditures required to replace our reserves.

Our exploration, development and acquisition activities require substantial capital expenditures. Historically, we have funded our capital expenditures through a combination of cash flows from operations,

[Table of Contents](#)

farming-in other companies or investors to MPAL's exploration and development projects in which we have an interest and/or equity issuances. Future cash flows are subject to a number of variables, such as the level of production from existing wells, prices of oil and gas, and our success in developing and producing new reserves. If revenue were to decrease as a result of lower oil and gas prices or decreased production, and our access to capital were limited, we would have a reduced ability to replace our reserves. If our cash flow from operations is not sufficient to fund MPAL's capital expenditure budget, we may not be able to rely upon additional farm-in opportunities, debt or equity offerings or other methods of financing to meet these cash flow requirements.

If we are not able to replace reserves, we may not be able to sustain production.

Our future success depends largely upon our ability to find, develop or acquire additional oil and gas reserves that are economically recoverable. Unless we replace the reserves we produce through successful development, exploration or acquisition activities, our proved reserves will decline over time. Recovery of any additional reserves will require significant capital expenditures and successful drilling operations. We may not be able to successfully find and produce reserves economically in the future. In addition, we may not be able to acquire proved reserves at acceptable costs.

Exploration and development drilling may not result in commercially productive reserves.

We do not always encounter commercially productive reservoirs through our drilling operations. The new wells we drill or participate in may not be productive and we may not recover all or any portion of our investment. The seismic data and other technologies we use do not allow us to know conclusively prior to drilling a well that oil or gas is present or may be produced economically. The cost of drilling, completing and operating a well is often uncertain, and cost factors can adversely affect the economics of a project. Our efforts will be unprofitable if we drill dry wells or wells that are productive but do not produce enough reserves to return a profit after drilling, operating and other costs. Further, our drilling operations may be curtailed, delayed or canceled as a result of a variety of factors, including:

- unexpected drilling conditions;
- title problems;
- pressure or irregularities in formations;
- equipment failures or accidents;
- adverse weather conditions;
- compliance with environmental and other governmental requirements; and
- increases in the cost of, or shortages or delays in the availability of, drilling rigs and equipment.

Future price declines may result in a write-down of our asset carrying values.

We follow the successful efforts method of accounting for our oil and gas operations. Under this method, the costs of successful wells, development dry holes and productive leases are capitalized and amortized on a units-of-production basis over the life of the related reserves. Cost centers for amortization purposes are determined on a field-by-field basis. Magellan records its proportionate share in its working interest agreements in the respective classifications of assets, liabilities, revenues and expenses. Unproved properties with significant acquisition costs are periodically assessed for impairment in value, with any required impairment charged to expense. The successful efforts method also imposes limitations on the carrying or book value of proved oil and gas properties. Oil and gas properties (including exploration rights), along with goodwill are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amounts may not be recoverable. We estimate the future undiscounted cash flows from the affected properties to determine the recoverability of carrying amounts. In general, analyses are based on proved developed reserves, except in

[Table of Contents](#)

circumstances where it is probable that additional resources will be developed and contribute to cash flows in the future. For Mereenie, proved developed natural gas reserves are limited to contracted quantities. For Palm Valley, reserves were based upon the quantities of gas committed to the contract and estimated sales subsequent to the contract date. If such contracts are extended, the proved developed reserves will be increased to the lesser of the actual proved developed reserves and risk adjusted probable and possible reserves or the contracted quantities. A significant decline in oil and gas prices from current levels, or other factors, without other mitigating circumstances, could cause a future write down of capitalized costs and a non-cash charge against future earnings.

Oil and gas drilling and producing operations are hazardous and expose us to environmental liabilities.

Oil and gas operations are subject to many risks, including well blowouts, cratering and explosions, pipe failure, fires, formations with abnormal pressures, uncontrollable flows of oil, natural gas, brine or well fluids, and other environmental hazards and risks. Our drilling operations involve risks from high pressures and from mechanical difficulties such as stuck pipes, collapsed casings and separated cables. If any of these risks occur, we could sustain substantial losses as a result of:

- injury or loss of life;
- severe damage to or destruction of property, natural resources and equipment;
- pollution or other environmental damage;
- clean-up responsibilities;
- regulatory investigations and penalties;
- and suspension of operations.

Our liability for environmental hazards includes those created either by the previous owners of properties that we purchase or lease or by acquired companies prior to the date we acquire them. We maintain insurance against some, but not all, of the risks described above. Our insurance may not be adequate to cover casualty losses or liabilities. Also, in the future we may not be able to obtain insurance at premium levels that justify its purchase.

Difficult conditions resulting from the ongoing U.S. and worldwide financial and credit crisis, and significant concerns over the continuing recessions in the U.S. and Australian economies, may materially adversely affect our business and results of operations and we do not expect these conditions to improve in the near future.

Since 2008, the United States and many other nations (including Australia) around the world have been experiencing a financial and credit crisis. Concerns over inflation, energy costs, geopolitical issues, the availability and cost of credit, the U.S. mortgage market and a declining real estate market in the U.S. and elsewhere have contributed to increased market volatility and disruptions and diminished expectations for the U.S. and world economies and markets going forward. These factors, combined with volatile oil and gas prices, declining business and consumer confidence and increased unemployment, have precipitated a worldwide economic slowdown.

In addition, the U.S. and worldwide capital and credit markets have been experiencing extreme volatility and disruption for more than twelve months. Initially, the concerns on the part of market participants were focused on the subprime segment of the mortgage-backed securities market. However, these concerns have since expanded to include a broad range of mortgage and asset-backed and other fixed income securities, including those rated investment grade, the U.S. and international credit and interbank money markets generally, and a wide range of financial institutions and markets, asset classes and sectors. Since September 2008, market volatility and disruptions have reached unprecedented levels, leading in many cases to unprecedented

Table of Contents

government legislation and other actions to stabilize world markets and financial institutions and promote consumer and investor confidence.

Continuing volatility and disruption in worldwide capital and credit markets and further deteriorating conditions in the U.S. and Australian economies could affect our revenues and earnings negatively and could have a material adverse effect on our business, results of operations and financial condition. For example, purchasers of our oil and gas production may reduce the amounts of oil and gas they purchase from us and/or delay or be unable to make timely payments to us.

Further, a number of our oil and gas properties are operated by third parties whom we depend upon for timely performance of drilling and other contractual obligations and, in some cases, for distribution to us of our proportionate share of revenues from sales of oil and gas we produce. If current economic conditions adversely impact our third party operators, we are exposed to the risk that drilling operations or revenue disbursements to us could be delayed. This “trickle down” effect could significantly harm our business, financial condition and results of operation.

Currency exchange rate fluctuations may negatively affect our operating results.

The exchange rates among the Australian dollar and the U.S. dollar, as well as the exchange rates between the Australian dollar and the U.K. pound sterling, have changed in recent periods and may fluctuate substantially in the future. We expect that a majority of our revenue will continue to be generated in the Australian dollar in the future. Since June 30, 2008, the U.S. dollar has strengthened materially against the Australian dollar which has had, and may continue to have, a materially negative impact on our revenues generated in the Australian dollar, as well as our operating income and net income, as considered on a consolidated basis. The foreign exchange loss for the year ended June 30, 2009 was \$9.9 million and is included in accumulated other comprehensive income on the balance sheet. Any continued appreciation of the U.S. dollar against the Australian dollar is likely to have a negative impact on our revenue, operating income and net income. Because of our U.K. development program, a portion of our expenses, including exploration costs and capital and operating expenditures, will continue to be denominated in U.K. pound sterling. Accordingly, any material appreciation of the U.K. pound sterling against the Australian dollar could have a negative impact on our business, operating results and financial condition.

Item 1B. *Unresolved Staff Comments.*

None

Item 2. *Properties.*

(a) MPC has interests in properties in Australia through its 100% equity interest in MPAL which holds interests in the Northern Territory, Queensland and South Australia. MPAL also has interests in the United Kingdom. In Canada, MPC has a direct interest in one lease. For additional information regarding the Company’s properties, See Item 1 — Business.

(b) (1) The information regarding reserves, costs of oil and gas activities, capitalized costs, discounted future net cash flows and results of operations is contained in Supplementary Oil & Gas Information under Item 8 — Financial Statements and Supplementary Data.

(2) *Reserves Reported to Other Agencies.*

None

(3) *Production.*

MPC's production volumes, net of royalties, for gas and oil during the three years ended June 30, 2009 were as follows (data for Canada has not been included since MPC is in a carried interest position and the data is not material):

	<u>2009</u>	<u>2008</u>	<u>2007</u>
Australia:			
Gas (bcf)	5.2	5.7	5.9
Crude oil (bbl)	153,000	211,000	179,000

Table of Contents

The average sales price per unit of production for Australia for the following fiscal years is as follows:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
Australia:			
Gas (per mcf)	A.\$ 3.54	A.\$ 3.39	A.\$ 3.24
Crude oil (per bbl)	A.\$91.21	A.\$102.35	A.\$80.75

The average production cost per unit of production for Australia for the following fiscal years is as follows:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
Australia:			
Gas (per mcf)	A.\$.99	A.\$.82	A.\$.71
Crude oil (per bbl)	A.\$26.72	A.\$17.98	A.\$18.55

Amounts presented above are in Australian dollars to show a more meaningful trend of underlying operations. For the years ended June 30, 2009, 2008 and 2007 the average foreign exchange rates were .7471, .8965, and .7860, respectively.

MPC has never paid a cash dividend on its common stock.

Recent Sales of Unregistered Securities

During the fiscal year ended June 30, 2009, there were no equity securities of the Company sold that were not registered under the Securities Act of 1933, as amended (the "Securities Act").

As previously disclosed in the Company's current reports filed on February 10, 2009, April 8, 2009, June 2, 2009 and July 14, 2009, the Company entered into a Securities Purchase Agreement (the "Purchase Agreement"), dated February 9, 2009, with Young Energy Prize S.A. ("YEP") under which the Company agreed to sell, and YEP agreed to purchase, 8,695,652 shares (the "Shares") of the Company's common stock, par value \$0.01 per share (the "Common Stock") at a purchase price of \$1.15 per share, or an aggregate of \$10,000,000. The Purchase Agreement was amended on April 3, 2009 and June 30, 2009. On July 9, 2009, the Company and YEP completed the issuance and sale of the Shares to YEP. The Company received gross proceeds of \$10 million, which will be used for general corporate and working capital purposes. On July 9, 2009, the Company also executed and delivered to YEP a Warrant Agreement entitling YEP to purchase an additional 4,347,826 shares of the Company's Common Stock (the "Warrant Shares") at an exercise price of \$1.20 per Warrant Share, subsequently reduced to \$1.15 per share on July 30, 2009.

The shares sold to YEP in the private placement and the Warrant Shares were not registered under the Securities Act or state securities laws, and may not be resold in the United States in the absence of an effective registration statement filed with the U.S. Securities and Exchange Commission ("SEC") or an available exemption from the applicable federal and state registration requirements. In the Purchase Agreement, YEP represented to the Company that: (a) it is an accredited investor, as such term is defined in Rule 501 of Regulation D promulgated under the Securities Act; (b) it acquired the Shares and the Warrant as principal for its own account for investment purposes only and not with a view to or for distributing or reselling the Shares and the Warrant or any part thereof, and (c) it is knowledgeable, sophisticated, and experienced in making, and qualified to make, decisions with respect to investments in securities representing an investment decision similar to that involved in the purchase of the Shares and the Warrant. The Company has relied on the exemption from the registration requirements of the Securities Act set forth in Regulation S promulgated thereunder for the purposes of the YEP transaction.

Issuer Purchases of Equity Securities

The following table sets forth the number of shares that the Company has repurchased under any of its repurchase plans for the stated periods, the cost per share of such repurchases and the number of shares that may yet be repurchased under the plans:

<u>Period</u>	<u>Total Number of Shares Purchased</u>	<u>Average Price Paid per Share</u>	<u>Total Number of Shares Purchased as Part of Publicly Announced Plan(1)</u>	<u>Maximum Number of Shares that May Yet Be Purchased Under Plan</u>
July 1, 2008 – June 30, 2009	0	0	0	319,150

- (1) The Company through its stock repurchase plan may purchase up to one million shares of its common stock in the open market. Through June 30, 2009, the Company had purchased 680,850 of its shares at an average

[Table of Contents](#)

price of \$1.01 per share, or a total cost of approximately \$686,000, all of which shares have been cancelled. No shares were purchased during 2009, 2008 or 2007.

Item 6. *Selected Financial Data.*

The following table sets forth selected data (in thousands except for exchange rates and per share data) and other operating information of the Company. The selected consolidated financial data in the table, except for the exchange rate and market value per share, are derived from the consolidated financial statements of the Company. This data should be read in conjunction with the consolidated financial statements, related notes and other financial information included herein.

(1) Restated — see Note 12 of Item 8, Financial Statements and Supplementary Data

[Table of Contents](#)

Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations.*

Restatement

As discussed in Note 12 to accompanying consolidated financial statements in Item 8 of this Annual Report on Form 10-K, we have restated the Consolidated Statement of Cash Flows for the years ended June 30, 2008 and 2007 that were presented in Item 8 of the Company's Form 10-K. All affected amounts contained in this Management's Discussion and Analysis of Financial Condition and Results of Operations have been adjusted to reflect the restatement.

Forward Looking Statements

Statements included in Management's Discussion and Analysis of Financial Condition and Results of Operations which are not historical in nature are intended to be, and are hereby identified as, forward looking statements for purposes of the "Safe Harbor" Statement under the Private Securities Litigation Reform Act of 1995. The Company cautions readers that forward looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those indicated in the forward looking statements. The results reflect fully the consolidated financial statements of MPC. Among these risks and uncertainties are pricing and production levels from the properties in which Magellan and MPAL have interests, the extent of the recoverable reserves at those properties and the future outcome of the negotiations for gas sales contracts for the remaining uncontracted reserves at both the Mereenie and Palm Valley gas fields in the Amadeus Basin, including the likelihood of success of other potential suppliers of gas to the current customers of Mereenie and Palm Valley production. In addition, MPAL has a large number of exploration permits and faces the risk that any wells drilled may fail to encounter hydrocarbons in commercially recoverable quantities. Magellan assumes no obligation to update any forward-looking statements contained in this release, whether as a result of new information, future events, or otherwise.

Executive Summary

MPC is engaged in the exploration, development, production, and sale of natural gas and oil reserves. Magellan has maintained a conservative financial philosophy and is now well-positioned with cash and no debt to gain value through acquisition of distressed, debt-laden small-cap companies with substantive discovered reserves.

MPAL has begun refocusing its activities toward long-term development of and sale of reserves from the Amadeus Basin, gaining ownership/control of existing reserves offshore in the Bonaparte and Browse Basin, Australia and toward entry into major oil/gas basins in North America and Europe beginning with the Weald Basin, onshore southern United Kingdom. In addition, a number of other recent initiatives are active as described below:

- We completed our first Private Investment transaction with Young Energy Prize S. A. (YEP) and signed a significant Heads of Agreement and Exclusivity Agreement with a major Methanol producer that will lead to the start of a feasibility study and commercial negotiations which may result in the construction of a methanol plant in or around the Darwin, NT, Australia area.
- We have started work with an independent advisor to sell all of our assets in the Cooper Basin, Australia. Initial indications are that there will be considerable interest in bidding on the package(s). These assets are non-core to our strategies and are better suited to being consolidated into other portfolios.
- Discussions are ongoing regarding consolidation of operations/ownership of our Palm Valley and Mereenie fields. We believe that success in these programs will result in material long-term expense reduction.
- Gas sales discussions for near and longer term Mereenie volumes remain very active and promising. We are working to supplement delayed Blacktip volumes and are endeavoring to resolve the situation

Table of Contents

on a longer-term basis as well. In the interim, full gas flow to PWC continues and all prices for those sales now fall under the higher-priced Mereenie Sales Agreement 4, which runs on a best endeavors basis through December 31, 2010, unless amended or extended.

- With the removal of land ownership and royalty issues in the United Kingdom, we are now in a position to initiate drilling at our first United Kingdom onshore location, Markwells Wood. We have ongoing discussions with the Operator, Northern Petroleum. From both an environmental and economic standpoint it is prudent to select a drilling rig that fits the requirements of the area and minimizes local impact. The Operator believes it will be in a position to do that with a target spud date in the first quarter of 2010.
- We are exploring asset acquisition opportunities in North America with the idea of adding production and value while monetizing our tax loss carryforward position.
- We are actively discussing property transactions and capital infusions so as to take positions in gas supply toward the Methanol feasibility and commercial process mentioned above.

The Palm Valley Darwin contract expires in the year 2012 and the principal Mereenie contracts expired in January and June 2009. Supply obligations under the Mereenie contracts ceased in June 2009, however, there is a reasonable endeavor obligation to supply certain of PWC's requirements through to December 31, 2010. The Palm Valley local sales contract expires in January 2012 and the Mereenie contracts continue on a month-to-month basis into 2010 under an evergreen term. The Company is making strong efforts to dedicate remaining natural gas to area buyers under "life of remaining reserves" agreement(s).

MPAL's major customer, PWC, has contracted with Eni Australia for the supply of PWC's Northern Territory gas demand requirement for twenty five years. Eni Australia, initially expected to commence sales in January 2009, is to supply the gas from its Blacktip field offshore of the Northern Territory. The Blacktip development has encountered delay but is expected to commence partial production in the near term. The follow-on production schedule and timing is not yet available to us. The Mereenie Producers will continue to supply PWC's gas demand on a reasonable endeavors basis to supplement Blacktip gas sales as required until December 31, 2010, unless amended or extended. All prices for those sales now fall under the Backstop Agreement. MPAL is actively pursuing gas sales contracts for the remaining uncontracted reserves. While gas marketing efforts to date have identified several potential customers, the majority have a gas requirement commencing in the 2010-2013 timeframe. When Blacktip gas becomes available, there will be strong competition within the market and MPAL may not be able to contract for the sale of the remaining uncontracted reserves in the short term, but may be able to do so in the longer term with increasing demand from new mining developments and industrial users in the Northern Territory and the adjacent areas of neighboring states. Unless MPAL is able to sell uncontracted gas, including reasonable endeavors gas not taken by PWC, its revenues will begin to decline substantially in 2010. Mereenie gas sales were approximately \$12.4 million (net of royalties) or 85% of total gas sales for the year ended June 30, 2009 and \$15.5 million (net of royalties) or 85% of total sales for the year ended June 30, 2008.

MPC also has a direct 2.67% carried interest in the Kotaneelee gas field in the Yukon Territory of Canada. The Company recorded revenue of \$164,000 from this investment during fiscal year 2009.

On July 9, 2009, the Company completed, pursuant to the terms of a definitive purchase agreement and related amendments an equity investment in the Company by the Company's strategic investor, Young Energy Prize S.A. ("YEP"), through the issuance to YEP of 8,695,652 shares of the Company's common stock, \$0.01 par value per share (the "Common Stock") and warrants to acquire an additional 4,347,826 shares of Common Stock. The Company received gross proceeds of \$10 million, which will be used for working capital and general corporate purposes.

On July 9, 2009, the Company entered into a Warrant Agreement which entitles YEP to purchase 4,347,826 shares of the Company's Common Stock (the "Warrant Shares") at an exercise price of \$1.20 per Warrant Share.

[Table of Contents](#)

The Warrant has a term of five years and contains certain provisions which would reduce the exercise price. Furthermore The First Amendment to the Purchase Agreement provides that, if YEP completes the purchase of the ANS Shares from the ANS Parties under the ANS-YEP Purchase Agreement, (more fully described in Item 8.01 of the Company's Form 8-K filed on April 8, 2009,) then the exercise price payable by YEP for the Warrant Shares shall be reduced from \$1.20 to \$1.15 per share. This transaction was completed on July 30, 2009 reducing the exercise price to \$1.15 per share.

In connection with the YEP Purchase Agreement, at a Board meeting held on May 27, 2009, the Company's Board adopted resolutions: (a) conditionally amending the Company's Bylaws to expand the size of the Board; and (b) conditionally electing Messrs. Nikolay Bogachev and J. Thomas Wilson to the Board as Class II directors, each to serve a term of office expiring at the Company's 2011 Annual Meeting of Shareholders. On July 9, 2009, upon completion of the YEP equity investment transaction, the elections to the Board of Messrs. Bogachev and Wilson became effective.

Critical Accounting Policies

Oil and Gas Properties

The Company follows the successful efforts method of accounting for its oil and gas operations. Under this method, the costs of successful wells, development dry holes, productive leases, and permit and concession costs are capitalized and amortized on a units-of-production basis over the life of the related reserves. Cost centers for amortization purposes are determined on a field-by-field basis. The Company records its proportionate share in joint venture operations in the respective classifications of assets, liabilities and expenses. Unproved properties with significant acquisition costs are periodically assessed for impairment in value, with any impairment charged to expense. The successful efforts method also imposes limitations on the carrying or book value of proved oil and gas properties. Oil and gas properties are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amounts may not be recoverable. In general, analyses are based on proved developed reserves, except in circumstances where it is probable that additional resources will be developed and contribute to cash flows in the future. For Mereenie, proved developed natural gas reserves were limited to contracted quantities. For Palm Valley, reserves were based upon the quantities of gas committed to the contract and estimated sales subsequent to the contract date. If such contracts are extended, the proved developed reserves will be increased to the lesser of the actual proved developed reserves and risk adjusted probable and possible reserves or the contracted quantities.

Exploratory drilling costs are initially capitalized pending determination of proved reserves but are charged to expense if no proved reserves are found. Other exploration costs, including geological and geophysical expenses, leasehold expiration costs and delay rentals, are expensed as incurred. Because the Company follows the successful efforts method of accounting, the results of operations may vary materially from quarter to quarter. An active exploration program may result in greater exploration and dry hole costs.

Table of Contents

Nondepletable assets

At June 30, 2009 and 2008, oil and gas properties include \$6.6 million and \$6.8 million, respectively, of capitalized costs that are currently not being depleted. Components of these costs are as follows:

Nondepletable capitalized costs	For the year ended June 30,		
	2009	2008	2007
PEL 106 – Cooper Basin (1)			
Balance beginning of year	\$1,855,186	\$ 1,615,943	\$ 1,170,040
Additions to capitalized costs	—	12,746	264,492
Exchange adjustment	(302,348)	226,497	181,411
Balance end of year	<u>\$1,552,838</u>	<u>\$ 1,855,186</u>	<u>\$ 1,615,943</u>
Weald/Wessex Basin U.K. (2)			
Balance beginning of year	\$ 549,935	\$ —	\$ —
Additions to capitalized costs	485,725	549,935	—
Exchange adjustment	(52,112)	—	—
Balance end of year	<u>\$ 983,548</u>	<u>\$ 549,935</u>	<u>\$ —</u>
Nockatunga			
Balance beginning of year	\$ —	\$ 7,431,514	\$ —
Additions to capitalized costs	—	—	7,431,514
Reclassified to producing properties	—	(7,431,514)	—
Exchange adjustment	—	—	—
Balance end of year	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 7,431,514</u>
Exploration permits and licenses – Australia and U.K. (3)			
Balance beginning of year	\$4,425,749	\$ 4,431,347	\$ 5,323,347
Charged to expense	(321,258)	(5,598)	(892,000)
Balance end of year	<u>\$4,104,491</u>	<u>\$ 4,425,749</u>	<u>\$ 4,431,347</u>
Total			
Balance beginning of year	\$6,830,870	\$13,478,804	\$ 6,493,387
Additions to capitalized costs	485,725	562,681	7,696,006
Reclassified to producing properties	—	(7,431,514)	—
Charged to expense (3)	(321,258)	(5,598)	(892,000)
Exchange adjustment	(354,460)	226,497	181,411
Balance end of year	<u>\$6,640,877</u>	<u>\$ 6,830,870</u>	<u>\$13,478,804</u>

- (1) These costs were capitalized during the year ended June 30, 2006 and remain capitalized because the related well has sufficient quantity of reserves to justify its completion as a producing well. Efforts are currently being made to market the gas from this well. The operator intends to apply for a petroleum retention license with the objective of obtaining a petroleum production license by the end of calendar year 2009. The intention is to commence gas production and sales in January 2010.
- (2) Capitalized exploratory well costs pending the start of production.
- (3) The Company evaluates exploration permits and licenses annually or whenever events or changes in circumstances indicate that the carrying value, related to step up to fair value for the 44.87% remaining interest acquired in 2006, may be impaired. See discussion under Goodwill below for valuation methodology of the exploration permits and licenses. An impairment loss of \$63,740 was recorded during the fiscal year. In addition, the Company did not renew certain permits resulting in a write off of \$257,518. These amounts are recorded in exploration and dry hole costs.

Table of Contents

Goodwill

All of our goodwill is related to the fiscal 2006 acquisition of the 44.87% of MPAL that we did not own at the time. In accordance with Statement of Financial Accounting Standards No. 142, Goodwill and Other Intangible Assets, goodwill is not amortized and is tested for impairment annually or whenever events or changes in circumstances indicate that the carrying value may be impaired. We performed our annual impairment testing as of June 30, 2009 and determined that no impairment existed as of that date.

We employ the adjusted balance sheet method to estimate the fair value of MPAL. This method entails estimating the fair value of all of MPAL's balance sheet items as of the valuation date. If the adjusted equity value, after considering the fair values of the assets and liabilities, is greater than the carrying value of MPAL, then no impairment is indicated. Management believes that this methodology is most meaningful since the highest and best use of these assets would be to continue to hold and exploit the assets over time.

The fair value of our oil and gas properties are estimated based on the discounted cash flows of our proved and risk adjusted probable and possible reserves.

The significant assumptions used in estimating the fair values of the oil and gas properties are oil and gas selling prices for non-contracted volumes, oil and gas sales volumes, discount rates, and production trends. The fair value of MPAL is most susceptible to changes in selling prices of oil and gas and changes in estimated sales volume. As an example, a 10% decrease in the selling price or sales volume of oil and gas for the non-contracted volumes would reduce the estimated fair value of MPAL by approximately \$3.3 million.

The fair value of our nondepletable exploration permits and licenses is estimated separately using one of four methods – discounted cash flows, discounted cash flows adjusted for chances of success, recent farmin costs and premiums, and estimated costs of committed work programs. The majority of the permits and licenses are valued based on the estimated cost of agreed work program commitments, which is a methodology that is not dependent on significant assumptions.

Asset Retirement Obligations

Statement of Financial Accounting Standards No. 143, "Accounting for Asset Retirement Obligations" requires legal obligations associated with the retirement of long-lived assets to be recognized at their fair value at the time that the obligations are incurred. Upon initial recognition of a liability, that cost is capitalized as part of the related long-lived asset (oil & gas properties) and amortized on a units-of-production basis over the life of the related reserves. Accretion expense in connection with the discounted liability is recognized over the remaining life of the related reserves.

The estimated liability is based on the future estimated cost of land reclamation, plugging the existing oil and gas wells and removing the surface facilities equipment in our operating fields. The liability is a discounted liability using a credit-adjusted risk-free rate on the date such liabilities are determined. Revisions to the liability could occur due to changes in the estimates or timing of these costs, acquisition of additional properties and as new wells are drilled.

Estimates of future asset retirement obligations include significant management judgment and are based on projected future retirement costs. Judgments are based upon such things as field life and estimated costs. Such costs could differ significantly when they are incurred.

Revenue Recognition

The Company recognizes oil and gas revenue (net of royalties) from its interests in producing wells as oil and gas is produced and sold from those wells. Revenues from the purchase, sale and transportation of natural

Table of Contents

gas are recognized upon completion of the sale and when transported volumes are delivered. Other production related revenues are primarily MPAL's share of gas pipeline tariff revenues which are recorded at the time of sale. The Company records pipeline tariff revenues on a gross basis with the revenue included in other production related revenues and the remittance of such tariffs are included in production costs. Government sales taxes related to MPAL's oil and gas production revenues are collected by MPAL and remitted to the Australian government. Such amounts are excluded from revenue and expenses. Shipping and handling costs in connection with such deliveries are included in production costs except for Nockatunga crude oil transportation costs which are deducted from gross sales. Revenue under carried interest agreements is recorded in the period when the net proceeds become receivable, measurable and collection is reasonably assured. The time when the net revenues become receivable and collection is reasonably assured depends on the terms and conditions of the relevant agreements and the practices followed by the operator. As a result, net revenues may lag the production month by one or more months.

Liquidity and Capital Resources

At June 30, 2009, the Company on a consolidated basis had approximately \$34.7 million of cash and cash equivalents and \$1.0 million in marketable securities. The Company considers cash equivalents to be short term, highly liquid investments that are both readily convertible to known amounts of cash and so near their maturity that they present insignificant risk of changes in value because of change in interest rates. Cash balances were \$13.3 million as of June 30, 2009 and the remaining \$21.4 million was held in time deposit accounts in several Australian banks that have terms of 90 days or less. National Australia Bank, Ltd. ("NAB") holds 55% of the cash and cash equivalent balance. Although the funds are uninsured, Standard and Poor's credit rating of NAB is AA Stable long-term and A-1+ short-term.

Consolidated

When considering our liquidity and capital resources, we consider cash and cash equivalents and marketable securities together since all of these amounts are available to fund operating, exploration and development activities. The balance of cash and cash equivalents and marketable securities decreased \$637,000 during the year ended June 30, 2009 compared to a \$3.5 million increase in those balances during the year ended June 30, 2008. The factors favorably impacting our liquidity and capital resources during the year ended June 30, 2009 included a decrease in tax payments of \$12.2 million offset by a net decrease in collections of \$8.8 million. We also experienced a \$1.4 million decrease in cash expenditures on exploration and development and a \$1.8 million decrease in property and equipment expenditures offset by a \$0.6 million investment in securities available for sale. Our cash position was also unfavorably affected by a \$10.2 million decrease in foreign exchange transaction gains resulting from a weakened Australian dollar.

The decrease in cash from the sales of oil and gas was due to decreased sales of \$12.7 million offset by a decrease in accounts receivable of \$3.9 million. Sales decreases were mostly due to a 27% decrease in barrels sold, attributable essentially to a 48,000 barrel decrease in the Nockatunga project resulting from a downward production trend. The decrease in accounts receivable resulted from the collection in 2009 of 2008 revenues for which the due date had been extended.

The Company invested \$2.9 million and \$6.1 million in oil and gas exploration activities, which includes additions to property and equipment, during the fiscal years ended June 30, 2009 and 2008, respectively. The decrease was due to reduced drilling activities in 2009.

MPAL's current contracts for the sale of Palm Valley gas will expire during fiscal years 2012. Mereenie contracts expired in January and June 2009. Supply obligations ceased in June 2009, however, there is a reasonable endeavor obligation to supply certain of PWC's requirements through to December 31, 2010, unless amended or extended. Unless MPAL is able to sell uncontracted gas, including reasonable endeavors gas not taken by PWC or be successful in its current exploration program, its revenues will begin to decline substantially

Table of Contents

in 2010 which would materially affect liquidity. The price of gas under the Palm Valley and Mereenie gas contracts is adjusted quarterly to reflect changes in the Australian Consumer Price Index. For further information, see “Gas Supply Contracts” in Item 1-Business above. MPAL’s oil sales are dependent on world oil prices. The volatility of these prices will affect future oil revenues. The Company will align operating expenses with any reductions in revenues.

As to MPC (Unconsolidated)

In December, 2008, a dividend of \$3.0 million was received from MPAL to fund operating costs. Also in June, 2009, MPAL loaned approximately \$1.9 million to MPC.

On July 9, 2009, the Company completed, pursuant to the terms of a definitive purchase agreement and related amendments an equity investment in the Company by the Company’s strategic investor, Young Energy Prize S.A. through the issuance to YEP of 8,695,652 shares of the Company’s common stock, \$0.01 par value per share and warrants to acquire an additional 4,347,826 shares of Common Stock. The Company received gross proceeds of \$10 million, which will be used for working capital and general corporate purposes.

At June 30, 2009, MPC, on an unconsolidated basis, had working capital of \$800,054. Working capital is comprised of current assets less current liabilities. MPC’s current cash position and any future MPAL dividends should be adequate to meet MPC’s current and future cash requirements.

MPC has a stock repurchase plan to purchase up to one million shares of its common stock in the open market. Through June 30, 2009, MPC purchased 680,850 of its shares at a cost of approximately \$686,000. There were no shares purchased during fiscal years 2009, 2008 or 2007.

As to MPAL

At June 30, 2009, MPAL had working capital of \$36,360,451. MPAL had budgeted approximately (Aus) \$6.0 million for specific exploration projects in fiscal year 2009 as compared to the (Aus) \$4.7 million expensed during fiscal 2009. During the year, there was less money spent than budgeted in the United Kingdom. The current composition of MPAL’s oil and gas reserves are such that MPAL’s future revenues in the long-term are expected to be derived from the sale of oil and gas in Australia. MPAL’s current contracts for the sale of Palm Valley gas will expire during fiscal years 2012. Mereenie contracts expired in January and June 2009. Supply obligations ceased in June 2009, however, there is a reasonable endeavor obligation to supply certain of PWC’s requirements through to December 31, 2010, unless amended or extended. Unless MPAL is able to sell uncontracted gas, including reasonable endeavors gas not taken by PWC or be successful in its current exploration program, its revenues will begin to decline substantially in 2010 which could materially affect liquidity. The price of gas under the Palm Valley and Mereenie gas contracts is adjusted quarterly to reflect changes in the Australian Consumer Price Index. For further information, see “Gas Supply Contracts” in Item 1-Business above. MPAL’s oil sales are dependent on world oil prices. The volatility of these prices will affect future oil revenues. The Company will align operating expenses with any reductions in revenues.

As in the past, MPAL expects to fund its exploration costs through its cash and cash equivalents and cash flow from Australian operations. MPAL also expects that it will continue to seek partners to share its exploration costs. If MPAL’s efforts to find partners are unsuccessful, it may be unable or unwilling to complete the exploration program for some of its properties.

Off Balance Sheet Arrangements

The Company does not use off-balance sheet arrangements such as securitization of receivables with any unconsolidated entities or other parties. The Company is exposed to oil and gas market price volatility and uses fixed pricing contracts with inflation clauses to mitigate this exposure.

[Table of Contents](#)

Contractual Obligations

The following is a summary of our consolidated contractual obligations as of June 30, 2009, in thousands:

<u>Contractual Obligations</u>	<u>Payments Due by Period</u>				
	<u>Total</u>	<u>Less Than 1 Year</u>	<u>1-3 Years</u>	<u>3-5 Years</u>	<u>More Than 5 Years</u>
Operating Lease Obligations	\$ 821	\$ 263	\$ 558	\$ —	\$ —
Purchase Obligations (1)	6,469	6,469	—	—	—
Asset Retirement Obligations – Undiscounted (2)	14,470	202	2,446	8,397	3,425
Total	<u>\$21,760</u>	<u>\$ 6,934</u>	<u>\$ 3,004</u>	<u>\$ 8,397</u>	<u>\$ 3,425</u>

- (1) Represents firm commitments for exploration and capital expenditures. The Company is committed to these expenditures, however some may be farmed out to third parties. Exploration contingent expenditures of \$41,541,000 which are not legally binding have been excluded from the table above and based on exploration decisions would be due as follows: \$0 (less than 1 year), \$20,971,000 (1-3 years), \$18,409,000 (3-5 years) and \$2,161,000 (greater than 5 years).
- (2) During the year ended June 30, 2009, the Company decreased total asset retirement obligations by \$626,000 due to changes in cost estimates and expected restoration dates (see Note 4 to the Financial Statements).

Recent Accounting Pronouncements

On December 31, 2008, the SEC published the final rules and interpretations updating its oil and gas reporting requirements. Many of the revisions are updates to definitions in the existing oil and gas rules to make them consistent with the petroleum resource management system, which is a widely accepted standard for the management of petroleum resources that was developed by several industry organizations. Key revisions include changes to the pricing used to estimate reserves, the ability to include nontraditional resources in reserves, the use of new technology for determining reserves, and permitting disclosure of probable and possible reserves. The SEC will require companies to comply with the amended disclosure requirements for annual reports for fiscal years ending on or after December 15, 2009. This guidance is effective for the Company for the fiscal year ended June 30, 2010. The SEC will also require companies to comply with the amended disclosure requirements for registration statements filed after January 1, 2010. Early adoption is not permitted. The Company is currently assessing the impact that the adoption will have on the Company's disclosures, operating results, financial position and cash flows.

In February 2008, the FASB issued FSP FAS 157-2, "Effective Date of FASB Statement No. 157". This FSP delays the effective date of FASB Statement No. 157, "Fair Value Measurements", for nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually), including asset retirement obligations and goodwill and other impairment analyses. This guidance is effective for the Company for the fiscal year ended June 30, 2010. The Company is currently evaluating the impact of adoption of this FSP.

[Table of Contents](#)

Results of Operations

2009 vs. 2008

REVENUES

Changes in revenues are as follows:

	Twelve Months ended June 30,		\$ Variance	% Variance
	2009	2008		
Oil sales	\$11,479,660	\$19,786,175	\$(8,306,515)	(42%)
Gas sales	14,740,296	18,523,095	(3,782,799)	(20%)
Other production related revenues	1,970,621	2,585,540	(614,919)	(24%)
Interest income	1,583,065	2,122,642	(539,577)	(25%)

Significant changes are discussed below.

OIL SALES DECREASED due to a 27% decrease in production, an 11% decrease in average price per barrel and the 17% decrease in the average exchange rate discussed below. Oil unit sales (after deducting royalties) in barrels (bbls) and the average price per barrel sold during the periods indicated were as follows:

	TWELVE MONTHS ENDED JUNE 30,				% Variance BBLS	% Variance A.S PER BBL
	2009 SALES		2008 SALES			
	BBLS	AVERAGE PRICE A.S PER BBL	BBLS	AVERAGE PRICE A.S PER BBL		
Australia:						
Mereenie field	90,267	94.20	95,429	113.33	(5%)	(17%)
Cooper Basin	2,362	101.42	6,826	114.28	(65%)	(11%)
Nockatunga project (1)	60,668	86.30	108,311	91.82	(44%)	(6%)
Total	153,297	91.21	210,566	102.35	(27%)	(11%)

(1) Nockatunga average price per bbl is net of crude oil transportation costs which are deducted from the gross sales price.

Amounts presented above for oil prices and below for gas prices are in Australian dollars to show a more meaningful trend of underlying operations. For the fiscal years ended June 30, 2009 and 2008, the average foreign exchange rates were .7471 and .8965 respectively.

GAS SALES DECREASED due to a 10% decrease in volume resulting from natural field decline and the 17% decrease in the average exchange rate discussed below partially offset by a 4% increase in the average price per mcf. The volumes in billion cubic feet (bcf) (after deducting royalties) and the average price of gas per thousand cubic feet (mcf) sold during the periods indicated were as follows:

	TWELVE MONTHS ENDED JUNE 30,				% Variance BCF	% Variance A.S PER MCF
	2009 SALES		2008 SALES			
	BCF	AVERAGE PRICE A.S PER MCF	BCF	AVERAGE PRICE A.S PER MCF		
Australia: Palm Valley	1.165	2.25	1.319	2.22	(12%)	1%
Australia: Mereenie	3.996	3.93	4.388	3.77	(9%)	4%
Total	5.161	3.54	5.707	3.39	(10%)	4%

Table of Contents

MPAL's current contracts for the sale of Palm Valley gas will expire during fiscal years 2012. Mereenie contracts expired in January and June 2009. Supply obligations ceased in June 2009, however, there is a reasonable endeavor obligation to supply certain of PWC's requirements through to December 31, 2010, unless amended or extended. Unless MPAL is able to sell uncontracted gas, including reasonable endeavors gas not taken by PWC, its revenues will begin to decline substantially in 2010. For further information, see "Gas Supply Contracts" in Item 1-Business and Item 7-Executive Summary above.

OTHER PRODUCTION RELATED REVENUES are primarily MPAL's share of gas pipeline tariff revenues which decreased as a result of a decrease in volumes of gas sold at Mereenie and the 17% Australian foreign exchange rate decrease discussed below.

INTEREST INCOME DECREASED due to a decrease in market interest rates and the 17% decrease in the average exchange rate discussed below.

COSTS AND EXPENSES

Changes in costs and expenses are as follows:

	Twelve Months Ended June 30,		\$ Variance	% Variance
	2009	2008		
Production cost	8,153,263	8,865,663	(712,400)	(8%)
Exploration and dry hole costs	3,475,937	3,318,810	157,127	5%
Salaries and employee benefits	1,708,997	1,605,341	103,656	6%
Depletion, depreciation and amortization	6,785,952	18,021,236	(11,235,284)	(62%)
Auditing, accounting and legal services	1,576,509	1,102,115	474,394	43%
Accretion expense	531,405	716,130	(184,725)	(26%)
Shareholder communications	633,112	392,880	240,232	61%
Loss (gain) on sale of field equipment	12,072	(35,235)	47,307	(134%)
Impairment loss	63,740	—	63,740	—
Other administrative expenses	3,969,658	3,591,856	377,802	11%
Income tax provision	2,198,422	14,330,301	(12,131,879)	(85%)

Significant changes are discussed below.

PRODUCTION COSTS DECREASED due to the 17% decrease in the average exchange rate described below offset by increased labor and rental costs in the Nockatunga project (\$438,000).

EXPLORATION AND DRY HOLE COSTS INCREASED due to seismic survey costs related to the Nockatunga fields (\$1.4 million) and the write off of certain U.K. permits in 2009 (\$296,000) offset by Cooper Basin drilling costs incurred in 2008 but not in 2009 (\$1.3 million) and the 17% decrease in the average exchange rate described below.

DEPLETION, DEPRECIATION AND AMORTIZATION DECREASED due to lower depletable costs and the 17% decrease in the average exchange rate described below. Lower depletable costs result from recent depletion charges in excess of recent capital spending.

AUDITING, ACCOUNTING AND LEGAL SERVICES INCREASED due mostly to legal fees related to the YEP investment transaction and the shareholder agreement of approximately \$574,000 (See Note 15 to the Financial Statements) partially offset by the 17% decrease in the average exchange rate described below.

ACCRETION EXPENSE DECREASED due mostly because of a reduction of the Mereenie asset retirement obligations ("ARO") in the first quarter of fiscal 2009 (\$995,000) and the 17% decrease in the exchange rate described below.

[Table of Contents](#)

SHAREHOLDER COMMUNICATION COSTS INCREASED due to an increase in proxy and regulatory filing activity. The increased proxy activity was due to a threatened director election and additional voting matters which required stockholder approval, including the YEP investment transaction.

OTHER ADMINISTRATIVE EXPENSES INCREASED due to net exchange rate losses (\$461,000), increased travel costs (\$125,000), increased repair and maintenance costs (\$138,000) and increased due diligences costs related to the YEP investment transaction (\$393,000—see Note 15 to the Financial Statements) offset by a decrease in costs related to the ATO settlement (\$597,000) that were incurred in 2008 but not in 2009, decrease in insurance expense in 2009 (\$247,000) and the 17% decrease in the average exchange rate described below.

INCOME TAXES

INCOME TAX PROVISION DECREASED due to the decrease in income before taxes as well as the provision of the ATO settlement in the prior fiscal period (see Note 6 to the Financial Statements for a discussion of effective tax rates used and the ATO settlement).

EXCHANGE EFFECT

The value of the Australian dollar relative to the U.S. dollar decreased to \$.8048 at June 30, 2009 compared to \$.9615 at June 30, 2008. This resulted in a \$9,931,978 debit to accumulated translation adjustments for fiscal 2009. The 16% decrease in the value of the Australian dollar decreased the reported asset and liability amounts in the balance sheet at June 30, 2009 from the June 30, 2008 amounts. The annual average exchange rate used to translate MPAL's operations in Australia for fiscal 2009 was \$.7471, which is a 17% decrease compared to the \$.8965 rate for fiscal 2008.

2008 vs. 2007

REVENUES

Changes in revenues are as follows:

	Twelve Months ended		<u>\$ Variance</u>	<u>% Variance</u>
	<u>2008</u>	<u>2007</u>		
Oil sales	\$19,786,175	\$11,922,574	\$7,863,601	66%
Gas sales	18,523,095	16,396,334	2,126,761	13%
Other production related revenues	2,585,540	2,356,317	229,223	10%
Interest income	2,122,642	1,669,798	452,844	27%

Significant changes are discussed below.

Table of Contents

OIL SALES INCREASED because of a 17% increase in barrels sold due mostly to the Nockatunga Project, a 27% increase in the average sales price per barrel and the 14% Australian foreign exchange rate increase discussed below. Oil unit sales (net of royalties) in barrels (bbls) and the average price per barrel sold during the periods indicated were as follows:

	TWELVE MONTHS ENDED JUNE 30,					
	2008 SALES		2007 SALES		% Variance	% Variance
	BBLs	AVERAGE PRICE A.\$ PER BBL	BBLs	AVERAGE PRICE A.\$ PER BBL		
Australia:						
Mereenie field	95,429	113.33	100,852	82.75	(5%)	37%
Cooper Basin	6,826	114.28	15,261	85.02	(55%)	34%
Nockatunga project (1)	<u>108,311</u>	91.82	<u>63,252</u>	76.50	71%	20%
Total	<u>210,566</u>	102.35	<u>179,365</u>	80.75	17%	27%

(1) Nockatunga average price per bbl is net of crude oil transportation costs which are deducted from the gross sales price.

Amounts presented above for oil prices and below for gas prices are in Australian dollars to show a more meaningful trend of underlying operations. For the fiscal years ended June 30, 2008 and 2007, the average foreign exchange rates were .8965 and .7860 respectively.

GAS SALES INCREASED primarily as the result of a 5% increase in price per mcf sold and the 14% Australian foreign exchange rate increase discussed below, offset by a 5% decrease in sales volume.

The volumes in billion cubic feet (bcf) (net of royalties) and the average price of gas per thousand cubic feet (mcf) sold during the periods indicated were as follows:

	TWELVE MONTHS ENDED JUNE 30,					
	2008 SALES		2007 SALES		% Variance	% Variance
	BCF	AVERAGE PRICE A.\$ PER MCF	BCF	AVERAGE PRICE A.\$ PER MCF		
Australia: Palm Valley	1.319	2.22	1.499	2.20	(12%)	1%
Australia: Mereenie	<u>4.388</u>	3.77	<u>4.489</u>	3.60	(2%)	5%
Total	<u>5.707</u>	3.39	<u>5.988</u>	3.24	(5%)	5%

MPAL's current contracts for the sale of Palm Valley and Mereenie gas will expire during fiscal years 2012 and 2009, respectively. Unless MPAL is able to obtain additional contracts for its remaining gas reserves or be successful in its current exploration program, its revenues will be materially reduced after 2009. Mereenie gas sales were approximately \$15.5 million (net of royalties) or 85% of total gas sales for the year ended June 30, 2008. See discussion in "Gas Supply Contracts" under Item 1 and Executive Summary above.

OTHER PRODUCTION RELATED REVENUES are primarily MPAL's share of gas pipeline tariff revenues which increased as a result of the 14% Australian foreign exchange rate increase discussed below offset by a decrease in volumes of gas sold at Mereenie.

COSTS AND EXPENSES

Changes in costs and expenses are as follows:

	Twelve Months Ended		\$ Variance	% Variance
	June 30,			
	2008	2007		
Production cost	8,865,663	6,965,641	1,900,022	27%
Exploration and dry hole costs	3,318,810	5,520,460	(2,201,650)	(40%)
Salaries and employee benefits	1,605,341	1,549,277	56,064	4%
Depletion, depreciation and amortization	18,021,236	10,693,415	7,327,821	69%
Auditing, accounting and legal services	1,102,115	628,114	474,001	75%
Accretion expense	716,130	517,856	198,274	38%
Shareholder communications	392,880	459,298	(66,418)	(14%)
Gain on sale of field equipment	(35,235)	(10,346)	(24,889)	241%
Impairment loss	—	1,876,171	(1,876,171)	(100%)
Other administrative expenses	3,591,856	2,699,733	892,123	33%
Income tax provision	14,330,301	998,565	13,331,736	1335%

Significant changes are discussed below.

PRODUCTION COSTS INCREASED primarily as the result of increased expenditures in the Nockatunga project due to increased production, an increase in field equipment repairs in the Mereenie project and the 14% increase in the exchange rate described below.

EXPLORATION AND DRY HOLE COSTS DECREASED due primarily to decreased drilling costs related to the Cooper Basin drilling program, partially offset by the 14% increase in the exchange rate described below.

DEPLETION, DEPRECIATION AND AMORTIZATION INCREASED as a result of the higher book values of MPAL's oil and gas properties acquired during fiscal 2006 resulting from an updated valuation at June 30, 2007, increased depletion in the Nockatunga project due to increased production resulting from the 10 wells drilled in the fourth quarter of fiscal 2007, increased expenditures and the 14% increase in the exchange rate described below, partially offset by lower depletion in the Mereenie and Palm Valley and Cooper Basin projects due to lower depletable costs.

AUDITING, ACCOUNTING AND LEGAL SERVICES INCREASED due to higher auditing, accounting and legal costs incurred in connection with the ATO audit and settlement and tax planning.

ACCRETION EXPENSE INCREASED due mostly to accretion of asset retirement obligations relating to the new wells drilled in fiscal 2007 in the Nockatunga project and the 14% increase in the exchange rate described below. Accretion expense represents the accretion on the asset retirement obligations ("ARO") under SFAS 143.

IMPAIRMENT LOSS DECREASED because a non-cash impairment loss of \$1,876,171 was recorded in 2007 relating to the decreased value of the Kiana field in the Cooper Basin (\$984,171) and the decreased value of exploration permits and licenses included in oil and gas properties (\$892,000). The net book value of the Kiana oil and gas property was written down to its future estimated discounted cash flow. No impairment loss was recorded in fiscal 2008.

OTHER ADMINISTRATIVE EXPENSES INCREASED due mostly to increased consulting costs related to the ATO audit and settlement, an increase due to the issuance of directors' stock options in February, 2008, increased consulting fees relating to research and development in the U.K. and the 14% increase in the exchange rate described below.

INCOME TAXES

INCOME TAX PROVISION INCREASED primarily due to the payment of tax assessed by the Australian Taxation Office (see Note 6 to the Consolidated Financial Statements) upon settlement of an audit of the Australian income tax returns of MPAL and its wholly owned subsidiaries for the years 1997- 2005.

EXCHANGE EFFECT

The value of the Australian dollar relative to the U.S. dollar increased to \$.9615 at June 30, 2008 compared to \$.8433 at June 30, 2007. This resulted in a \$7,317,151 credit to accumulated translation adjustments for fiscal 2008. The 14% increase in the value of the Australian dollar increased the reported asset and liability amounts in the balance sheet at June 30, 2008 from the June 30, 2007 amounts. The annual average exchange rate used to translate MPAL's operations in Australia for fiscal 2008 was \$.8965, which is a 14% increase compared to the \$.7860 rate for fiscal 2007.

Item 7A. *Quantitative and Qualitative Disclosure About Market Risk.*

The Company does not have any significant exposure to market risk, other than as previously discussed in Item 1A-Risk Factors regarding foreign currency risk and the risk of fluctuations in the world price of crude oil, as the only market risk sensitive instruments are its investments in marketable securities (including held-to-maturity and available-for-sale securities). At June 30, 2009, the carrying value of such investments and those classified as cash and cash equivalents was approximately \$36.6 million, which approximates the fair value of the securities. Since the Company expects to hold the investments to maturity, the maturity value should be realized. Marketable securities have not been impacted by the U.S. credit crisis. A 10% change in the Australian foreign currency rate compared to the U.S. dollar would increase or decrease revenues and costs and expenses by \$2.8 million and \$2.7 million, respectively. For the twelve months ended June 30, 2009, oil sales represented approximately 44% of oil and gas sales. Based on 2009 sales volume and revenue, a 10% change in oil price would increase or decrease oil revenues by approximately \$1.1 million. Gas sales, which represented approximately 56% of production revenues in 2009, are derived primarily from the Palm Valley and Mereenie fields in the Northern Territory of Australia and the gas prices are set according to long term contracts that are subject to changes in the Australian Consumer Price Index.

Item 8. *Financial Statements and Supplementary Data.*

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Magellan Petroleum Corporation
Hartford, Connecticut

We have audited the accompanying consolidated balance sheets of Magellan Petroleum Corporation and subsidiaries (the “Company”) as of June 30, 2009 and 2008, and the related consolidated statements of operations, stockholders’ equity, and cash flows for each of the three years in the period ended June 30, 2009. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Magellan Petroleum Corporation and subsidiaries as of June 30, 2009 and 2008, and the results of their operations and cash flows for each of the three years in the period ended June 30, 2009, in conformity with accounting principles generally accepted in the United States of America.

/s/ DELOITTE & TOUCHE LLP

Asset retirement obligation liabilities incurred	—	—	718,048
Accounts payable related to property and equipment	163,457	1,993,964	3,195,633

The allocation of the purchase price to the assets acquired in the purchase of the remaining minority interest in MPAL in 2006 was finalized in the fourth quarter of fiscal 2007. This resulted in a decrease in the amount of goodwill by \$1,626,041 which was reallocated to oil and gas properties (\$4,642,233) offset by an increase to deferred tax liabilities (\$3,016,192).

See accompanying notes.

[Table of Contents](#)

1. Summary of Significant Accounting Policies

Principles of Consolidation

Magellan Petroleum Corporation (“MPC” or “Magellan”) is engaged in the sale of oil and gas and the exploration for and development of oil and gas reserves. At June 30, 2009 and 2008, MPC’s principal asset was a 100% equity interest in its subsidiary, Magellan Petroleum Australia Limited (“MPAL”). MPAL’s major assets are two petroleum production leases covering the Mereenie oil and gas field (35% working interest), one petroleum production lease covering the Palm Valley gas field (52% working interest), and five petroleum production leases covering the Nockatunga oil field (41% working interest). Both the Mereenie and Palm Valley fields are located in the Amadeus Basin in the Northern Territory of Australia. The Nockatunga field is located in the Cooper Basin in South Australia. MPC has a direct 2.67% carried interest in the Kotaneelee gas field in the Yukon Territory of Canada.

The accompanying consolidated financial statements include the accounts of MPC and its subsidiary, MPAL, (collectively the “Company”). All intercompany transactions have been eliminated.

Revenue Recognition

The Company recognizes oil and gas revenue (net of royalties) from its interests in producing wells as oil and gas is produced and sold from those wells. Revenues from the sale and transportation of natural gas are recognized upon completion of the sale and when transported volumes are delivered. Other production related revenues are primarily MPAL’s share of gas pipeline tariff revenues which are recorded at the time of sale. The Company records pipeline tariff revenues on a gross basis with the revenue included in other production related revenues and the remittance of such tariffs are included in production costs. Government sales taxes related to MPAL’s oil and gas production revenues are collected by MPAL and remitted to the Australian government. Such amounts are excluded from revenue and expenses. Shipping and handling costs in connection with such deliveries are included in production costs except for Nockatunga crude oil transportation costs which are deducted from gross sales. Revenue under carried interest agreements is recorded in the period when the net proceeds become receivable, measurable and collection is reasonably assured. The time when the net revenues become receivable and collection is reasonably assured depends on the terms and conditions of the relevant agreements and the practices followed by the operator. As a result, net revenues may lag the production month by one or more months.

Stock-Based Compensation

The Company has one stock option plan which was amended on May 27, 2009 to, among other things, increase the aggregate number of shares issuable under the plan to 5,205,000. Under FASB Statement of Financial Accounting Standards No. 123(R), “Share-Based Payment” (“SFAS 123(R)”) the costs resulting from all share-based payment transactions are recognized in the consolidated financial statements. This statement establishes fair value as the measurement objective in accounting for share-based payment arrangements and requires the application of a fair-value measurement method of accounting for share-based payment transactions with employees and non-employees. The Company uses the Black-Scholes option valuation model to determine the fair value of its time based stock option share awards and the Monte Carlo model for performance based options share awards that include a market condition as described in SFAS 123(R). These models include various assumptions, including the expected volatility and the expected life of the share awards as well as significant assumptions for performance based awards that include probabilities of certain vesting conditions and behaviors impacting exercise. These assumptions, as detailed in Note 5-Capital and Stock Options, reflect the Company’s best estimates, but they involve inherent uncertainties based on market conditions generally outside of the control of the Company. As a result, if other assumptions had been used, stock-based compensation expense, as calculated and recorded under SFAS 123(R) could have been significantly impacted. Furthermore, if the Company uses different assumptions in future periods, stock-based compensation expense could be significantly impacted in future periods. The Company’s policy for attributing the value of graded vested share-based payments is an accelerated multiple-option approach.

[Table of Contents](#)

Oil and Gas Properties

The Company follows the successful efforts method of accounting for its oil and gas operations. Under this method, the costs of successful wells, development dry holes, productive leases, and permit and concession costs are capitalized and amortized on a units-of-production basis over the life of the related reserves. Cost centers for amortization purposes are determined on a field-by-field basis. The Company records its proportionate share in joint venture operations in the respective classifications of assets, liabilities and expenses. Unproved properties with significant acquisition costs are periodically assessed for impairment in value, with any impairment charged to expense. The successful efforts method also imposes limitations on the carrying or book value of proved oil and gas properties. Oil and gas properties are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amounts may not be recoverable. The Company estimates the future undiscounted cash flows from the affected properties to determine the recoverability of carrying amounts. In general, analyses are based on proved developed reserves, except in circumstances where it is probable that additional resources will be developed and contribute to cash flows in the future. For Mereenie, proved developed natural gas reserves are limited to contracted quantities. For Palm Valley, reserves were based upon the quantities of gas committed to the contract and estimated sales subsequent to the contract date. If such contracts are extended, the proved developed reserves will be increased to the lesser of the actual proved developed reserves and risk adjusted probable and possible reserves or the contracted quantities.

Exploratory drilling costs are initially capitalized pending determination of proved reserves but are charged to expense if no proved reserves are found. Other exploration costs, including geological and geophysical expenses, leasehold expiration costs and delay rentals, are expensed as incurred. Because the Company follows the successful efforts method of accounting, the results of operations may vary materially from quarter to quarter. An active exploration program may result in greater exploration and dry hole costs.

Table of Contents

Nondepletable assets

At June 30, 2009 and 2008, oil and gas properties include \$6.6 million and \$6.8 million, respectively, of capitalized costs that are currently not being depleted. Components of these costs are as follows:

Nondepletable capitalized costs	For the year ended June 30,		
	2009	2008	2007
PEL 106 – Cooper Basin (1)			
Balance beginning of year	\$1,855,186	\$ 1,615,943	\$ 1,170,040
Additions to capitalized costs	—	12,746	264,492
Exchange adjustment	(302,348)	226,497	181,411
Balance end of year	<u>\$1,552,838</u>	<u>\$ 1,855,186</u>	<u>\$ 1,615,943</u>
Weald/Wessex Basin U.K. (2)			
Balance beginning of year	\$ 549,935	\$ —	\$ —
Additions to capitalized costs	485,725	549,935	—
Exchange adjustment	(52,112)	—	—
Balance end of year	<u>\$ 983,548</u>	<u>\$ 549,935</u>	<u>\$ —</u>
Nockatunga			
Balance beginning of year	\$ —	\$ 7,431,514	\$ —
Additions to capitalized costs	—	—	7,431,514
Reclassified to producing properties	—	(7,431,514)	—
Exchange adjustment	—	—	—
Balance end of year	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 7,431,514</u>
Exploration permits and licenses – Australia and U.K. (3)			
Balance beginning of year	\$4,425,749	\$ 4,431,347	\$ 5,323,347
Charged to expense	(321,258)	(5,598)	(892,000)
Balance end of year	<u>\$4,104,491</u>	<u>\$ 4,425,749</u>	<u>\$ 4,431,347</u>
Total			
Balance beginning of year	\$6,830,870	\$13,478,804	\$ 6,493,387
Additions to capitalized costs	485,725	562,681	7,696,006
Reclassified to producing properties	—	(7,431,514)	—
Charged to expense (3)	(321,258)	(5,598)	(892,000)
Exchange adjustment	(354,460)	226,497	181,411
Balance end of year	<u>\$6,640,877</u>	<u>\$ 6,830,870</u>	<u>\$13,478,804</u>

- (1) These costs were capitalized during the year ended June 30, 2006 and remain capitalized because the related well has sufficient quantity of reserves to justify its completion as a producing well.
- (2) Capitalized exploratory well costs pending the start of production.
- (3) The Company evaluates exploration permits and licenses annually or whenever events or changes in circumstances indicate that the carrying value, related to step up to fair value for the 44.87% remaining interest acquired in 2006, may be impaired. See discussion under Goodwill below for valuation methodology of the exploration permits and licenses. An impairment loss of \$63,740 was recorded during the fiscal year. In addition, the Company did not renew certain permits resulting in a write off of \$257,518. These amounts are recorded in exploration and dry hole costs.

Goodwill

The aggregate amount of goodwill at June 30, 2009 and 2008 is \$4,020,706. All of our goodwill is related to the fiscal 2006 acquisition of the 44.87% of MPAL that we did not own at the time. In accordance with

Table of Contents

Statement of Financial Accounting Standards No. 142, Goodwill and Other Intangible Assets, goodwill is not amortized and is tested for impairment annually or whenever events or changes in circumstances indicate that the carrying value may be impaired. Our annual impairment testing date is June 30. An impairment test was performed as of December 31, 2008 due to the significant decrease in world oil prices and the fact that our stock was trading significantly below our tangible book value. We also performed our annual impairment testing as of June 30, 2009. We determined that no impairment existed at either of those dates.

We employ the adjusted balance sheet method to estimate the fair value of MPAL. This method entails estimating the fair value of all of MPAL's balance sheet items as of the valuation date. If the adjusted equity value, after considering the fair values of the assets and liabilities, is greater than the carrying value of MPAL, then no impairment is indicated. Management believes that this methodology is most meaningful since the highest and best use of these assets would be to continue to hold and exploit the assets over time.

The fair value of our oil and gas properties are estimated based on the discounted cash flows of our proved and risk adjusted probable and possible reserves. The significant assumptions used in estimating the fair values of the oil and gas properties are oil and gas selling prices for non-contracted volumes, oil and gas sales volumes, discount rates, and production trends. The fair value of MPAL is most susceptible to changes in selling prices of oil and gas and changes in estimated sales volume.

The fair value of our nondepletable exploration permits and licenses is estimated separately using one of four methods – discounted cash flows, discounted cash flows adjusted for chances of success, recent farmin costs and premiums, and estimated costs of committed work programs. The majority of the permits and licenses are valued based on the estimated cost of agreed work program commitments, which is a methodology that is not dependent on significant assumptions.

Asset Retirement Obligations

Statement of Financial Accounting Standards No. 143, "Accounting for Asset Retirement Obligations" requires legal obligations associated with the retirement of long-lived assets to be recognized at their fair value at the time that the obligations are incurred. Upon initial recognition of a liability, that cost is capitalized as part of the related long-lived asset (oil and gas properties) and amortized on a units-of-production basis over the life of the related reserves. Accretion expense in connection with the discounted liability is recognized over the remaining life of the related reserves.

The estimated liability is based on the future estimated cost of land reclamation, plugging the existing oil and gas wells and removing the surface facilities equipment in the Palm Valley, Mereenie, and Nockatunga fields and the Cooper Basin. The liability is a discounted liability using a credit-adjusted risk-free rate on the date such liabilities are determined. A market risk premium was excluded from the estimate of asset retirement obligations because the amount was not capable of being estimated. Revisions to the liability could occur due to changes in the estimated life of the field, estimates of these costs, acquisition of additional properties and as new wells are drilled.

Estimates of future asset retirement obligations include significant management judgment and are based on projected future retirement costs. Judgments are based upon such things as field life and estimated costs. Such costs could differ significantly when they are incurred.

Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Table of Contents

Land, Buildings and Equipment and Field Equipment

Land, buildings and equipment and field equipment are carried at cost. Depreciation and amortization are provided on a straight-line basis over their estimated useful lives. The estimated useful lives are: buildings — 40 years, equipment and field equipment — 3 to 15 years.

Inventories

Inventories consist of crude oil in various stages of transit to the point of sale and are valued at the lower of cost (determined on an average cost basis) or market.

Foreign Currency Translations

The accounts of MPAL, whose functional currency is the Australian dollar, are translated into U.S. dollars in accordance with Statement of Financial Accounting Standards No. 52, "Foreign Currency Translation". The translation adjustment is included as a component of stockholders' equity and comprehensive income (loss), whereas gains or losses on foreign currency transactions are included in the determination of income. All assets and liabilities are translated at the rates in effect at the balance sheet dates. Revenues, expenses, gains and losses are translated using quarterly weighted average exchange rates during the period. At June 30, 2009 and 2008, the Australian dollar was equivalent to U.S. \$.8048 and \$.9615, respectively. The annual average exchange rates used to translate MPAL's operations in Australia for the fiscal years 2009, 2008 and 2007 were \$.7471, \$.8965 and \$.7860, respectively.

Accrued Liabilities

At June 30, 2009 and 2008, balances in accrued liabilities which exceeded 5% of current liabilities include \$770,024 and \$953,240 of employment benefits, respectively, and \$350,886 and \$596,975 of withholding and sale taxes, respectively.

Accounting for Income Taxes

The Company follows Statement of Financial Accounting Standards No. 109, "Accounting for Income Taxes" ("SFAS 109"), the liability method in accounting for income taxes. Under this method, deferred tax assets and liabilities are determined based on differences between the financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. The Company records a valuation allowance for deferred tax assets when it is more likely than not that such assets will not be recovered.

Financial Accounting Standards Board Interpretation No. 48, "Accounting for Uncertainty in Income Taxes" ("FIN 48") is an interpretation of SFAS 109 and was adopted by the Company on July 1, 2007. FIN 48 prescribes a comprehensive model for recognizing, measuring, presenting, and disclosing in the financial statements uncertain tax positions that the company has taken or expects to take in its tax returns. Under FIN 48, the Company is able to recognize a tax position based on whether it is more likely than not that a tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. In evaluating whether a tax position has met the more-likely-than-not recognition threshold, the Company has presumed that its positions will be examined by the appropriate taxing authority that has full knowledge of all relevant information. The second step of FIN 48 adoption is measurement. A tax position that meets the more-likely-than-not recognition threshold is measured to determine the amount of benefit to recognize in the financial statements. The tax position is measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement. An uncertain income tax position will not be recognized if it does not meet the more-likely-than-not threshold. To appropriately account for income tax matters in accordance with SFAS 109 and FIN 48, the Company is required to make significant judgments and

Table of Contents

estimates regarding the recoverability of deferred tax assets, the likelihood of the outcome of examinations of tax positions that may or may not be currently under review and potential scenarios involving settlements of such matters. Changes in these estimates could materially impact the consolidated financial statements. There are no uncertain tax positions for fiscal 2009.

The Company has adopted an accounting policy to record all tax related interest and penalties in its tax provision calculation.

Financial Instruments

The carrying value for cash and cash equivalents, accounts receivable, marketable securities and accounts payable approximates fair value based on the timing of the anticipated cash flows and current market conditions.

Cash and Cash Equivalents

The Company considers all highly liquid short term investments with maturities of three months or less at the date of acquisition to be cash equivalents. The components of cash and cash equivalents are as follows:

	June 30,	
	2009	2008
Cash	\$ 13,294,642	\$ 2,916,069
Australian money market accounts	21,394,200	31,699,159
	<u>\$34,688,842</u>	<u>\$ 34,615,228</u>

National Australia Bank, Ltd. ("NAB") holds 55% of the cash and cash equivalent balance. Although the funds are uninsured, Standard and Poor's credit rating of NAB is AA Stable long-term and A-1+ short-term.

Marketable Securities

The Company has determined that declines in fair value below amortized costs are temporary as management does not have the intent to sell the securities before maturity nor does it believe that it is more likely than not that the securities will be required to be sold before anticipated recovery. Therefore, no impairment loss has been recognized. At June 30, 2009 and 2008, MPC had the following marketable securities which are expected to be held until maturity:

June 30, 2009	Par Value	Maturity Date	Amortized Cost	Fair Value
<i>Short-term securities</i>				
U.S. government agency note	\$ 250,000	Jul. 15, 2009	\$ 249,690	\$ 250,000
U.S. government agency note	250,000	Aug. 14, 2009	249,449	249,975
U.S. government agency note	250,000	Sep. 21, 2009	249,179	249,925
U.S. government agency note	250,000	Oct. 15, 2009	248,988	249,875
Total short-term	<u>\$ 1,000,000</u>		<u>\$ 997,306</u>	<u>\$ 999,775</u>
June 30, 2008	Par Value	Maturity Date	Amortized Cost	Fair Value
<i>Short-term securities</i>				
U.S. government agency note	\$ 200,000	Aug. 15, 2008	\$ 200,152	\$ 200,688
U.S. government agency note	250,000	Oct. 15, 2008	250,142	251,485
U.S. government agency note	250,000	Nov. 21, 2008	252,314	251,952
U.S. government agency note	255,000	Dec. 15, 2008	250,560	252,042
U.S. government agency note	250,000	Jan. 15, 2009	254,141	253,283
U.S. government agency note	250,000	Apr. 20, 2009	255,473	254,220
U.S. government agency note	250,000	Mar. 30, 2009	245,440	245,050
Total short-term	<u>\$ 1,705,000</u>		<u>\$ 1,708,222</u>	<u>\$ 1,708,720</u>

[Table of Contents](#)

Securities Available-for-Sale

The Company classifies securities that have a readily determinable fair value and are not bought and not held principally for the purpose of selling them in the near term as securities available-for-sale, pursuant to FAS 115 Accounting for Certain Investment in Debt & Equity Securities. Under FAS 115, unrealized holding gains and losses for available-for-sale securities shall be excluded from earnings and reported in other comprehensive income until realized. The Company currently has one foreign equity security classified as available for sale.

Earnings per Share

Earnings per common share are based upon the weighted average number of common and common equivalent shares outstanding during the period. The only reconciling item in the calculation of diluted EPS is the dilutive effect of stock options which were computed using the treasury stock method.

In 2009, the Company issued approximately 2.7 million stock options. These options have been issued under the Company's 1998 Stock Incentive Plan, which was approved at the annual shareholders' meeting held on May 27, 2009. At June 30, 2009, the Company had 3,242,500 stock options outstanding all of which were anti-dilutive.

In 2008, the Company had 100,000 outstanding options that were issued that had a strike price below the average stock price for the period and resulted in 8,661 incremental diluted shares for the respective period. However, since the Company incurred a loss from operations, the incremental shares are anti-dilutive.

In 2007, the Company did not issue any stock options. At June 30, 2007, the Company had 430,000 stock options outstanding that were anti-dilutive.

Stock Options

The Company's 1998 Stock Incentive Plan (the "Plan") provides for grants of shares of stock, stock appreciation rights ("SARs"), restricted shares and non-qualified stock options principally at an option price per share of 100% of the fair value of the Company's common stock on the date awarded. The Plan was amended on May 27, 2009. The amended Plan has 5,205,000 shares authorized for awards. See Note 5-Capital and Stock Options.

SFAS 123(R) requires recognition in the financial statements of the cost resulting from all share-based payment transactions by applying a fair-value-based measurement method to account for all share-based payment transactions with employees.

Accumulated Other Comprehensive Income

Accumulated other comprehensive income at June 30, 2009 and 2008 was as follows:

	2009	2008
Foreign currency translation adjustments	\$ 1,757,799	\$ 11,689,777
Unrealized holding gains, net of deferred tax	221,964	—
Accumulated other comprehensive income	<u>\$ 1,979,763</u>	<u>\$ 11,689,777</u>

Recent Accounting Pronouncements

On December 31, 2008, the SEC published the final rules and interpretations updating its oil and gas reporting requirements. Many of the revisions are updates to definitions in the existing oil and gas rules to make them consistent with the petroleum resource management system, which is a widely accepted standard for the

Table of Contents

management of petroleum resources that was developed by several industry organizations. Key revisions include changes to the pricing used to estimate reserves, the ability to include nontraditional resources in reserves, the use of new technology for determining reserves, and permitting disclosure of probable and possible reserves. The SEC will require companies to comply with the amended disclosure requirements for annual reports for fiscal years ending on or after December 15, 2009. This guidance is effective for the Company for the fiscal year ended June 30, 2010. The SEC will also require companies to comply with the amended disclosure requirements for registration statements filed after January 1, 2010. Early adoption is not permitted. The Company is currently assessing the impact that the adoption will have on the Company's disclosures, operating results, financial position and cash flows.

In April 2009, the Financial Accounting Standards Board ("FASB") issued FASB Staff Position ("FSP") FAS 115-2 and FAS 124-2, "Recognition and Presentation of Other-Than-Temporary Impairments", which is effective as of June 30, 2009 with early adoption permitted. The Company adopted the FSP as of June 30, 2009. The FSP changes the indicators for determining whether an other-than-temporary impairment on a debt security should be recorded in earnings. Under the new accounting guidance, the primary indicators that an unrealized loss should be recognized in earnings are whether the Company intends to sell the debt security or whether it is more likely than not that it will be required to sell the debt security prior to recovery of its cost basis. For other-than-temporarily impaired debt securities that the Company intends to sell or is more likely than not going to be required to sell before recovery, unrealized losses must be recorded in earnings. The adoption did not have a material impact on the financial statements as the Company did not have unrealized losses as of June 30, 2009.

In February 2008, the FASB issued FSP FAS 157-2, "Effective Date of FASB Statement No. 157". This FSP delays the effective date of FASB Statement No. 157, "Fair Value Measurements", for nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually), including asset retirement obligations and goodwill and other impairment analyses. This guidance is effective for the Company for the fiscal year ended June 30, 2010. The Company is evaluating the impact of adoption of this FSP.

2. Fair Value Measurements

On July 1, 2008, the Company adopted SFAS No. 157, "Fair Value Measurements" ("SFAS 157"), which establishes a framework for defining and measuring fair value and requires expanded disclosures about fair value measurements. The Company's only items to which SFAS 157 applies are cash equivalents, securities available-for-sale and fixed maturity securities. Cash equivalents and securities available for sale are classified as Level 1 in the fair value hierarchy. These investments are traded in active markets and quoted prices are available for identical investments. Fixed maturity securities classified as Level 2 within the fair value hierarchy include U.S. Treasury securities. The fair value of these instruments is estimated using pricing models which utilize inputs such as recent trades for the same or similar instrument, yield curves, discount margin and bond structures.

The following table presents the amounts of assets carried at fair value at June 30, 2009 by the level in which they are classified within the SFAS No. 157 valuation hierarchy:

<u>Description</u>	<u>Fair Value Measurements at Reporting Date Using</u>	
	<u>Quoted Prices in Active</u>	<u>Significant Other</u>
	<u>Markets for Identical Assets</u>	<u>Observable Inputs</u>
	<u>Level 1</u>	<u>Level 2</u>
Cash Equivalents	\$ 21,394,200	—
Securities available for sale	903,924	—
Marketable securities	—	\$ 999,775

[Table of Contents](#)

3. Oil and Gas Properties

MPC had the following amounts recorded in oil and gas properties at June 30, 2009 and 2008.

<u>Location</u>	<u>2009</u>	<u>2008</u>
Mereenie and Palm Valley (Australia)	\$ 91,851,863	\$ 109,124,145
Nockatunga (Australia)	17,212,729	20,301,033
Cooper Basin (Australia) (1)	4,849,588	5,604,219
Other (Australia) nondepletable exploration permits and licenses (2)	549,109	548,945
Weald/Wessex Basin (U.K.) nondepletable exploration permits and licenses	2,170,718	2,428,236
Weald/Wessex Basin (U.K.) capitalized exploratory drilling costs	983,548	549,935
	<u>\$ 117,617,555</u>	<u>\$ 138,556,513</u>

- (1) At June 30, 2009 and 2008, includes \$1,552,838 and \$1,855,186, respectively, of costs capitalized as exploratory well costs pending the start of production as well as \$1,384,664 and \$1,448,568, respectively, of nondepletable exploration permits and licenses.
- (2) Maryborough Basin and Amadeus Basin in Australia.

Accumulated Depletion, Depreciation and Amortization

<u>Location</u>	<u>2009</u>	<u>2008</u>
Mereenie and Palm Valley (Australia)	\$ 83,937,714	\$ 94,218,078
Nockatunga (Australia)	15,280,813	14,780,819
Cooper Basin (Australia)	1,808,664	2,132,354
	<u>\$ 101,027,191</u>	<u>\$ 111,131,251</u>

Depletion, Depreciation and Amortization

During the years ended June 30, 2009, 2008 and 2007, the depletion rate by field was as follows:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
	<u>Percent</u>		
Mereenie and Palm Valley (Australia)	63.8	45.3	35.5
Nockatunga (Australia)	64.6	66.5	53.6
Cooper Basin (Australia)	13.3	35.9	32.3

Exploratory and Dry Hole Costs

Exploration and dry hole costs relate to the exploration work performed on MPAL's properties. Components of these costs are as follows:

<u>Exploration and Dry Hole Costs</u>	<u>Year ended June 30</u>		
	<u>2009</u>	<u>2008</u>	<u>2007</u>
Farmout, Field Monitoring and Technical Costs	\$1,807,129	\$1,892,528	\$2,662,014
Seismic Data and Acquisition Costs (1)	1,367,312	98,168	140,900
Dry Hole Drilling (2)	5,765	1,328,114	2,717,546
Write off expired permits – U.K.	295,731	—	—
Total	<u>\$3,475,937</u>	<u>\$3,318,810</u>	<u>\$5,520,460</u>

- (1) Seismic data costs related to the Nockatunga fields in 2009, Cooper Basin and U.K. permits in 2008, and Nockatunga and U.K. permits in 2007.
- (2) Dry hole costs related mostly to the Cooper Basin in 2008 and 2007.

Table of Contents

See Note 11 — Commitments for a summary of MPAL's required and contingent commitments for exploration expenditures for the five year period beginning July 1, 2009.

Impairment Loss

A non-cash impairment loss of \$63,740 was recorded in 2009 relating to the decreased value of U.K. exploration permits and licenses that were recognized under purchase accounting. The losses related to the exploration permits and licenses resulted from the ongoing exploration program which did not result in discovery of reserves. These losses related to the MPAL segment. There was no impairment loss recorded for fiscal 2008.

A non-cash impairment loss of \$1,876,171 was recorded in 2007 relating to the decreased value of the Kiana field in the Cooper Basin (\$984,171) and the decreased value of exploration permits and licenses that were recognized under purchase accounting (\$892,000). The net book value of the Kiana oil and gas property was written down to its future estimated discounted cash flow. As a result of declining production, discounted cash flows were utilized to calculate the fair value of the Kiana field. The losses related to the exploration permits and licenses resulted from the ongoing exploration program which did not result in discovery of reserves. These losses related to the MPAL segment.

4. Asset Retirement Obligations

A reconciliation of the Company's asset retirement obligations for the years ended June 30, 2009 and 2008, is as follows:

	<u>2009</u>	<u>2008</u>
Balance at beginning of year	\$11,596,084	\$ 9,456,088
Liabilities incurred	—	—
Liabilities settled	—	—
Accretion expense	531,405	716,130
Revisions to estimate (1)	(625,962)	43,482
Exchange effect	<u>(1,686,265)</u>	<u>1,380,384</u>
Balance at end of year	<u>\$ 9,815,262</u>	<u>\$11,596,084</u>

- (1) During the year ended June 30, 2009, changes in cost estimates and expected restoration dates resulted in decreases in total asset retirement obligations.

5. Capital and Stock Options

On May 27, 2009, shareholders approved an amendment to the 1998 Stock Incentive Plan (the "Plan") which reserved for issuance an aggregate of 5,205,000 shares of the Company's common stock in the form of non-qualified stock options, SARs, restricted share awards, annual awards of stock to non-employee directors and performance based awards.

The Plan provides for options to be issued with an exercise price of not less than fair value of the stock price on the date of the award and for a term of not greater than ten years. As of June 30, 2009, 1,787,500 options were available for future issuance under the Plan.

Table of Contents

The following is a summary of option transactions for the three years ended June 30, 2009:

<u>Options Outstanding</u>	<u>Expiration Dates</u>	<u>Number of Shares</u>	<u>Exercise Prices (\$)</u>	<u>Fair Value at Grant Date</u>
June 30, 2007		430,000	(1.59 weighted average price)	
Awarded	Feb. 2018	100,000		1.16 \$ 63,141
June 30, 2008		530,000	(1.51 weighted average price)	
Awarded	Dec. 2018	2,712,500		1.20 \$ 1,881,362
June 30, 2009		3,242,500	(1.25 weighted average price)	

The weighted average remaining contractual term as of June 30, 2009 is 9 years.

Summary of Options Outstanding at June 30, 2009

	<u>Expiration Dates</u>	<u>Total</u>	<u>Vested</u>	<u>Exercise Prices (\$)</u>
Awarded fiscal year 2004	Jul. 2014	30,000	30,000	1.45
Awarded fiscal year 2006	Nov. 2015	400,000	400,000	1.60
Awarded fiscal year 2008	Feb. 2018	100,000	100,000	1.16
Awarded fiscal year 2009	Dec. 2018	2,712,500	—	1.20
		<u>3,242,500</u>	<u>530,000</u>	

All of the options have been issued with an exercise price equal to or greater than the fair value of the Company's stock at the date of the award, which may differ from the grant date used for accounting purposes.

Upon exercise of options, the excess of the proceeds over the par value of the shares issued is credited to capital in excess of par value. For the years ended June 30, 2009, 2008 and 2007, the Company recorded stock-based compensation expense for the cost of stock options of \$83,560, \$63,141, and \$7,425 both pre-tax and post-tax, which has no impact on basic or diluted earnings per share. The grant date fair values of the options granted on May 27, 2009 and February 18, 2008 were \$1,881,362 and \$63,141, respectively. These expenses have no effect on cash flow. As of June 30, 2009 and 2008, there was \$1,797,802 and \$0 of total unrecognized compensation costs related to stock options.

The Company determined the fair value of the options at the date of grant using the Black-Scholes option pricing model for the time based options. Option valuation models require the input of certain assumptions including the expected stock price volatility. The assumptions used to value the Company's time based grants were as follows:

	<u>May 27, 2009</u>	<u>Feb. 18, 2008</u>	<u>Nov. 28, 2005</u>	<u>Jul. 1, 2004</u>
Risk free interest rate	2.82%	3.20%	4.58%	4.95%
Expected life	6 yrs	5 yrs	5 yrs	10 yrs
Expected volatility (based on historical price)	.650	.611	.627	.518
Expected dividend	\$ 0	\$ 0	\$ 0	\$ 0

The expected life of the time based options granted on May 27, 2009 and February 18, 2008 was determined under the "simplified" method described in SEC Staff Accounting Bulletin No. 110.

The time based stock options vest in equal annual installments over the vesting period, which is also the requisite service period. Time based stock options are generally granted with a 3-year vesting period and a 10-year term. The 400,000 options granted to Directors on November 28, 2005 and 100,000 on February 18,

Table of Contents

2008 each vested immediately. Vesting criteria of performance based/market based options (“PBO”s) are determined by the Company’s compensation committee. PBOs issued during fiscal 2009 will vest in full upon attainment of either of the following investment goals; monetizing the uncontracted gas reserves held by MPAL at the Amadeus Basin field, or upon the closing price of the Company’s stock being at or above \$1.50 per share for sixty consecutive trading days. All options vest in the event of change of control of the Company.

The Monte Carlo model was used to value the PBOs. A Monte Carlo simulation allows for the analysis of a complex security through statistical measures applied to a model that is simulated thousands of times to build distributions of potential outcomes. The variables and assumptions used in this calculation were as follows:

	<u>May 27, 2009</u>
Risk free interest rate	3.71%
Expected volatility (based on historical price)	.70
Expected dividend	\$ 0
Closing stock price as of May 27, 2009	\$1.23
Term	10 years
Days until expiration (per annum)	252 days
Steps until expiration	2,520
Probability of performance criteria occurring over term of options:	
Monetization of uncontracted reserves	25% – 60%
Change of control	10% – 50%

As of June 30, 2009 there were 1,837,500 nonvested option shares outstanding under the Plan with a weighted average fair value at date of award of \$0.75 per share and 875,000 nonvested option shares in the Plan with a weighted average fair value at date of award of \$0.57 per share.

6. Income Taxes

Components of income (loss) before income taxes by geographic area (in thousands) are as follows:

	<u>Years Ended June 30,</u>		
	<u>2009</u>	<u>2008</u>	<u>2007</u>
United States	\$(3,845)	\$(2,119)	\$(1,386)
Foreign	6,708	7,558	2,831
Total	<u>\$ 2,863</u>	<u>\$ 5,439</u>	<u>\$ 1,445</u>

Table of Contents

Reconciliation of the provision for income taxes (in thousands) computed at the Australian statutory rate to the reported provision for income taxes is as follows:

	Years Ended June 30,		
	2009	2008	2007
Tax provision computed at statutory rate (30)%	\$ 859	\$ 1,632	\$ 434
MPC (parent company) losses	1,154	636	416
Non-taxable Australian revenue	(342)	(443)	(404)
Increase in valuation reserve for foreign (UK) exploration expenditures	382	271	374
Australian Taxation Office settlement (a)	—	12,085	—
MPC capitalized facilitation costs	268	—	—
Rate differential on MPC book income	(154)	—	—
MPC income tax provision (b)	41	72	58
Other	(10)	77	121
Consolidated income tax provision	<u>\$ 2,198</u>	<u>\$14,330</u>	<u>\$ 999</u>
Current income tax provision (foreign)	\$ 3,816	\$18,872	\$ 2,817
Deferred income tax benefit (foreign)	(1,618)	(4,542)	(1,818)
Consolidated income tax provision	<u>\$ 2,198</u>	<u>\$14,330</u>	<u>\$ 999</u>
Effective tax rate	<u>77%</u>	<u>263%</u>	<u>69%</u>

(a) See discussion below under Australia.

(b) MPC's income tax provisions represent the 25% Canadian withholding tax on its Kotaneelee gas field carried interest net proceeds and 10% Australian withholding tax on interest income from intercompany loans.

Significant components of the Company's deferred tax assets and liabilities (in thousands) were as follows:

	June 30, 2009	June 30, 2008
Deferred tax liabilities		
Stepped up basis of oil and gas properties	(1,842)	(2,508)
Other	(82)	(8)
Total deferred tax liabilities	<u>(1,924)</u>	<u>(2,516)</u>
Deferred tax assets		
Acquisition and development costs	2,752	2,486
Asset retirement obligations	2,945	3,883
Net operating losses	3,562	4,079
United Kingdom exploration costs	1,274	1,031
Stock options	211	174
Interest	539	539
Other	575	—
Total deferred tax assets	<u>11,858</u>	<u>12,192</u>
Valuation allowance	(5,586)	(5,815)
Net deferred tax asset/(liabilities)	<u>\$ 4,348</u>	<u>\$ 3,861</u>

The Company records a valuation allowance for deferred tax assets when management believes it is more likely than not that such assets will not be recovered. The valuation allowance decreased to \$5,586,000 in 2009 from \$5,815,000 in 2008. The change in the valuation allowance is due to utilization of net operating losses in the US offset by an increase in the valuation allowance for the tax benefit of U.K. exploration costs

[Table of Contents](#)

United States

At June 30, 2009, the Company had approximately \$9,078,000 and \$9,609,000 of net operating loss carry forwards for federal and state income tax purposes, respectively, which are scheduled to expire periodically as follows (in thousands):

	<u>Paroo USA Federal</u>	<u>MPC Federal</u>	<u>MPC State</u>
Expires:			
2010	\$ 1,669	\$ —	\$ —
2011	1,764	—	—
2012	2,856	—	—
2013	230	—	—
2019	96	—	—
2021	25	—	56
2022	74	—	302
2023	3	—	359
2024	2	—	—
2025	1	—	1,058
2026	—	287	1,341
2027	—	—	1,462
2028	—	2,071	2,057
2029	—	—	2,974
Total	<u>\$ 6,720</u>	<u>\$2,358</u>	<u>\$9,609</u>

For financial reporting purposes, a full valuation allowance has been recognized to offset the deferred tax assets related to the U.S. tax loss carry forwards and other deductible temporary differences as it is more likely than not that under current circumstances such assets will not be recovered.

Australia

The net deferred tax asset at June 30, 2009, consists of a deferred tax asset of \$2,752,000, primarily relating to acquisition and development costs and \$2,945,000 primarily relating to asset retirement obligations which will result in tax deductions when paid.

As previously disclosed, the Australian Taxation Office (“ATO”) conducted an audit of the Australian income tax returns of MPAL and its wholly owned subsidiaries for the years 1997-2005. The ATO audit focused on certain income tax deductions claimed by Paroo Petroleum Pty. Ltd. (“PPPL”), a wholly-owned subsidiary of MPAL related to the write-off of outstanding loans made by PPPL to other entities within the MPAL group of companies. As a result of the settlement reached with the ATO, the Company recorded taxes and interest in the amount of (US) \$13,252,469 (\$0.31 per share) as part of the income tax provision for the year ended June 30, 2008 which included (US) \$2,725,110 of interest net of the tax benefit related to the interest deduction. No additional interest related to tax matters was recorded for the year ended June 30, 2009.

There are no uncertain tax positions for fiscal 2009.

7. Related Party and Other Transactions

Mr. Timothy L. Largay, a director of the Company through December 2008, is a partner of the law firm of Murtha Cullina, LLP, which firm was paid fees of \$689,652, \$264,170 and \$114,415 by the Company in fiscal years 2009, 2008 and 2007, respectively. At June 30, 2009, 2008 and 2007, the Company’s payables included \$50,812, \$22,196 and \$25,402, respectively, owed Murtha Cullina, LLP.

[Table of Contents](#)

8. Leases

At June 30, 2009, future minimum rental payments applicable to MPC's and MPAL's non-cancelable office operating leases were as follows:

<u>Fiscal Year</u>	<u>Future Minimum Rental Payments</u>
2010	\$ 263,000
2011	\$ 272,000
2012	\$ 286,000

Operating lease rental expenses for each of the years ended June 30, 2009, 2008 and 2007 were \$415,760, \$473,944 and \$362,005 respectively.

9. Segment Information

The Company has two reportable segments, MPC and its wholly owned subsidiary, MPAL. The Company's chief operating decision maker is William H. Hastings (President and Chief Executive Officer) who reviews the results of the MPC and MPAL businesses on a regular basis. MPC and MPAL both engage in business activities from which they may earn revenues and incur expenses. MPAL and its subsidiaries are considered one segment. Although there is discreet information available below the MPAL level, their products and services, production processes, market distribution and customers are similar in nature. In addition, MPAL has a management team which focuses on drilling efforts, capital expenditures and other operational activities.

Table of Contents

Segment information (in thousands) for the Company's two operating segments is as follows:

	Years Ended June 30,		
	2009	2008	2007
Revenues:			
MPC	\$ 164	\$ 233	\$ 130

MPAL	2,157	14,272	951
Total consolidated	<u>\$ 2,198</u>	<u>\$ 14,330</u>	<u>\$ 999</u>

(1) Goodwill attributable to MPAL was \$4,020,706 for 2009 and 2008, respectively.

[Table of Contents](#)**10. Geographic Information**

As of each of the stated dates, the Company's revenue, operating income, net income or loss and identifiable assets (in thousands) were geographically attributable as follows:

	Years Ended June 30,		
	2009	2008	2007
Revenue:			
Australia	\$28,027	\$40,662	\$30,545
Canada	164	233	130
	<u>\$28,191</u>	<u>\$40,895</u>	<u>\$30,675</u>
Income (loss) before income taxes:			
Australia	\$ 6,952	\$ 7,257	\$ 3,152
New Zealand	—	(42)	(25)
United Kingdom	(1,272)	(904)	(1,162)
United States and Canada	164	233	161
	<u>5,844</u>	<u>6,544</u>	<u>2,126</u>
Corporate overhead and interest, net of other income (expense)	<u>(2,981)</u>	<u>(1,105)</u>	<u>(681)</u>
Consolidated income before income taxes	<u>\$ 2,863</u>	<u>\$ 5,439</u>	<u>\$ 1,445</u>
	Years Ended June 30,		
	2009	2008	2007
Net income (loss):			
Australia	\$ 5,822	\$ (5,767)	\$ 3,074
New Zealand	—	(44)	(32)
United Kingdom	(1,272)	(904)	(1,162)
United States	<u>(3,885)</u>	<u>(2,177)</u>	<u>(1,433)</u>
	<u>\$ 665</u>	<u>\$ (8,892)</u>	<u>\$ 447</u>
Identifiable assets:			
Australia	\$69,711	\$82,935	
Corporate assets	<u>1,993</u>	<u>2,360</u>	
	<u>\$71,704</u>	<u>\$85,295</u>	

Substantially all of MPAL's gas sales were to the Power and Water Corporation of the Northern Territory of Australia. Oil sales during 2009 were 40% to the Santos group of companies, 13% to Beach Petroleum, 8% to Origin Energy Resources and 39% to IOR Energy.

[Table of Contents](#)

11. Commitments

The Company is exposed to oil and gas market price volatility and for gas sales uses fixed pricing contracts with inflation clauses to mitigate this exposure.

The following is a summary of our consolidated contractual obligations as of June 30, 2009, in thousands:

<u>Contractual Obligations</u>	<u>Payments Due by Period</u>				
	<u>Total</u>	<u>Less Than 1 Year</u>	<u>1-3 Years</u>	<u>3-5 Years</u>	<u>More Than 5 Years</u>
Operating Lease Obligations	\$ 821	\$ 263	\$ 558	\$ —	\$ —
Purchase Obligations (1)	6,469	6,469	—	—	—
Asset Retirement Obligations-Undiscounted (2)	14,470	202	2,446	8,397	3,425
Total	<u>\$21,760</u>	<u>\$ 6,934</u>	<u>\$ 3,004</u>	<u>\$ 8,397</u>	<u>\$ 3,425</u>

- (1) Represents firm commitments for exploration and capital expenditures. The Company is committed to these expenditures, however some may be farmed out to third parties. Exploration contingent expenditures which are not legally binding have been excluded from the table above.
- (2) During the year ended June 30, 2009, the Company decreased total asset retirement obligations by \$626,000 due to changes in cost estimates and expected restoration dates (see Note 4 to the Financial Statements).

Gas Supply Contracts

In 1983, the MPAL and Santos (“Palm Valley Producers”) commenced the sale of gas to Alice Springs under a 1981 agreement. That agreement terminated in June 2008. In 1985, the Palm Valley Producers and Mereenie Producers (MPAL and Santos) signed agreements for the sale of gas to PWC, through its wholly-owned company Gasgo Pty. Ltd. (“Gasgo”), for use in PWC’s Darwin electricity generating station and at a number of other generating stations in the Northern Territory. The price of gas under the Palm Valley and Mereenie gas contracts is adjusted quarterly to reflect changes in the Australian Consumer Price Index. The gas is being delivered via the 922-mile Amadeus Basin gas pipeline which was built by an Australian consortium. Since 1985, there have been several additional contracts for the sale of Mereenie gas, the latest being in June 2006 for the supply of an additional 4.4 Bcf of gas to be supplied prior to December 31, 2008. The Palm Valley Darwin contract expires in the year 2012 and the principal Mereenie contracts expired in January and June 2009. Supply obligations under the Mereenie contracts ceased in June 2009, however, there is a reasonable endeavor obligation to supply certain of PWC’s requirements through to December 31, 2010.

At June 30, 2009, MPAL’s commitment to supply gas under the above agreements was as follows:

<u>Period</u>	<u>Bcf</u>
Less than one year	2.22
Between 1-5 years	1.77
Greater than 5 years	0.00
Total	<u>3.99</u>

12. Restatement of Financial Information

Subsequent to the issuance of our 2008 annual report on Form 10-K we determined that in our consolidated statement of cash flows for the year ended June 30, 2007, we inappropriately added back to cash flows from operating activities \$3.2 million of accounts payable related to property and equipment additions. This increase in accounts payable should have been reflected as a reduction of cash outflows from investing activities rather than an increase in cash flows from operating activities. This error also affected our consolidated statement of

Table of Contents

cash flows for the year ended June 30, 2008 as these amounts should have increased cash flows from operating activities through the adjustment for the change in accounts payable and should have been reflected as an increase to reported cash outflows for additions to property and equipment in the investing activities section for that year. The statement of cash flows for the years ended June 30, 2008 and 2007 as contained herein have been adjusted for the restatement discussed above. This restatement has no impact on the change in cash and cash equivalents, the balance sheet or the statement of operations.

Additionally, we also determined that the amounts we have previously reported in our consolidated statements of cash flows as investing outflows for exploration and dry hole costs have included certain engineering and other costs that do not result in the acquisition of an asset and should, therefore, be classified as operating cash outflows rather than investing outflows. The amounts of exploration and dry hole costs inappropriately included as investing outflows in previously issued consolidated statements of cash flows were: \$1.9 million and \$2.1 million for the years ended June 30, 2008 and 2007, respectively as contained herein. The statement of cash flows for the years ended June 30, 2008 and 2007 as contained herein have been adjusted for the restatement discussed above. This restatement has no impact on the change in cash and cash equivalents, the balance sheet or the statement of operations.

The following is a summary of the restatement on the originally issued Consolidated Statement of Cash Flows for the years ended June 30, 2009 and 2008:

CONSOLIDATED STATEMENT OF CASH FLOWS

	June 30, 2008		
	As Previously Reported	Adjustments	As Restated
Adjustments to reconcile net loss to net cash provided by operating activities:			
Exploration and dry hole costs	\$ 3,227,200	\$(1,899,086)	\$ 1,328,114
Changes in operating assets and liabilities:			
Accounts payable and accrued liabilities	(3,112,940)	3,183,420	70,480
Net cash provided by operating activities	4,211,265	1,284,334	5,495,599
Additions to property and equipment	(1,628,476)	(2,620,739)	(4,249,215)
Oil and gas exploration activities	(3,227,200)	1,336,405	(1,890,795)
Net cash used in investing activities	(2,150,396)	(1,284,334)	(3,434,730)

	June 30, 2007		
	As Previously Reported	Adjustments	As Restated
Adjustments to reconcile net loss to net cash provided by operating activities:			
Exploration and dry hole costs	\$ 4,871,865	\$(2,154,319)	\$ 2,717,546
Changes in operating assets and liabilities:			
Accounts payable and accrued liabilities	2,474,106	(3,183,420)	(709,314)
Net cash provided by operating activities	21,273,813	(5,337,739)	15,936,074
Additions to property and equipment	(9,231,029)	3,447,912	(5,783,117)
Oil and gas exploration activities	(4,871,865)	1,889,827	(2,982,038)
Net cash used in investing activities	(18,019,572)	5,337,739	(12,681,833)
Accounts payable related to property and equipment	1,417,051	1,778,582	3,195,633

[Table of Contents](#)**13. Selected Quarterly Financial Data (Unaudited)**

The following is a summary (in thousands, except for per share amounts) of the quarterly results of operations for the years ended June 30, 2009 and 2008:

	September 30, 2008 3 Months	December 31, 2008 3 Months	March 31, 2009 3 Months	June 30, 2009 3 Months
2009				
Total revenues	\$ 10,439	\$ 5,172	\$ 5,523	\$ 7,057

14. Supplementary Oil and Gas Disclosure (Unaudited and Restated)

The consolidated data presented herein include estimates which should not be construed as being exact and verifiable quantities. The reserves may or may not be recovered, and if recovered, the cash flows therefrom, and the costs related thereto, could be more or less than the amounts used in estimating future net cash flows. Moreover, estimates of proved reserves may increase or decrease as a result of future operations and economic conditions, and any production from these properties may commence earlier or later than anticipated.

Mereenie	95.73	147.44	87.62
Cooper			
Aldinga	97.80	138.24	84.03
Kiana	87.66	129.07	79.31
Nockatunga	90.82	124.55	81.32

- (1) Year end contract price through term of contract. Year end spot price used thereafter.
- (2) Year end contract price
- (3) Year end spot price

The following is the standardized measure of discounted (at 10%) future net cash flows (in thousands) relating to proved oil and gas reserves during the three years ended June 30, 2009. These amounts were calculated using prices and costs in effect for each individual property as of June 30 for each year. These prices were not changed except where different prices were fixed and determinable from applicable contracts.

The standardized measure of discounted future net cash flows in the following table has been restated for fiscal 2008 and 2007. In 2008, the calculation of discounted cash flows as previously reported erroneously included estimated sales subsequent to the expiration of existing natural gas contracts for the Palm Valley and Mereenie fields although those volumes of natural gas are not considered proved reserves. In both 2008 and 2007, certain proved oil reserves for the Mereenie field were erroneously not included in the calculation of discounted cash flows as previously reported. The restated amounts in the standardized measure of discounted future net cash flows and the changes therein appropriately include the proved oil and gas reserves.

	Australia

Additional Information Regarding Discounted Future Net Cash Flows:

Australia

Reserves — Natural Gas

Future net cash flows from net proved gas reserves in Australia were based on MPAL's share of reserves in the Palm Valley and Mereenie fields. Reserves in these fields were limited to the quantities of gas committed to specific contract and the ability of the field to deliver the gas in the contract years. Gas prices are computed on the prices set forth in the respective gas sales contracts at June 30, 2009.

Table of Contents

Reserves and Costs — Oil

At June 30, 2009, future net cash flows from the net proved oil reserves in Australia were calculated by the Company. Estimated future production and development costs were based on current costs and rates for each of the three years ended at June 30, 2009.

Income Taxes

Future Australian income tax expense applicable to the future net cash flows has been reduced by the tax effect on unrecouped capital expenditures of approximately A.\$23,378,000, A.\$26,145,000 and A.\$29,167,000 at June 30, 2009, 2008 and 2007 respectively. The tax rate used in computing Australian future income tax expense was 30%.

Canada

Reserves and Costs

Future net cash flows from net proved gas reserves in Canada were based on the Company's share of reserves in the Kotaneelee gas field which was prepared by independent petroleum consultants, Paddock Lindstrom & Associates Ltd., Calgary, Canada. The estimates were based on the selling price of gas Can. \$3.22 at June 30, 2009 (Can. \$9.61 — 2008) and estimated future production and development costs at June 30, 2009.

Results of Operations

The following are the Company's results of operations (in thousands) for the oil and gas producing activities during the three years ended June 30, 2009:

	Total			Americas			Australia/United Kingdom		
	2009	2008	2007	2009	2008	2007	2009	2008	2007
Revenues:									
Oil sales	\$ 11,480	\$ 19,786	\$ 11,922	\$ —	\$ —	\$ —	\$ 11,480	\$ 19,786	\$ 11,922
Gas sales	14,740	18,523	16,397	164	233	130	14,576	18,290	16,267
Other production income	1,971	2,586	2,356	—	—	—	1,971	2,586	2,356
Total revenues	28,191	40,895	30,675	164	233	130	28,027	40,662	30,545
Costs:									
Production costs	8,153	8,866	6,965	—	—	—	8,153	8,866	6,965
Depletion, exploratory and dry hole costs	10,476	21,222	16,105	—	—	—	10,476	21,222	16,105
Total costs	18,629	30,088	23,070	—	—	—	18,629	30,088	23,070
Income before taxes	9,562	10,807	7,605	164	233	130	9,398	10,574	7,475
Income tax provision*	(2,860)	(3,230)	(2,275)	(41)	(58)	(33)	(2,819)	(3,172)	(2,242)
Net income from operations	\$ 6,702	\$ 7,577	\$ 5,330	\$ 123	\$ 175	\$ 97	\$ 6,579	\$ 7,402	\$ 5,233
Depletion per unit of production	A.\$ 8.39	A.\$ 14.66	A.\$ 7.44	\$ —	\$ —	\$ —	A.\$ 8.39	A.\$ 14.66	A.\$ 7.44

* Income tax provision used for Australia is based on a rate of 30%. Americas 25% is due to a 25% Canadian withholding tax on Kotaneelee gas sales.

15. Subsequent Events

Statement of Financial Accounting Standards No. 165, "Subsequent Events," incorporates into FASB authoritative literature accounting guidance that originated as auditing standards about events or transactions that occur after the balance sheet date but before financial statements are issued. SFAS No. 165 retains the auditing

Table of Contents

standard requirements to recognize in the financial statements the effects of all subsequent events that provide additional evidence about conditions that existed at the balance sheet date and to disclose but not recognize subsequent events that provide evidence about conditions that arose after the balance sheet date but before the financial statements are issued. The reporting entity is required to disclose the date through which it has evaluated subsequent events. SFAS No. 165 was issued and implemented for the year end June 30, 2009. In preparing the accompanying consolidated financial statements, the Company has evaluated events subsequent to June 30, 2009 through the issuance of the financial statements on October 2, 2009 and has identified the following events for disclosure.

On July 9, 2009, the Company completed, pursuant to the terms of a definitive purchase agreement and related amendments an equity investment in the Company by the Company's strategic investor, Young Energy Prize S.A. ("YEP"), through the issuance to YEP of 8,695,652 shares of the Company's common stock, \$0.01 par value per share (the "Common Stock") and warrants to acquire an additional 4,347,826 shares of Common Stock. The Company received gross proceeds of \$10 million, which will be used for working capital and general corporate purposes.

On July 9, 2009, the Company entered into a Warrant Agreement which entitles YEP to purchase 4,347,826 shares of the Company's Common Stock (the "Warrant Shares") at an exercise price of \$1.20 per Warrant Share. The Warrant has a term of five years and contains certain provisions which would reduce the exercise price. Furthermore The First Amendment to the Purchase Agreement provides that, if YEP completes the purchase of shares of the Company's Common Stock owned by ANS Investments LLC and its CEO, Jonah M. Meer under the ANS-YEP Purchase Agreement, then the exercise price payable by YEP for the Warrant Shares shall be reduced from \$1.20 to \$1.15 per share. This transaction was completed on July 30, 2009, reducing the exercise price to \$1.15 per share.

In connection with the YEP Purchase Agreement, at a Board meeting held on May 27, 2009, the Company's Board adopted resolutions: (a) conditionally amending the Company's Bylaws to expand the size of the Board; and (b) conditionally electing Messrs. Nikolay Bogachev and J. Thomas Wilson to the Board as Class II directors, each to serve a term of office expiring at the Company's 2011 Annual Meeting of Shareholders. On July 9, 2009, upon completion of the YEP equity investment transaction, the elections to the Board of Messrs. Bogachev and Wilson became effective.

Item 9. *Changes in and Disagreements with Accountants on Accounting and Financial Disclosure*

None

Item 9A. *Controls and Procedures*

Disclosure Controls and Procedures

An evaluation was performed under the supervision and with the participation of the Company's management, including William H. Hastings, the Company's President and Chief Executive Officer ("CEO"), and Daniel J. Samela, the Company's Chief Financial and Accounting Officer ("CFO"), of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) and Rule 15d-15(e) promulgated under the Securities and Exchange Act of 1934, the "Exchange Act") as of June 30, 2009. Based on this evaluation, the Company's CEO and CFO concluded that the Company's disclosure controls and procedures were not effective such that the material information required to be included in the Company's Securities and Exchange Commission ("SEC") reports is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms relating to the Company, including its consolidated subsidiaries, and the information required to be disclosed was accumulated and communicated to management as appropriate to allow timely decisions for disclosure. Our management concluded that the Company's disclosure controls and procedures were not effective because of the need to extend the filing deadline for such Form 10-K to identify, address and correct certain information included in Note 14, Supplementary Oil and Gas disclosure (Unaudited and Restated).

[Table of Contents](#)

Internal Control Over Financial Reporting

Internal control over financial reporting (as defined in Rule 13a-15(f) adopted under the Exchange Act) is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with accounting principles generally accepted in the United States of America. Internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the Company's assets; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America, and that the Company's receipts and expenditures are being made only in accordance with authorizations of the Company's management and directors; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the consolidated financial statements.

Management acknowledges its responsibility for establishing and maintaining adequate internal control over financial reporting. We have used the criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in conducting our evaluation of the effectiveness of the internal control over financial reporting. Based on our evaluation, we concluded that the Company's internal control over financial reporting was effective as of June 30, 2009.

This annual report does not include an attestation report of the Company's independent registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's independent registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission that permit the Company to provide only management's report in this annual report.

Because of its inherent limitations, internal control over financial reporting and procedures may not prevent or detect misstatements. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies and procedures may deteriorate. There have not been any other changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the fourth fiscal quarter of the Company's fiscal year ended June 30, 2009 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. Other Information

On May 11, 2009, the Company issued a press release describing the Company's financial results for the third fiscal quarter ended March 31, 2009. A copy of this press release is furnished as Exhibit 99.1 hereto.

PART III

Pursuant to General Instruction G(3), the information called for by Items 10, (except for information concerning the executive officers of the Company) 11, 12, 13 and 14 is hereby incorporated by reference to the Company's definitive proxy statement to be filed on EDGAR with respect to the fiscal year ended June 30, 2009. Certain information concerning the executive officers of the Company is included as Item 10 of this report.

[Table of Contents](#)

Item 10. Directors, Executive Officers and Corporate Governance

The following is a list of the executive officers of the Company:

Name	Age	Office Held	Length of Service as an Officer	Other Positions Held with Company
William H. Hastings	53	President and Chief Executive Officer	Since 2008	None
Daniel J. Samela	61	Chief Financial Officer	Since 2004	Treasurer

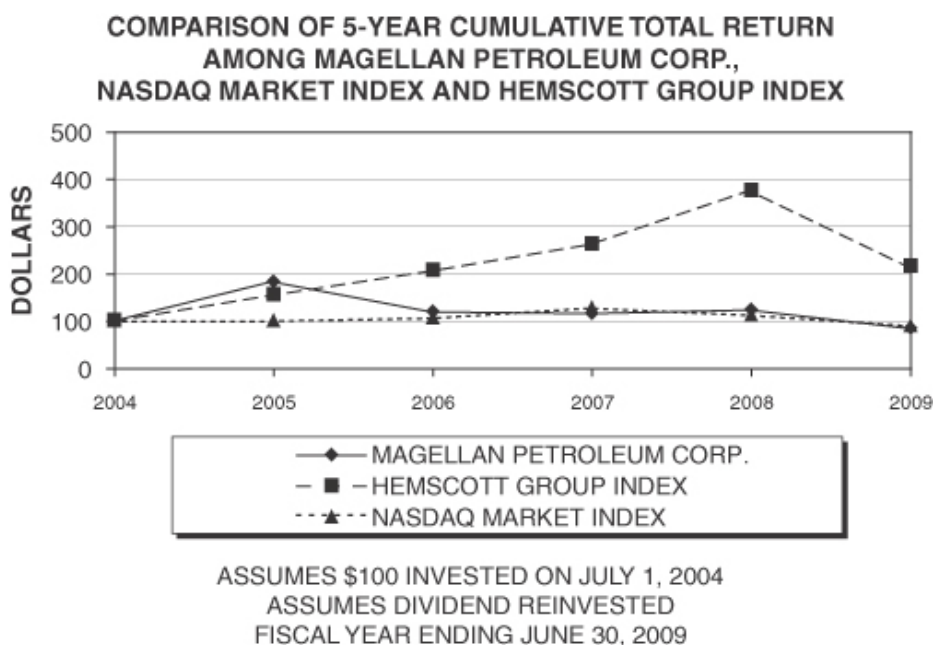

For further information regarding the executive officers see the Company's Proxy Statement to be filed with the SEC on or about October 13, 2009.

Item 11. Executive Compensation

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The graph below compares the cumulative total returns, including reinvestment of dividends, if applicable, on the Company's Common Stock with the returns on companies in the NASDAQ Index and Industry Group Index (the Hemscoff Index).

The chart displayed below is presented in accordance with SEC requirements. The graph assumes a \$100 investment made on July 1, 2003 and the reinvestment of all dividends. Stockholders are cautioned against drawing any conclusions from the data contained therein, as past results are not necessarily indicative of future performance.

MAGELLAN PETROLEUM CORPORATION

1998 STOCK INCENTIVE PLAN

As amended and restated, December 11, 2008, and further amended on March 19, 2009,
and further amended on May 27, 2009

Approved by the Company's shareholders on May 27, 2009.

1. Purpose of Plan.

The purpose of this 1998 Stock Incentive Plan (the "Plan") is to further the interests of Magellan Petroleum Corporation, a Delaware corporation, (the "Company"), and its subsidiaries or affiliates, by providing eligible individuals (as designated in Section 4 below) incentive awards that will cause those eligible individuals to continue their affiliation with the Company and its subsidiaries or affiliates and to give them a greater interest in the success of the Company. The Plan permits the granting of the following types of awards ("Awards"), according to the Section of the Plan listed here:

Section 5	Stock Options ("Options")
Section 6	Stock Appreciation Rights ("SARs")
Section 8	Restricted Stock Awards
Section 9	Annual Stock Awards to Non-Employee Directors
Section 10	Performance Awards

The various types of Awards that may be provided under the Plan are designed to enable the Company to respond to changes in compensation practices, tax laws, accounting regulations and the size and diversity of its business.

2. Stock Subject to Plan.

There shall be reserved for issuance or transfer upon the exercise of all Awards to be granted from time to time under the Plan an aggregate of 5,205,000 shares of the Company's common stock, one cent par value (the "Stock"), which shares may be in whole or in part authorized and unissued shares of stock or issued shares of stock which shall have been reacquired by the Company, as the Board of Directors shall from time to time determine. For the purposes of this Section 2, a share of Stock shall be deemed issued or transferred upon the exercise of any SAR. If any Award granted under the Plan shall expire, be surrendered to the Company or terminate for any reason without having been exercised in full, the shares of Stock subject thereto that have not been issued or transferred or deemed issued or transferred shall again be available for the purposes of the Plan.

3. Administration.

(a) The Plan shall be administered by a committee (the "Committee") of not less than two (2) members of the Board of Directors of the Company (the "Board"), appointed by the Board, each member of which, at the time he or she takes any action with respect to an Award under the Plan, shall be a "Non-Employee Director", as defined in Rule 16b-3 under the Securities Exchange Act

of 1934, as amended (the "Exchange Act"), an "independent director" under the listing standards of the Nasdaq Stock Market, Inc. and an "outside director", as defined in Treasury Regulations Section 1.162-27(e)(3), or any successor rules or regulation of each of the foregoing. Vacancies occurring in membership of the Committee shall be filled by the Board.

(b) Meetings. The Committee shall keep minutes of its meetings. The Committee shall select one of its members as its chairman and shall hold its meetings at such times and places as it may determine. The Committee shall establish such rules and regulations for the conduct of its business as it shall deem advisable and may act without meeting by unanimous written consent. One or more members of the Committee may participate in a meeting of the Committee by means of conference telephone or similar communications equipment provided all persons participating in the meeting can hear one another. A majority of the entire Committee shall constitute a quorum, and the acts of a majority of the members present at or so participating in any meeting at which a quorum is constituted shall be the acts of the Committee.

(c) Powers of the Committee. Subject to the provisions of the Plan, the Committee shall have the authority, in its sole discretion:

(i) to determine eligible individuals to whom Awards shall be granted from time to time, the number of Options, SARs or shares of Stock to be covered by each Award and the date upon which such Awards shall be granted (the "Grant Date");

(ii) to determine, from time to time, the fair market value of the Stock;

(iii) to determine, and to set forth in Award agreements, the terms and conditions of all Awards, including any applicable exercise or purchase price, the installments and conditions under which an Award shall become vested (which may be based on performance), terminated, expired, cancelled, or replaced, and the circumstances for vesting acceleration or waiver of forfeiture restrictions, and other restrictions and limitations;

(iv) to approve the forms of Award agreements and all other documents, notices and certificates in connection therewith which need not be identical either as to type of Award or among eligible individuals;

(v) to construe and interpret the terms of the Plan and any Award agreement, to determine the meaning of their terms, and to prescribe, amend, and rescind rules and procedures relating to the Plan and its administration;

(vi) in order to fulfill the purposes of the Plan and without amending the Plan, modify, cancel, or waive the Company's rights with respect to any Awards, to adjust or to modify Award agreements for changes in any Applicable Laws (as hereinafter defined) or regulation applicable thereto, and to recognize differences in foreign law, tax policies, or customs; and

(vii) to make all other interpretations and to take all other actions that the Committee may consider necessary or advisable to administer the Plan or to effectuate its purposes.

(d) Absent any other provision by the Board, the power and responsibilities of the Committee shall be vested and assumed by the Board acting as a committee of the whole.

4. Eligibility.

Awards under the Plan may be granted to the employees, directors, officers of, and consultants and consulting firms to (i) the Company, (ii) subsidiary corporations of the Company from time to time (a "Subsidiary or "Subsidiaries"), (iii) any business entity in which the Company shall from time to time have a substantial interest ("Affiliate"), who, in the sole opinion of the Committee are, from time to time, responsible for the management and/or growth of all or part of the business of the Company. In determining the persons to whom Awards shall be granted and the number of shares to be covered by each Award, the Committee may take into account the nature of the services rendered by such persons, their present and potential contribution to the Company's success, and such other factors as the Committee in its sole discretion shall deem relevant. The eligible individual holding one or more Awards or the Stock issuable or issued upon exercise or vesting of such Awards under the Plan shall hereinafter be referred to individually as a "Participant" and collectively as "Participants."

5. Stock Options.

(a) Grant of Options. The Committee shall have absolute authority in its discretion, but subject to the express provisions of the Plan, to determine (i) the person to whom Options shall be granted (the "Optionee"), (ii) the time or times at which Options shall be granted, (iii) the number of shares of Stock to be subject to each Option, and (iv) the time or times at which an Option can be exercised and whether in whole or in installments.

(b) Option Agreements. The Committee shall have absolute authority in its discretion to determine the terms and provisions (and amendments thereof) of the respective Option Awards (which need not be identical), including such terms and provisions (and amendments) as shall be required in the judgment of the Committee to conform to any change in any law or regulation applicable thereto. The Committee's determination on the foregoing matters shall be conclusive. All Options granted pursuant to the Plan shall be evidenced by an award agreement between the Company and the Optionee, in such form or forms as the Committee shall from time to time determine. Option Agreements covering Options granted from time to time or at the same time need not contain similar provisions; provided, however, that all such Option Agreements shall comply with all terms of the Plan. The terms and conditions of any and all SARs granted at the same time as an Option shall be included in the Option Agreement and shall comply with the terms of Section 6 below. Terms and provisions of Agreements evidencing SARs granted alone or following the grant of an Option shall comply with Section 6(b) below.

(c) Option Prices. The purchase price of each share of Stock subject to an Option granted hereunder shall be determined by the Committee but may not be less than the fair market value of the Stock on the Grant Date. The fair market value of the Stock on any given date shall be the closing price of the Stock on the Nasdaq Stock Market, Inc. (or the principal exchange on which the Stock is traded) on the date immediately prior to such grant, or, if no sales of the Stock occurred on that day, then the most recent day for which sales were reported.

(d) Term and Exercise of Options.

(i) The Committee shall have authority in its discretion to prescribe in any Option Agreement that the Option may be exercised in different installments during the term of the Option. Unless otherwise determined by the Committee or in the Option Agreement, each Option granted under the Plan shall be exercisable with respect to not more than one-third (1/3) of such shares of Stock subject thereto after the expiration of one (1) year following the Grant Date, and shall be exercisable as to an additional one-third (1/3) of such shares of Stock after the expiration of each of the succeeding two (2) years, on a cumulative basis, so that such Option, or any unexercised portion thereof, shall be fully exercisable after a period of three (3) years following the Grant Date. An Option that is exercisable under the Plan may be exercised by delivery to the Company (on any business day, at its principal office, addressed to the attention of the Committee) of a written notice of exercise, which notice shall specify the number of shares of Stock with respect to which the Option is being exercised. The purchase price of the shares of Stock to be acquired shall be paid in full in cash upon the exercise of the Option, except as provided in subsection (ii) below. The Company shall not be required to deliver certificates for such shares of Stock until payment has been made in accordance with the terms of this Section and such other conditions to the valid and lawful issuance of the shares of Stock as may exist from time to time shall have been fully satisfied.

(ii) Payment in full need not accompany the exercise of Options provided that the Stock certificate or certificates for the shares of Stock for which the Option is exercised be delivered to a licensed broker acceptable to the Company as the agent for the individual exercising the Option and, at all time such Stock certificate or certificates are delivered, the broker tenders to the Company an amount in cash (or cash equivalents acceptable to the Company) equal to the exercise price for the shares of Stock purchased pursuant to the exercise of the Option plus the amount (if any) of federal or other taxes which the Company may, in its judgment, be required to withhold with respect to the exercise of an Option. The Committee shall have the authority, but not the obligation, to establish at its discretion and in accordance with all applicable laws and the terms of this Plan, procedures by which an Optionee may exercise an Option in accordance with this subsection 5(d)(ii) absent the requirement that the Optionee deliver such certificates to a licensed broker, provided, that the Optionee deliver such certificates directly to the Company.

(iii) The term of each Option shall be for such period as the Committee shall determine, but not more than ten (10) years from the Grant Date thereof, or such shorter period as described in Section 7 hereof (the "Option Term").

(iv) As to employees, except as provided in Section 7 hereof, an Option granted to an employee of the Company or one of its Subsidiaries or Affiliates may not be exercised unless the holder thereof is at the time of such exercise (and has been continuously since the Grant Date) an employee of the Company or one of its then-Subsidiaries or a then-Affiliate.

(v) An Optionee shall not have any of the rights of a stockholder with respect to the shares of Stock subject to Option until such shares shall be issued or transferred to him or her upon exercise of his or her Option.

(vi) The exercise of any Option by a U.S. citizen or resident may be contingent upon receipt of a representation that at the time of such exercise it is the Optionee's present intention to acquire the shares of Stock being purchased for investment.

(vii) The certificate(s) representing shares of Stock issued upon exercise of any Option may contain a legend restricting the transfer thereof.

6. Stock Appreciation Rights.

(a) Grant of SARs. The Committee shall have absolute authority in its discretion, but subject to the express provisions of the Plan, to determine (i) the person to whom SARs shall be granted, (ii) the time or times at which SARs shall be granted, (iii) the number of shares to be subject to each SAR, and (iv) the time or times at which a SAR can be exercised and whether in whole or in installments. In the discretion of the Committee, a SAR may be granted alone; simultaneously with the grant of an Option under the Plan and in conjunction therewith or in the alternative thereto; or subsequent to the grant of an Option under the Plan and in conjunction therewith or in the alternative thereto.

(b) SAR Agreements. The Committee shall have absolute authority in its discretion to determine the terms and provisions (and amendments thereof) of the respective SAR Awards (which need not be identical), including such terms and provisions (and amendments) as shall be required in the judgment of the Committee to conform to any change in any law or regulation applicable thereto. The Committee's determination on the foregoing matters shall be conclusive. All SARs granted independently of or following Options granted pursuant to the Plan shall be evidenced by a SAR award agreement between the Company and the SAR holder, in such form or forms as the Committee shall from time to time determine. Such Agreements concerning the grant of SARs granted from time to time or at the same time need not contain similar provisions; provided, however, that all such Agreements shall comply with all terms of the Plan.

(c) SAR Prices.

(i) The exercise price of each SAR granted alone shall be determined by the Committee but may not be less than the fair market value of one share of the Stock on the Grant Date. The fair market value of the Stock on any given date shall be the closing price of the Stock on the Nasdaq Stock Market, Inc. (or the principal exchange on which the Stock is traded) on the date immediately prior to such grant, or, if no sales of the Stock occurred on that day, then the most recent day for which sales were reported.

(ii) A SAR granted simultaneously with or subsequent to the grant of an Option and in conjunction therewith or in the alternative thereto shall have the same exercise price as the related Option, shall be transferable only upon the same terms and conditions as the related Option, and shall be exercisable only to the same extent as the related Option; provided, however, that a

SAR, by its terms, shall be exercisable only when the fair market value of the shares of Stock subject to the SAR and related Option exceeds the exercise price thereof.

(d) Term and Exercise of SARs.

(i) The Committee shall have authority in its discretion to prescribe in any SAR Agreement that the SAR may be exercised in different installments during the term of the SAR. Unless otherwise determined by the Committee or in the SAR Agreement, each SAR granted under the Plan shall be exercisable with respect to not more than one-third (1/3) of such shares of Stock subject thereto after the expiration of one (1) year following the Grant Date, and shall be exercisable as to an additional one-third (1/3) of such shares of Stock after the expiration of each of the succeeding two (2) years, on a cumulative basis, so that such SAR, or any unexercised portion thereof, shall be fully exercisable after a period of three (3) years following the Grant Date. A SAR shall entitle the Participant upon exercise thereof to receive from the Company, upon a written request filed with the Committee (the "Request"), a number of shares of Stock (with or without restrictions as to substantial risk of forfeiture and transferability, as determined by the Committee, in its sole discretion), an amount in cash, or any combination of shares of Stock and cash, as specified in the Request (but subject to the approval of the Committee, in its sole discretion, at any time up to and including the time of payment, as to the making of any cash payment), having an aggregate fair market value equal to the product of (A) the excess of the fair market value, on the day of such Request, of one (1) share over the exercise price per share specified in such SAR or its related Option, multiplied by (B) the number of shares for which such SAR shall be exercised.

(ii) Any election by a holder of a SAR to receive cash in full or partial settlement of such SAR, and any exercise of such SAR for cash, may be made only by a Request filed with the Committee during the period beginning on the third (3rd) business day following the date of release by the Company of its quarterly or annual financial results of and ending on the twelfth (12th) business day following such date. Within thirty (30) days of the receipt by the Company of a Request to receive cash in full or partial settlement of a right or to exercise such SAR for cash, the Committee shall, in its sole discretion, either consent to or disapprove, in whole or in part, such Request. A Request to receive cash in full or partial settlement of a SAR or to exercise a SAR for cash may provide that, in the event the Committee shall disapprove such Request, such Request shall be deemed to be an exercise of such SAR for shares of Stock.

(iii) A holder of a SAR shall not be entitled to request or receive cash in full or partial payment of such SAR during the first six (6) months of its term; provided, however, that such prohibition shall not apply if the holder of such SAR is not subject to the reporting requirements of Section 16(a) of the Exchange Act.

(iv) Upon exercise of a SAR granted simultaneously with or subsequent to an Option and in the alternative thereto, the number of shares for which the related Option shall be exercisable shall be reduced by the number of shares for which the SAR shall have been exercised. The number of shares for which a SAR shall be exercisable shall be reduced upon any exercise of a related Option by the number of shares for which such Option shall have been exercised.

(v) If the Committee disapproves in whole or in part any election by a Participant to receive cash in full or partial settlement of a SAR or to exercise such SAR for cash, such disapproval shall not affect such Participant's right to exercise such SAR at a later date, to the extent that such SAR shall be otherwise exercisable, or to elect the form of payment at a later date, provided that an election to receive cash upon such later exercise shall be subject to the approval of the Committee. Additionally, such disapproval shall not affect such Participant's right to exercise any related Option or Options granted to such Participant under the Plan.

(vi) The term of each SAR shall be for such period as the Committee shall determine, but not more than ten (10) years from the Grant Date thereof, or such shorter period as described in Section 7 hereof (the "SAR Term"). A SAR shall be deemed exercised on the last day of the applicable SAR Term, if not otherwise exercised by the holder thereof, provided that the fair market value of the shares of Stock subject to the SAR exceeds the exercise price thereof on such date.

(vii) As to employees, except as provided in Section 7 hereof, a SAR granted to an employee of the Company or one of its Subsidiaries or Affiliates, may not be exercised unless the holder thereof is at the time of such exercise (and has been continuously since the Grant Date) an employee of the Company or one of its then Subsidiaries or a then Affiliate.

(viii) Any SAR shall be exercisable upon such additional terms and conditions as may from time to time be prescribed by the Committee.

7. Effect on Option or SAR Awards of Termination of Employment Service.

Unless otherwise provided by the Committee in the applicable Award agreement, an Option or SAR Award shall be subject to termination earlier than the end of the Option Term or the SAR Term, as the case may be, under the following circumstances:

(a) Cause or Voluntary Terminations of Employment. In the event of the termination of employment of a Participant to whom an Option or SAR Award has been granted under the Plan that is either (i) for cause or (ii) voluntary on the part of the employee without the written consent of the Company or one of its Subsidiaries or Affiliates, any Option or SAR Award granted pursuant to the Plan, to the extent not theretofore exercised, shall terminate immediately. For purposes of the Plan, the term "cause" means (A) the willful refusal by the Participant to perform proper responsibilities of the Participant's position with the Company or one of its Subsidiaries or Affiliates, (B) a violation of law by the Participant which adversely affects the assets, financial position or reputation of the Company or one of its Subsidiaries or Affiliates, or (C) a material violation by the Participant of any code of ethics, code of conduct or similar policy maintained by the Company, or one of its Subsidiaries or Affiliates, from time to time.

(b) Other Terminations of Employment. In the case of an Option or SAR Award granted to any employee of the Company or one of its Subsidiaries or Affiliates, in the event of termination of employment of a Participant for any reason, other than terminations described in Section 7(a) above or in Section 7(c) below, the employee may exercise his or her Option or

SAR Award (unless previously terminated or exercised) at any time during the three (3) months after such termination of employment, or at such other time as the Committee shall authorize, but in no event later than ten (10) years from the Grant Date thereof, but only to the extent that such Option or SAR Award was exercisable by him or her at the date of termination of his or her employment.

(c) Termination of Employment by Death or Disability. In the event of the death or Disability of any employee Participant, such Participant's Option or SAR Award (unless previously terminated or exercised) may be exercised (but only to the extent exercisable by the Participant as of the date of his or her death or Disability) within the one (1) year period following such Participants' death or Disability, but in no event later than ten (10) years from the date the Option or SAR Grant Date, by the person or persons designated in the Participant's will for that purpose or in the absence of any such designation, by the legal representative of the Participant's estate, or by the Participant or the Participants' legal representative, as the case may be. For purposes of the Plan, the terms "Disability" and "Disabled" shall mean disability or disabled as defined in Code Section 22(e)(3).

(d) Non-Employee Directors; Others. Unless otherwise provided by the Committee in the applicable Award Agreement, if a non-employee Participant ceases to serve as a director of, or consultant to, the Company, or one of its Subsidiaries or Affiliates, for any reason (including the death or Disability of the Participant), the Participant may exercise his or her Option or SAR Award (unless previously terminated or exercised) at any time within the one (1) year period after the date of such termination of service, death or Disability, as the case may be, or at such other time as the Committee shall authorize, but in no event later than ten (10) years from the Grant Date thereof, but only to the extent that such Option or SAR Award was exercisable by him or her at the date of such termination of service, death or Disability.

8. Restricted Stock Awards.

(a) Nature of Restricted Stock Award. A Restricted Stock Award is an Award entitling the Participant to receive shares of Stock, subject to such conditions, including a Company right during a specified period of time to require forfeiture by the Participant of such shares of Stock upon the Participant's termination of employment with the Company, Subsidiary or Affiliate or cessation of service as a director of, or consultant to, the Company, as the case may be, as the Committee may determine at the Grant Date. Restricted Stock shall be granted in respect of past services or other valid consideration. The Committee, in its sole discretion, may, from time to time and at any time, waive any or all restrictions and/or conditions contained in the Restricted Stock Award Agreement. Notwithstanding anything in this Plan to the contrary, the Committee, in its discretion, may grant Restricted Stock without any restrictions or conditions whatsoever.

(b) Award Agreement. A Participant who is granted a Restricted Stock Award shall have no rights with respect to such Award unless the Participant shall have accepted the Award within 60 days (or such shorter date as the Committee may specify) following the Award date by executing and delivering to the Company a Restricted Stock Award Agreement in such form as the Committee shall determine.

(c) Rights as a Stockholder. Upon complying with paragraph (b) above, a Participant shall have all the rights of a stockholder with respect to the Restricted Stock including voting and dividend rights, subject to nontransferability and Company forfeiture rights described in this Section 8 and subject to any other conditions contained in the Award Agreement. Unless the Committee shall otherwise determine, certificates evidencing shares of Restricted Stock shall remain in the possession of the Company until such shares are free of any restrictions under the Plan. The Committee in its discretion may, as a precondition of the Company's obligation to issue a Restricted Stock Award, require the Participant to execute a stock power or powers or other agreement or instruments necessary or advisable in connection with the Company's forfeiture rights with respect to such shares.

(d) Restrictions. Shares of Restricted Stock may not be sold, assigned, transferred or otherwise disposed of or pledged or otherwise encumbered. In the event of termination of employment of a Participant with the Company, Subsidiary or Affiliate for any reason (or cessation of service as a director of, or consultant to, the Company, Subsidiary or Affiliate in the case of a non-employee Participant) shares of Restricted Stock shall be immediately forfeited to the Company, except as set forth below:

(i) The Committee at the Grant Date shall specify the date or dates (which may depend upon or be related to the attainment of performance goals and other conditions) on which the nontransferability of the Restricted Stock and the Company's forfeiture rights with respect thereto shall lapse. The Committee at any time may accelerate such date or dates and otherwise waive or, subject to Section 18, amend any conditions of the Award.

(ii) Except as may otherwise be provided in the Restricted Stock Award Agreement, in the event of termination of employment of a Participant with the Company, Subsidiary or Affiliate for any reason, or cessation of service as a director of the Company for any reason, all of the Participant's Restricted Stock then remaining subject to the Company's forfeiture rights under Section 8(d)(iii) hereof shall be immediately forfeited to the Company without the necessity of any further act by the Company, the Participant or the Participant's legal representative; provided, however, that in the event of termination of employment by reason of death or Disability or cessation of service as a director of, or consultant to, the Company by reason of death or Disability, all conditions and restrictions relating to the Restricted Stock held by such Participant shall thereupon be waived and shall lapse.

(iii) In the absence of any other provision by the Committee in an Award Agreement, each Restricted Stock Award granted to (A) an employee of the Company, or one of its Subsidiaries or Affiliates shall be subject to forfeiture to the Company conditioned on the Participant's continued employment and (B) non-employee Participants shall be subject to forfeiture to the Company conditioned on the Participant's continued service as a director of, or consultant to, the Company, or one of its Subsidiaries or Affiliates and in the case of clause (A) or (B), such forfeiture rights shall lapse as follows: with respect to twenty-five percent (25%) of the shares subject to the Restricted Stock Award on the date one year following the Grant Date, and with respect to an additional twenty-five percent (25%) of such shares after the expiration of each of the succeeding three (3) years thereafter, on a cumulative basis, so that such Restricted Stock shall be free of such risk of forfeiture on the date four (4) years following the date of its Grant Date.

(e) Performance-Based Award. In the discretion of the Committee, the Company's forfeiture rights with respect to a Restricted Stock Award to an employee Participant may be designated as a Performance Award and be based upon any of the Performance Measures and Performance Formulae described in Section 10 hereof. Any such Restricted Stock Award may also be designated by the Committee as a Performance Compensation Award for Section 162(m) purposes and be governed by such Section 10.

(f) Waiver, Deferral, and Investment of Dividends. The Restricted Stock Award agreement may require or permit the immediate payment, waiver, deferral or investment of dividends paid with respect to the Restricted Stock.

9. Stock Awards to Non-Employee Directors.

The Committee may, in its discretion each year, beginning on July 1, 2009 and on each July 1st thereafter during the term of the Plan, grant to each person then serving as a non-employee director of the Company an award of Stock. No annual Stock Awards pursuant to this Section 9, however, will be made prior to stockholder approval of the Plan. For purposes of this Section 9, the term "non-employee director" shall mean any member of the Company's Board, as of the close of business on the Grant Date of any Stock Award hereunder, who is not an employee of the Company or any Subsidiary or Affiliate.

10. Performance Awards.

(a) Performance Awards. Subject to the limitations set forth in paragraph (c) hereof, the Committee may in its discretion grant a Performance Award (as defined herein) to any eligible Participant and shall evidence such grant in a Performance Award Agreement that is delivered to the Participant which sets forth the terms and conditions of the Award.

(b) Performance Compensation Awards. Subject to the limitations set forth in paragraph (c) hereof, the Committee may, at the Grant Date of a Performance Award, designate such Performance Award as a "Performance Compensation Award" in order that such Award constitutes "qualified performance-based compensation" under Section 162(m) of the Internal Revenue Code of 1986, as amended (the "Code"), in which event the Committee shall have the power to grant such Performance Compensation Award upon terms and conditions that qualify such Award as "qualified performance-based compensation" within the meaning of Code Section 162(m). With respect to each such Performance Compensation Award, the Committee shall establish, in writing within the time required under Code Section 162(m), a "Performance Period," "Performance Measure(s)," and "Performance Formula(e)" (each such term being hereinafter defined).

A Participant shall be eligible to receive payment in respect of a Performance Compensation Award only to the extent that the Performance Measure(s) for such Award is achieved and the Committee determines in writing that, by applying the Performance Formula(e) against such Performance Measure(s), that all or some portion of such Participant's Award has been earned for the Performance Period. As soon as practicable after the close of each Performance Period, the Committee shall review and certify in writing whether, and to what extent, the Performance Measure(s) for the Performance Period have been achieved and, if so,

determine and certify in writing the amount of the Performance Compensation Award to be paid to the Participant and, in so doing, may use negative discretion to decrease, but not increase, the amount of the Award otherwise payable to the Participant based upon such performance.

(c) Definitions.

(i) "Performance Award" means an award of Stock, Options, SARs or Restricted Stock granted pursuant to Section 10(a) hereof as the Committee in its sole discretion shall determine; provided that no "covered employee" (as defined in Treasury Regulations Section 1.162-27(c)(2)) shall be granted a Performance Award under this Section 10 which is intended to qualify as a "Performance Compensation Award" for purposes of Section 162(m) of the Code for any calendar year that upon exercise (in the case of an Option or SAR) or vesting (in the case of Restricted Stock) thereof would individually or in the aggregate exceed 1,000,000 shares of Stock.

(ii) "Performance Formula" means, for a Performance Period, one or more objective formulas or standards established by the Committee for purposes of determining whether or the extent to which an Award has been earned based on the level of performance attained or to be attained with respect to one or more Performance Measure(s). Performance Formulae may vary from Performance Period to Performance Period and from Participant to Participant and may be established on a stand-alone basis, in tandem or in the alternative.

(iii) "Performance Measure" means one or more of the following selected by the Committee to measure Company, Subsidiary, Affiliate, and/or business unit performance for a Performance Period, whether in absolute or relative terms (including, without limitation, terms relative to a peer group or index): basic, diluted, or adjusted earnings per share; sales or revenue; earnings before interest, taxes, and other adjustments (in total or on a per share basis); basic or adjusted net income; returns on equity, assets, capital, revenue or similar measure; economic value added; working capital; total stockholder return; product or business development, product market share, mergers, acquisitions, sales of assets of Subsidiaries, Affiliates or other business units, or any similar objective performance measures the Committee may decide upon from time to time. Each such Performance Measure shall be, to the extent applicable, determined in accordance with generally accepted accounting principles as consistently applied by the Company (or such other standard applied by the Committee) and, if so determined by the Committee, and in the case of a Performance Compensation Award, to the extent permitted under Code Section 162(m), adjusted to omit the effects of extraordinary items, gain or loss on the disposal of a business segment, unusual or infrequently occurring events and transactions and cumulative effects of changes in generally accepted accounting principles. Performance Measures may vary from Performance Period to Performance Period and from Participant to Participant, and may be established on a stand-alone basis, in tandem or in the alternative.

(iv) "Performance Period" means one or more periods of time (of not less than one (1) fiscal year of the Company), as the Committee may designate, over which the attainment of one or more Performance Measure(s) will be measured for the purpose of determining a Participant's rights in respect of an Award.

11. Restrictions on Transfer of Awards.

Subject to the terms of Sections 7(c) and 7(d) above, Option and SAR Awards shall be transferable only to members of the Participant's immediate family. For purposes of this Section 11, a Participant's immediate family includes, and only includes, the parents, spouse and children of the Participant.

12. No Employment or Service Rights. Nothing in the Plan or any Award agreement shall confer on any individual any right to continue in any capacity his or her relationship with the Company or any of its Subsidiaries or Affiliates or interfere in any way with the right of the Company or any of its Subsidiaries or Affiliates to terminate such relationship at any time, with or without cause.

13. No Option or SAR Repricing.

Notwithstanding anything to the contrary in this Plan, the purchase price of each share of Stock subject to an outstanding Option or SAR granted under the Plan may not be decreased after the Grant Date nor may an outstanding Option or SAR granted under the Plan be surrendered to the Company as consideration for the grant of a new Option or SAR with a lower exercise price (except as otherwise provided in Section 14 hereof relating to the adjustment of Awards upon changes in capitalization of the Company).

14. Adjustments Upon Changes in Capitalization.

Notwithstanding any other provisions of the Plan, each Award Agreement shall contain such provisions as the Committee shall determine to be appropriate for the adjustment of the number and class of shares of Stock subject to such Award and of the exercise price in the event of changes in the outstanding Stock by reasons of any stock dividend, split-up, recapitalization, rights offering, combination or exchange of shares, merger, consolidation, acquisition of property or stock, separation, reorganization, divisive reorganization or liquidation and the like, and, in the event of any such change in the outstanding Stock, the aggregate number and class of shares authorized to be issued under the Plan shall be appropriately adjusted by the Committee, whose determination of such adjustment shall be conclusive.

15. Adjustments Upon Change of Control.

Except with respect to Performance Awards to "covered employees", as defined in Treasury Regulations Section 1.162-27(c)(2), or as otherwise provided by the Committee in an Award Agreement, if a "Change of Control", as defined below, occurs, then: (A) the vesting periods of any and all Option or SAR Awards granted and outstanding under the Plan shall immediately be accelerated in full; and (B) the restrictions and/or conditions applicable to any and all other Awards granted and outstanding under the Plan shall immediately lapse and be of no further force and effect; such that the respective Participants holding such Awards shall have the immediate, fully vested right to purchase, receive and/or own without risk of forfeiture any and all cash and/or Stock that is the subject of the Award on the terms and conditions set forth in this Plan and the particular Award agreement, provided, however, that, if the "Change of Control" occurs with respect to a Subsidiary or an Affiliate, only Awards granted to employees

of such Subsidiary or Affiliate, as applicable, shall be subject to the accelerated vesting provisions of this Section 15.

The term "Change of Control" shall mean the occurrence of any of the following events:

(i) any "person" (as such term is used in Sections 13(d) and 14(d) of the Exchange Act (other than the Company, any trustee or other fiduciary holding securities under an employee benefit plan of the Company, or any company owned, directly or indirectly, by the stockholders of the Company in substantially the same proportions as their ownership of the Stock of the Company), is or becomes the "beneficial owner" (as defined in Rule 13d-3 under the Exchange Act), directly or indirectly, of securities of the Company (not including in the securities beneficially owned by such person any securities acquired directly from the Company or its affiliates) representing more than 15% of the combined voting power of the Company's then outstanding voting securities; provided, however, a Change of Control shall not be deemed to occur solely because such person acquired beneficial ownership of more than 15% of the combined voting power of the Company's then outstanding voting securities as a result of the acquisition of voting securities by the Company, which by reducing the number of voting securities outstanding, increases the proportional number of shares beneficially owned by such person, provided that if a Change of Control would occur (but for the operation of this sentence) as a result of the acquisition of voting securities by the Company, and after such share acquisition by the Company, such person becomes the beneficial owner of any additional voting securities which increases the percentage of the then outstanding voting securities beneficially owned by such person, then a Change of Control shall occur;

(ii) during any period of twenty-four (24) consecutive months (not including any period prior to the Effective Date (as defined herein)), individuals who at the beginning of such period constitute the Board and any new director (other than a director designated by a person who has entered into an agreement with the Company to effect a transaction described in subsection (i), (iii) or (iv) of this Section 15 whose election by the Board or nomination for election by the Company's stockholders was approved by a vote of at least two-thirds (2/3) of the directors then still in office who either were directors at the beginning of the period or whose election or nomination for election was previously so approved, cease for any reason to constitute a majority of the Board;

(iii) the stockholders of the Company approve a merger, consolidation or reorganization of the Company with any other corporation, other than a merger, consolidation or reorganization which would result in the stockholders of the Company immediately before such merger, consolidation or reorganization, owning, directly or indirectly immediately following such merger, consolidation or reorganization, at least 60% of the combined voting power of the voting securities of the Company or such surviving entity outstanding in immediately after such merger, consolidation or reorganization in substantially the same proportion as their ownership of the voting securities immediately before such merger, consolidation, or reorganization; or

(iv) the stockholders of the Company approve a plan of complete liquidation of the Company or an agreement for the sale or disposition by the Company of all or substantially all of the Company's assets.

16. Tax Matters.

(a) Any obligation of the Company to issue shares of Stock or cash pursuant to the grant or exercise of any Award shall be conditioned on the Participant having paid or made provision for payment of all applicable tax withholding obligations, if any, satisfactory to the Committee. The Company and its Subsidiaries and Affiliates shall, to the extent permitted by law, have the right to deduct any such taxes from any payment of any kind otherwise due to the Participant.

(b) Participants shall be solely responsible for the payment or satisfaction of all taxes and penalties that may arise in connection with Awards (including any taxes arising under Section 409A of the Code), and the Company shall have no obligation to indemnify or otherwise hold any Participant harmless from any or all of such taxes and penalties. The Committee shall have the discretion to organize any deferral program, to require deferral election forms, and to grant or to unilaterally modify any Award in a manner that (i) conforms with the requirements of Section 409A of the Code with respect to compensation that is deferred, (ii) that voids any Participant election to the extent it would violate Section 409A of the Code, and (iii) for any distribution election that would violate Section 409A of the Code, to make distributions pursuant to the Award at the earliest to occur of a distribution event that is allowable under Section 409A of the Code or any distribution event that is both allowable under Section 409A of the Code and is elected by the Participant. The Committee shall have the sole discretion to interpret the requirements of the Code, including Section 409A, for purposes of the Plan and all Awards.

17. Laws and Regulations.

(a) This Plan, the grant of Awards, and the exercise of Options and SARs under this Plan, and the obligation of the Company to sell or deliver any shares of Stock pursuant to all Awards granted under this Plan shall at all times be subject to all Applicable Laws. For purposes of the Plan, the term "Applicable Laws" means the legal requirements relating to the administration of Options and equity-based plans under applicable U.S. federal and state laws, the Code, rules or regulations of the Nasdaq Stock Market, Inc., any other applicable stock exchange or automated quotation system, and the applicable laws of any other country or jurisdiction where Awards are granted, as such laws, rules, regulations and requirements shall be in place from time to time.

(b) In the event that the shares of Stock are not registered under the Securities Act of 1933, as amended (the "Securities Act"), or any applicable state securities laws prior to the delivery of such shares, the Company may require, as a condition to the issuance thereof, that the persons to whom shares are to be issued represent and warrant in writing to the Company that such shares are being acquired by him or her for investment for his or her own account and not with a view to, for resale in connection with, or with an intent of participating directly or indirectly in, any distribution of such shares within the meaning of the Securities Act, and a legend to that effect may be placed on the certificates representing the shares.

(c) To facilitate the making of any grant of an Award under this Plan, the Committee may provide for such special terms for Awards to Participants who are foreign nationals or who are employed by the Company or any Affiliate outside of the United States of America as the

Committee may consider necessary or appropriate to accommodate differences in local laws, tax policies or customs. The Company may adopt rules and procedures relating to the operation and administration of this Plan to accommodate the specific requirements of local laws and procedures of particular countries. Without limiting the foregoing, the Company is specifically authorized to adopt rules and procedures regarding the conversion of local currency, taxes, withholding procedures and handling of stock certificates which vary with the customs and requirements of particular countries. The Company may adopt sub-plans and establish escrow accounts and trusts as may be appropriate or applicable to particular locations and countries.

18. Amendment and Termination.

The Board may make such modifications or amendments to the Plan as it shall deem advisable, or in order to conform to any change in any law or regulation applicable thereto. Without the consent of any Participant to whom any Award shall therefore have been granted, no termination, modification or amendment of the Plan shall adversely affect any rights which may previously have been granted under the Plan to such Participants.

19. Term of Plan.

The Plan was originally adopted on December 3, 1997 by the Board (to be effective on January 1, 1998) and was thereafter approved by the Company's stockholders on December 2, 1998 and amended by the Board on October 24, 2007. This amendment and restatement of the Plan was approved by the Board on December 11, 2008 (the "Effective Date"), and was further amended on March 19, 2009, and further amended on May 27, 2009 and shall remain effective until termination by the Board or until all shares of Stock authorized to be issued pursuant to the Plan have been issued or transferred or deemed issued or transferred as provided in Section 2.

20. Governing Law.

The Plan and all Awards made and actions taken thereunder shall be governed by and construed in accordance with the laws of the State of Connecticut (without regard to choice of law provisions), provided, however, that all matters relating to or involving corporate law shall be governed by the laws of the State of Delaware.

21. No Liability of Committee Members.

No member of the Committee shall be personally liable by reason of any contract or other instrument executed by such member or on such member's behalf in such member's capacity as a member of the Committee nor for any mistake of judgment made in good faith, and the Company shall indemnify and hold harmless each member of the Committee and each other employee, officer or director of the Company to whom any duty or power relating to the administration or interpretation of the Plan may be allocated or delegated, against any cost or expense (including counsel fees) or liability (including any sum paid in settlement of a claim) arising out of any act or omission to act in connection with the Plan unless arising out of such person's own fraud or willful bad faith; provided, however, that approval of the Board shall be required for the payment of any amount in settlement of a claim against any such person. The foregoing right of indemnification shall not be exclusive of any other rights of indemnification to

which such persons may be entitled under the Company's Amended and Restated Certificate of Incorporation or Amended and Restated By-Laws, as a matter of law, or otherwise, or any power that the Company may have to indemnify them or hold them harmless.

22. Reliance on Reports.

Each member of the Committee and each member of the Board shall be fully justified in relying, acting or failing to act, and shall not be liable for having so relied, acted or failed to act in good faith, upon any report made by the independent public accountant of the Company and its Subsidiaries and Affiliates and upon any other information furnished in connection with the Plan by any person or persons other than such member.

23. Relationship to Other Benefits; Other Plans.

Any Award granted under the Plan shall not be deemed compensation for purposes of computing benefits under any retirement plan of the Company or any Subsidiary or Affiliate and shall not affect any benefits under any other employee benefit plan now or subsequently in effect under which the availability or amount of benefits is related to the level of compensation, except as otherwise specifically provided in any other employee benefit plan.

24. Stockholder Approval.

This amended and restated Plan will be submitted to the stockholders of the Company for confirmation, ratification and approval by any method adequate under Delaware law in the case of an action requiring stockholder approval. If the Plan is not approved by the stockholders of the Company by December 31, 2009, then any Awards granted hereunder on or after the Effective Date shall be void and of no further force or effect, but the Plan shall continue in full force and effect for purposes of all Awards granted prior to the Effective Date.

* * * * *

As amended and restated by the Board of Directors on December 11, 2008, and further amended on March 19, 2009, and further amended on May 27, 2009. Approved by the Company's shareholders on May 27, 2009.

RULE 13A-14(a) CERTIFICATIONS

I, William H. Hastings, certify that:

1. I have reviewed this annual report on Form 10-K of Magellan Petroleum Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15a-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's independent registered public accounting firm and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

RULE 13A-14(a) CERTIFICATIONS

I, Daniel J. Samela, certify that:

1. I have reviewed this annual report on Form 10-K of Magellan Petroleum Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrants other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15a-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the independent registered public accounting firm and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

MAGELLAN PETROLEUM CORPORATION ANNOUNCES THIRD QUARTER RESULTS

Portland, Maine, May 11, 2009 — Magellan Petroleum Corporation (NASDAQ: MPET) (ASX: MGN) reported consolidated net income of \$391,000 (\$.01 per share) on gross revenues of \$5.5 million in its third fiscal quarter ended March 31, 2009, as compared to net income of \$936,000 (\$.02 per share) on revenues of \$9.5 million in last year's third quarter.

For the nine-month period ended March 31, 2009, the Company reported net income of \$1.4 million (\$.03 per share) on \$21.1 million in revenues, compared to a net loss of \$10.3 million (\$.25 per share) on revenues of \$29 million in the prior period last year.

Magellan's President and Chief Executive Officer, William H. Hastings said "Weak energy markets coupled with production declines negatively affected year over year performance through March 31, 2009, after taking into consideration last year's tax settlement which is a special item. We are facing 2009's challenges head-on; active gas sales negotiations are ongoing, and significant expense reduction programs are being discussed for our fields, including consolidation possibilities. We will persist with our efforts to improve near-term performance while we target significant larger-scale growth.

Unlike most companies at this stage, we are in a unique position to capitalize on record low asset prices, to examine acquisition of "challenged" companies as a result of current capital market conditions, and have access to growth capital as evidenced by our Securities Purchase Agreement with Young Energy Prize S.A. Other capital providers have expressed interest and we are working diligently to add value from this combination of circumstances."

The following is a discussion of the financial results for the three and nine months ended March 31, 2009.

Quarter Ended March 31, 2009

Oil sales decreased 62% to \$1.7 million in 2009 from \$4.4 million in 2008. This reduction is due to a 29% decrease in production, a 29% decrease in the average price per barrel and a 27% decrease in the

average exchange rate. The production in the Nockatunga fields continued to decline in this quarter as compared to prior periods. We expect the downward production trend in the Nockatunga fields to continue. Nockatunga is a high-cost area that does not justify incremental investment at current oil price levels.

Gas sales decreased 26% to \$3.3 million in 2009 from \$4.4 million in 2008. This is due to a 12% decrease in volume resulting from a decline in customer requirements and a 27% decrease in the average exchange rate partially offset by an 18% increase in the average price per mcf.

Interest income decreased 45% to \$274,000 in 2009 from \$500,000 in 2008 due to a decrease in market interest rates and a 27% decrease in the average exchange rate.

Exploration and dry hole costs increased to \$1.4 million in 2009 from \$335,000 in 2008. This increase is due to seismic survey costs of approximately \$1.2 million related to the Nockatunga fields partially offset by the 27% decrease in the average exchange rate.

Depletion, depreciation and amortization decreased in 2009 to \$1.1 million from \$4.0 million in 2008. The decrease is due to lower depletable costs and the 27% decrease in the average exchange rate.

Auditing, accounting and legal services increased in 2009 to \$602,000 from \$215,000 in 2008 due mostly to legal fees related to the YEP transaction and the shareholder agreement (see Other Financial Matters below) of approximately \$256,000 partially offset by the 27% decrease in the average exchange rate.

Other administrative expenses decreased to \$735,000 in 2009 from \$883,000 in 2008 due to costs related to director stock options that were incurred in 2008 but not in 2009 (\$63,000), decrease in insurance expenses in 2009 and the 27% decrease in the average exchange rate, partially offset by due diligence costs related to the YEP transaction (\$175,000).

The income tax provision decreased due to the decrease in income before taxes as well as the provision of the ATO settlement in the prior fiscal period. The Company has estimated the effective tax rate expected to be applicable for the full fiscal year. The rate used in providing for income taxes on a current year-to-date basis for the nine months ended March 31, 2009 is 46%. The Company revised its estimate from the effective rate of 70% used in providing income taxes for the six months ended December 31, 2008 due to a decrease in U.K. exploration expenses partially offset by an increase in the estimate of MPC loss for fiscal 2009, which do not generate a tax benefit. U.K. exploration expenses, expected to be incurred in 2009 will occur in 2010. U.K. exploration expenses previously expected to be incurred in 2009 will occur in 2010.

Nine Months Ended March 31, 2009

Oil sales decreased 35% to \$9.2 million in 2009 from \$14.1 million in 2008. This is due to a 29% decrease in production and the 16% decrease in the average exchange rate discussed below. We expect the downward production trend in the Nockatunga project to continue due to the poor reinvestment economics mentioned above.

Gas sales decreased 20% to \$10.6 million in 2009 from \$13.2 million in 2008. This is due to a 10% decrease in volume resulting from a decline in customer requirements and a 16% decrease in the average exchange rate partially offset by a 4% increase in the average price per mcf.

Exploration and dry hole costs decreased to \$2.7 million in 2009 from \$3.1 million in 2008. This

decrease is due to Cooper Basin drilling costs incurred in 2008 but not in 2009 (\$1.3 million) and the 16% decrease in the average exchange rate partially offset by seismic survey costs related to the Nockatunga fields (\$1.2 million) and the write off and impairments of U.K. permits in 2009 (\$321,000).

Depletion, depreciation and amortization decreased in 2009 to \$5.7 million from \$12.8 million in 2008 due to lower depletable costs and the 16% decrease in the average exchange rate.

Auditing, accounting and legal services increased in 2009 to \$1.3 million from \$774,000 in 2008 due mostly to legal fees related to the YEP transaction and the shareholder agreement (see Other Financial Matters below) of approximately \$505,000 partially offset by the 16% decrease in the average exchange rate.

Other administrative expenses decreased to \$2.0 million in 2009 from \$2.5 million in 2008 due to costs related to the ATO settlement (\$597,000) and director stock options (\$63,000) that were incurred in 2008 but not in 2009, exchange rate gains (\$326,000) in 2009, decrease in insurance expenses in 2009 (\$127,000) and the 16% decrease in the average exchange rate, partially offset by due diligence costs related to the YEP transaction (\$393,000).

The income tax provision decreased due to the decrease in income before taxes as well as the provision of the ATO settlement in the prior fiscal period. The Company has estimated the effective tax rate expected to be applicable for the full fiscal year. The rate used in providing for income taxes on a current year-to-date basis for the nine months ended March 31, 2009 is 46%. The Company revised its estimate from the effective rate of 70% used in providing income taxes for the six months ended December 31, 2008 due to a decrease in U.K. exploration expenses partially offset by an increase in the estimate of MPC loss for fiscal 2009, which do not generate a tax benefit. U.K. exploration expenses expected to be incurred in 2009 will occur in 2010.

Other Financial Matters

As previously disclosed on February 9, 2009, the Company entered into a definitive securities purchase agreement with Young Energy Prize S.A. ("YEP"), a Luxembourg corporation, providing for a \$10 million equity investment in the Company. Closing under the purchase agreement is subject to receipt of shareholder approval of the investment and an amendment to the Company's certification of incorporation, as well as other customary closing conditions.

Under the original terms of the securities purchase agreement, YEP will pay \$10.0 million (\$1.15 per share) to acquire a total of 8,695,652 shares of the Company's Common Stock (the "Shares") and five-year warrants entitling YEP to purchase 4,347,826 shares through warrant exercise at a price of \$1.20 per share.

On April 3, 2009, the Company and YEP agreed to amend their securities purchase agreement to extend the outside termination date for the closing of YEP's equity investment from April 30, 2009 to June 30, 2009, in order to provide sufficient time to conduct the 2008 Annual Meeting and complete the YEP equity investment transaction. The amendment also provides that, if YEP completes the purchase of the ANS Shares from the ANS Parties (see ANS discussion below) then the exercise price payable by YEP for the Warrant Shares shall be reduced from \$1.20 to \$1.15 per share.

On April 3, 2009, the Company and two of its shareholders, ANS Investments LLC and its CEO, Jonah M. Meer (together, the "ANS Parties"), entered into a settlement agreement that terminated proxy solicitation efforts of the ANS Parties on mutually agreeable terms. Under the terms of the settlement agreement, the ANS Parties have agreed to withdraw both the nomination of Mr. Meer as a director

candidate and their other proposals, to terminate all proxy solicitation efforts with respect thereto, to support each of the proposals that the Company intends to present to its shareholders at the Annual Meeting and to vote all of their shares in favor of these proposals in accordance with the recommendation of the Company's Board of Directors. In exchange, the Company agreed to reimburse the ANS Parties up to \$125,000 for their legal and other expenses incurred by the ANS Parties related to their proxy solicitation efforts.

Separately, YEP and the ANS Parties on April 3, 2009 entered into an agreement by which YEP will, upon completion of YEP's equity investment in the Company, purchase 568,985 shares of the Company's common stock currently owned by the ANS Parties at a purchase price of \$1.15 per share.

During the nine month period ended March 31, 2009, the Company issued 3.1 million stock options. These options have been issued under a new stock option plan which is subject to shareholder approval at the next annual shareholders meeting which will be held on May 27, 2009. As this approval is pending, there is no grant date for accounting purposes and, consequently, there was no financial statement impact during this period. If approved, the accounting impact of these options will be material to the Company's financial statements.

Gas Contracts

MPAL's major customer, Gasgo Pty. Ltd., a subsidiary of Power and Water Corporation ("PWC") of the Northern Territory has contracted with Eni Australia for the supply of PWC's Northern Territory gas demand requirement for twenty five years. Eni Australia, initially expected to commence sales in January 2009, is to supply the gas from its Blacktip field offshore of the Northern Territory. The Blacktip development has encountered significant development difficulty and delay. One Blacktip well was plugged and abandoned in March 2009 as non-commercial. MPAL and Santos ("Mereenie Producers") will continue to supply PWC's gas demand to augment Blacktip gas. There is a possibility that all Amadeus Basin gas deliverability could be combined with the distressed Blacktip flow to achieve efficiencies and savings for all Parties (producers and buyers) in the Darwin supply grid. There are significant unknowns with regard to Blacktip capability, efficiency, and natural gas deliverability. MPAL may, or may not, be able to contract for the sale of our remaining uncontracted reserves. Negotiations on this premise are active with ENI Australia, PWC, and with Darwin LNG Operator, ConocoPhillips. Unless MPAL is able to obtain additional contracts for its remaining gas reserves or be successful in its current exploration program, its revenues will be materially reduced beginning with 2010. Mereenie gas sales were approximately \$15.5 million (net of royalties) or 85% of total gas sales for the year ended June 30, 2008 and \$8.8 million (net of royalties) or 84% of total gas sales for the nine months ended March 31, 2009.

Forward Looking Statements

Statements in this release which are not historical in nature are intended to be, and are hereby identified as, forward-looking statements for purposes of the Private Securities Litigation Reform Act of 1995. These statements about Magellan and Magellan Petroleum Australia Limited ("MPAL") may relate to their businesses and prospects, revenues, expenses, operating cash flows, and other matters that involve a number of uncertainties that may cause actual results to differ materially from expectations. Among these risks and uncertainties are the likelihood and timing of the closing of the YEP investment transaction, pricing and production levels from the properties in which Magellan and MPAL have interests, the extent of the recoverable reserves at those properties, the future outcome of the negotiations for gas sales contracts for the remaining uncontracted reserves at both the Mereenie and Palm Valley gas fields in the Amadeus Basin, including the likelihood of success of other potential suppliers of gas to the current customers of Mereenie

and Palm Valley production. In addition, MPAL has a large number of exploration permits and faces the risk that any wells drilled may fail to encounter hydrocarbons in commercially recoverable quantities. Any forward-looking information provided in this release should be considered with these factors in mind. Magellan assumes no obligation to update any forward-looking statements contained in this release, whether as a result of new information, future events or otherwise.

Comparative, consolidated results for the three and nine month periods are shown in the following condensed consolidated statements of operations:
